

Administrator may withdraw program approval when the state's enforcement program fails to comply with the requirements of 40 CFR part 123, including (i) failure to act on permit or other program violations, (ii) failure to seek and collect adequate penalties, and (iii) failure to inspect and monitor regulated facilities. However, Federal regulations do not specify with any precision the number of times a state must, for instance, fail to act on permit or other program violations before NPDES authority should be withdrawn. Rather, the CWA and the regulations vest EPA with substantial discretion to determine whether a State is failing to meet minimum federal requirements. The structure of the CWA provides for primary NPDES authority to rest with the states, and Congress intended for EPA to exercise its oversight capacity in furtherance of appropriate State regulations of point source discharges under Section 402(b). With no bright line separating an insufficient program from a sufficient one, EPA must use its discretion to determine if the particular actions or inactions of an NPDES authorized state fall within a range of what EPA considers acceptable under the CWA and 40 CFR part 123.

In certain areas identified in the Petition, EPA concluded that improvements were warranted in the State's administration of the program. These areas related primarily to recordkeeping, data management and compliance and enforcement. The State has made substantial improvements in these areas. EPA is continuing to work with Louisiana, as EPA works with all State NPDES permitting authorities, to achieve ever greater levels of environmental protection. However, as the program now stands, EPA has concluded that the LPDES program is within the range of NPDES program practices required under the CWA and 40 CFR part 123, so that withdrawal proceedings are not an appropriate response.¹

Thus, EPA has determined that cause does not exist to commence formal withdrawal proceedings under 40 CFR 123.64(b). EPA will continue to monitor the State's program, both through routine oversight procedures, as well as through special national initiatives such as the Permitting for Environmental Results (PER) program. If any additional concerns are noted in the State's LPDES

program as a result of this oversight, they will be addressed at that time.

Conclusion

After evaluation of the comments and other information related to this **Federal Register** notice regarding the revision to the LPDES program authorization, I hereby provide public notice of the approval for the State of Louisiana to administer, in accordance with 40 CFR part 123, the LPDES program and denial of the petition for EPA to withdraw LDEQ's authorization to administer the LPDES program.

Dated: December 28, 2004.
