Background

On October 16, 2003, the Commission adopted a Report and Order¹ establishing service rules to promote non-Federal Government development and use of the “millimeter wave” spectrum in the 71-76 GHz, 81-86 GHz and 92-95 GHz bands² on a shared basis with Federal Government operations.³ The Commission adopted a flexible and innovative regulatory framework for the 71-95 GHz bands that would not require traditional frequency coordination among non-Federal Government users. Under this approach, the Commission issues an unlimited number of non-exclusive nationwide licenses to non-Federal Government entities for the 12.9 gigahertz of spectrum allocated for commercial use.⁴ These licenses serve as a prerequisite for registering individual point-to-point links, which in turn is required prior to operating a link. Furthermore, the 71-95 GHz bands are allocated on a shared basis with Federal Government users. Therefore, a licensee may not operate on a link until the link has been coordinated with the National Telecommunications and Information

¹ In the *Report and Order* released November 4, 2003, the Commission adopted rules for both unlicensed (Part 15) and licensed (Part 101) use of portions of these bands. Allocations and Service Rules for the 71-76 GHz, 81-86 GHz and 92-95 GHz Bands, WT Docket No. 02-146, *Report and Order*, 69 FR 3257, January 23, 2004, 18 FCC Rcd 23318 (2003) (*Report and Order*) (*recon. pending*). The instant Public Notice concerns licensed use of the bands, which involves all of the bands except for 100 megahertz of spectrum at 94.0-94.1 GHz. For convenience only, we refer to the licensed spectrum herein as “the bands,” “the Millimeter Wave 70/80/90 GHz Radio Service,” or “71-95 GHz”; such references do not include 94.0-94.1 GHz. See note, *infra*.

² On February 23, 2004, The Wireless Communications Association International, Inc. filed a petition for reconsideration of certain aspects of the *Report and Order* relating to the 71-76 and 81-86 GHz bands.

³ In the context of spectrum management, “Federal Government” refers to use by the Federal Government and “non-Federal Government” refers to use by private entities and state and local governments. See *Report and Order*, 18 FCC Rcd at 23319 n.3. See also 47 CFR 101.147(z) (sites may not operate until NTIA approval is received); 101.511 (authorization will be granted upon proper application filing and link coordination in accordance with the Commission’s rules); 101.1523 (sharing and coordination among non-Federal Government licensees and between non-Federal Government licensees and Federal Government services).

⁴ The 71-76 GHz, 81-86 GHz and 92-95 GHz bands are allocated to both Federal Government and non-Federal Government users on a co-primary basis, except the 94.0-94.1 GHz portion, which is allocated for exclusive Federal Government use. See generally, *Report and Order*, 18 FCC Rcd at 23322-31.
