

environmental assessment is needed for this project.

The objective of the Lower Payette Ditch Company proposed action is to provide efficient water delivery, operator safety and low maintenance, reliability, and adequate fish and recreational boater passage, while not adversely affecting the environment. The proposed project would replace the existing deteriorating diversion structure with an automated inflatable diversion dam. Alternatives evaluated to meet these objectives include: No Action, Upgrade Existing Diversion Dam with an Automated Inflatable Dam, Replace Existing Diversion Dam with a Push-Up Diversion Dam.

The Lower Payette Ditch Company invites participation and consultation of agencies and individuals that have special expertise, legal jurisdiction, or interest in the preparation of the draft environmental assessment. A limited number of copies of the EA are available to fill single copy requests at the above address. Basic data developed during the environmental assessment is on file and may be reviewed by contacting Richard Sims.

Further information on the proposed action or future public meetings may be obtained from Richard Sims, State Conservationist, at the above address or telephone (208) 378-5700.
