

before the end of the fishing year, NMFS may reapportion whiting to the other sectors to ensure full utilization of the resource. Therefore, it is necessary to collect information, via telephone and/or email, from the groundfish industry to determine the level of interest in harvesting the unused portion of the Pacific whiting resource and to project the number of participants. This survey continues to be valuable and important in groundfish management.

## II. Method of Collection

Telephone and email.

## III. Data

*OMB Number:* 0648–0243.

*Form Number:* None.

*Type of Review:* Regular Submission.

*Affected Public:* Business or other for-profit organizations (owners or operators of vessels that catch or process fish in ocean waters 0–200 nautical miles offshore Washington, Oregon, and California).

*Estimated Number of Respondents:* 40.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The purpose of this data collection is to provide information on the value of Hawaii's coral reef habitats to specific segments of the U.S. population. The study will measure total economic values for Hawaii's coral reefs. This effort is designed to provide defensible information for both resource managers and damage assessments on the value of coral reef habitats and alternative management actions. The project is designed as a phased three-year effort to ensure effective use of all the available information. It will involve the development of extensive knowledge about how reef habitats are perceived, implication of alternative management actions, designing original survey instruments, interviewing of a large number of respondents via an electronically downloadable and submittable pretest (200) and survey

(2000), conducting formal statistical analysis of the data, and developing a decision support system for resource managers to use. For total economic value, a nationally oriented survey will be conducted using stated preferences methods.

## II. Method of Collection

Data collection will be done in two phases. First, a large-scale pretest of the full survey instrument will be tested for a response of up to 200 usable observations. The pretest data will then be analyzed and the questionnaire revised, as needed. In the second phase, the final survey instrument will be administered to a sample of up to 2000 people. Both the pretest and final surveys are planned as taking an average of 30 minutes per completed interview.

## III. Data

*OMB Number:* None.

*Form Number:* None.

*Type of Review:* Regular submission.

*Affected Public:* Individuals or households.

*Estimated Number of Respondents:* 2,200.

*Estimated Time Per Response:* 30 minutes for a pretest, and 30 minutes for a final survey.

*Estimated Total Annual Burden Hours:* 1,100.

*Estimated Total Annual Cost to Public:* \$0.
