Affected entities: Entities potentially affected by this action are users of methyl bromide, *e.g.*, farmers of vegetable crops, fruits, and seedlings, and owners of stored food commodities and structures such as grain mills and processors, agricultural consortia and representative groups, Government and non-government researchers, as well as producers, importers, exporters, and distributors of methyl bromide, and applicators of methyl bromide.

Title: Request for Applications of Critical Use Exemptions from the Phaseout of Methyl Bromide.

Abstract: With this Information Collection Request (ICR), EPA's Office of Air and Radiation (OAR) and Office of Prevention, Pesticides, and Toxic

Substances (OPPTS) are continuing the existing request for critical use exemption applications for methyl bromide, under the Clean Air Act (CAA) and in accordance with U.S. obligations under the Montreal Protocol on Substances that Deplete the Ozone Layer (Protocol). The information is collected so that the U.S. government can submit a technically valid methyl bromide critical use exemption nomination to the Ozone Secretariat of the United Nations Environment Programme on an annual basis. Since 2002, this information has primarily been collected through agricultural consortia, though individuals have also submitted applications. If an applicant indicates that the application contains Confidential Business Information (CBI), that information will be treated as such by EPA. Responses to the collection of information are required in order for users to obtain a critical use exemption benefit.

In 2003, EPA created separate applications for methyl bromide pre-plant users and post-harvest users in order to facilitate data collection as the pre-plant and post-harvest fumigation contexts differ. In 2005, EPA is considering proposing to format both the pre-plant and post-harvest applications to more closely resemble the forms for the nominations required by the Methyl Bromide Technical Options Committee (MBTOC), an advisory body to the Parties to the Protocol.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

EPA initially calculated that 95% of users would apply with a consortia and the remaining 5% would apply independently. EPA also calculated each user's burden prior to submitting data to a consortia. EPA encourages the electronic submission of CUE applications.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement:

The annual burden is reported in this notice by annual respondent burden. This estimate includes the time needed to read the CAA request for applications, process, compile, and review the requested data for accuracy and appropriateness, generate application correspondence, and store, file, and maintain the information. This ICR renewal does not include any burden for third-party or public disclosures that were not previously reviewed and approved by OMB.

EPA estimated approximated 80% of the respondents would be pre-plant or soil users, with the remaining 20% being post-harvest users. EPA also initially calculated individual and consortia burden. The annual burden hours for this collection of information were initially estimated and summarized as follows, as stated in a notice published in the **Federal Register** on June 27, 2001 (66 FR 34181):

Respondents/affected entities: 200.

Estimated total number of potential respondents: 200.

Frequency of response: Annual.

Estimated total/average number of responses for each respondent: 1.

Estimated total annual burden hours: 25,000.

Estimated total annual burden costs: \$1,500,000.

EPA seeks comment on the above summary. EPA may revise the calculations based on the critical use exemption applications received annually between 2002–2004.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of

information; and transmit or otherwise disclose the information.

Director, Stratospheric Protection Division, Office of Air and Radiation.
