

applicators of restricted use pesticides. Therefore, a distinct certification process is required in any state wanting to certify applicators of 1080 LPC. The M-44 Device (M-44) is used by certified applicators to control predators of livestock and poultry. Similar to LPC 1080, M-44 has specific use restrictions that go beyond those required for most other categories of applicators of restricted use pesticides. The amendments to the Utah plan satisfy the specific training, recordkeeping, and reporting requirements for both LPC 1080 and M-44.

The Utah Department of Agriculture and Food (UDAF) will only be certifying employees of the U.S. Department of Agriculture, Wildlife Services (WS) and cooperative UDAF employees under the direct supervision of WS to use 1080 LPC and M-44 in performance of their official duties. WS is authorized by Congress to manage wildlife damage. UDAF certification of WS employees as pesticide applicators will allow them to purchase, use, and supervise the use of 1080 LPC and M-44 to carry out their responsibility in Utah.

UDAF also proposes the following new categories and subcategories for commercial applicators: Vertebrate Pest Control; Fumigation/Stored-Commodities Pest Control; Wood-Preservation Pest Control and Wood-Destroying Organisms Pest Control. Under the Aquatic Pest Control category for commercial applicators, Utah is proposing new subcategories for Surface Water and Sewer Root Control. The plan also includes a general provision for proper transportation, storage and disposal of pesticides and pesticide containers.

UDAF is also adding a Memorandum of Understanding (MOU) with EPA Region 9 (San Francisco, CA) in anticipation of an EPA Region 9 program to certify applicators of restricted use pesticides in Navajo Indian Country. EPA Region 9 expects to issue a certificate to applicators already possessing a valid certificate from UDAF. The MOU establishes the roles of UDAF and EPA Region 9 to implement the anticipated program.

EPA finds that the proposed amendment permitting certification of

1080 LPC applicators meets the criteria specified in the Final Decision of October 1983, that requires applicators of 1080 LPC to receive specific training, recordkeeping and reporting requirements beyond that of other restricted use pesticides. In addition, EPA has determined that the proposed M-44 sodium cyanide device amendment complies with specific registration requirements. EPA has reviewed the new categories and subcategories, the provisions for transportation, storage and disposal, and the MOU with EPA Region 9 to certify applicators of restricted use pesticides in Navajo Indian Country. Therefore, EPA announces its intentions to approve the amendment to the Utah State Certification Plan.

III. What Action is the Agency Taking?

EPA has reviewed the revised Utah Certification Plan and finds it in compliance with FIFRA and 40 CFR part 171. Therefore, EPA announces its intentions to approve the amendment to the Utah State Certification Plan permitting certification of 1080 LPC applicators and M-44 sodium cyanide device applicators. EPA is soliciting comments on the proposed amendments.
