

Table 1 of this document represents the estimated burden of meeting the reporting requirements. The burden estimates for these information collection requirements are based on information provided by the Office of New Animal Drug Evaluation, Center for

Veterinary Medicine. The guidance document describes the type of information that should be collected by the drug sponsor when completing the antimicrobial resistance risk assessment. FDA will use the risk assessment and supporting information to evaluate the

safety of original (21 CFR 514.1) or supplemental (21 CFR 514.8) NADAs for antimicrobial drugs intended for use in food-producing animals.

FDA estimates the burden of this collection of information as follows:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN¹

21 CFR 514.1(b)(8) and 514.8(a)(2)	No. of Respondents	Annual Frequency per Response	Total Annual Responses	Hours per Response	Total Hours
Hazard Identification (initial scoping of issues—relevant bacteria, resistance determinants, food products; preliminary data gathering)	15	1	15	30	450
Release Assessment (literature review; review of research reports; data development; compilation, and presentation)	10	1	10	1,000	1,000
Exposure Assessment (identifying and extracting consumption data; estimating probability of contamination on food product)	10	1	10	8	80
Consequence Assessment (review ranking of human drug importance table)	10	1	10	4	40
Risk Estimation (integration of risk components; development of potential arguments as basis for overall risk estimate)	10	1	10	12	120
Risk Management (discussion of appropriate risk management activities)	10	1	10	30	300
Total Burden					10,990

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

FDA estimates that on an annual basis an average of 15 NADAs (including original applications and major supplements) would be subject to information collection under this guidance. This estimate is based on the number of reviews completed between October 2003 and October 2004. During that period, microbial food safety for approximately 15 antimicrobial NADAs (including original and major supplements) was evaluated. This estimate excludes NADAs for antimicrobial drug combinations, generic drug applications (ANADAs), and certain supplemental NADAs.
