### Forest Service

#### Information Collection; Request for Comments; Public Support for Fuel Reduction Policies: Multimedia Versus Printed Materials

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations on the proposed new information collection, Public Support for Fuel Reduction Policies: Multimedia vs. Printed Materials.

**DATES:** Comments must be received in writing on or before April 19, 2005 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

**ADDRESSES:** Comments concerning this notice should be addressed to Armando Gonzalez-Caban, Pacific Southwest Research Station, Forest Service, USDA, 4955 Canyon Crest Drive, Riverside, CA 92507.

Comments also may be submitted via facsimile to (951) 680-1501, or by e-mail to [agonzalezcaban@fs.fed.us](mailto:agonzalezcaban@fs.fed.us).

The public may inspect comments received at Pacific Southwest Research Station, Building One reception area, Forest Service, USDA, 4955 Canyon Crest Drive, Riverside, California, during normal business hours. Visitors are encouraged to call ahead to (951) 680-1500 to facilitate entry to the building.

#### FOR FURTHER INFORMATION CONTACT:

Armando Gonzalez-Caban, Pacific Southwest Research Station, USDA Forest Service, (951) 680-1525. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 twenty-four hours a day, every day of the year, including holidays.

#### SUPPLEMENTARY INFORMATION:

*Title:* Public Support for Fuel Reduction Policies: Multimedia versus Printed Materials.

*OMB Number:* 0596-New.

*Expiration date of approval:* N/A.

*Type of request:* New.

**Abstract:** This information collection is being undertaken to solicit information on public support of two fuel reduction programs: prescribed burning and mechanical treatment. Researchers will evaluate the responses of California and Montana residents to different scenarios related to fire hazard reduction programs, determine how effective residents think the programs are, and calculate how much residents would be willing to pay to implement the alternatives presented to them.

The results of the survey will allow researchers to provide better information to natural resource, forest, and fire managers when they are contemplating the kind and type of fire hazard reduction program to implement to achieve forestland management planning objectives. In addition, the survey will assist forest and fire managers in developing educational and outreach material for forest homeowners, schools, public meetings, and State and Private Forestry extension programs.

To gather the information, a stratified random sample of California and Montana residents will be contacted by telephone through a random-digit dialing process. Those contacts who agree to participate in the study will be asked an introductory set of questions to determine their pre-existing knowledge of fuels reduction treatments. The respondents will be informed that a more in-depth, self-administered video questionnaire will be mailed to them. Upon receipt of the video, participants will also be asked to watch the videotape; answer questions on the attached answer sheet; and return the answer sheet to the Forest Service researchers in a postage-paid, pre-addressed envelope included with the initial mailing. After two weeks, a reminder post card will be sent to all participants who have not responded. A week later, a second, duplicate videotape will be sent to all participants who have not responded. After resending the duplicate video, no additional contact will take place with participants.

The information will be collected by a university research survey center and will be analyzed by a Forest Service researcher and a researcher at a cooperating university who are experienced in applied economic nonmarket valuation research and survey research.

At present the Forest Service, Bureau of Land Management, Bureau of Indian Affairs, National Park Service, Fish and Wildlife Service, and many State

agencies with fire protection responsibilities are planning to embark on an ambitious and costly fuels reduction program for fire risk reduction without a clear understanding of the public's opinion on which treatments are most effective or even desirable. Information collected in this research will help natural resource and fire managers to better understand the public's opinions on fuels reduction activities and what type of media could be more effective in conveying information to the public.

*Estimate of Annual Burden:* 30 minutes.

*Type of Respondents:* Stratified random sample of heads of households.

*Estimated Annual Number of Respondents:* 1000.

*Estimated Annual Number of Responses per Respondent:* 1.

*Estimated Total Annual Burden on Respondents:* 500 hours.

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the function of the agency, including whether the information will have practical or scientific utility; (2) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request toward Office of Management and Budget approval.

Dated: February 8, 2005.

## DEPARTMENT OF AGRICULTURE

### Forest Service

#### Information Collection; Request for Comments; Hispanic Perceptions and Uses of the Urban Forest

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations regarding the new information collection entitled, "Hispanic Perceptions and Uses of the Urban Forest."

**DATES:** Comments must be received in writing on or before April 19, 2005, to be assured of consideration. Comments received after that date will be considered to the extent practicable.

**ADDRESSES:** Comments concerning this notice should be addressed to Cassandra Johnson, Forestry Sciences Laboratory, Forest Service, USDA, 320 Green St., Athens, GA 30602-2044.

Comments also may be submitted to Cassandra Johnson via facsimile to (706) 559-4266 or by e-mail to [cjohnson09@fs.fed.us](mailto:cjohnson09@fs.fed.us).

The public may inspect comments received at the Forestry Sciences Laboratory, Forest Service, USDA, 320 Green St., Athens, Georgia, during normal business hours. Visitors are encouraged to call ahead to (706) 559-4222 to facilitate entry to the building.

**FOR FURTHER INFORMATION CONTACT:**

Cassandra Johnson, Forestry Sciences Laboratory, at (706) 559-4270.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 twenty-four hours a day, every day of the year, including holidays.

**SUPPLEMENTARY INFORMATION:**

*Title:* Hispanic Perceptions and Uses of the Urban Forest.

*OMB Number:* 0596-New.

*Expiration Date of Approval:* N/A.

*Type of Request:* New.

*Abstract:* Within the past 20 years, Hispanics have either immigrated or migrated to the southeastern United States, excluding Florida, in unprecedented numbers. In the 10-year period from 1990 to 2000, the Hispanic population of Hall County in northeast Georgia increased by almost 5 times, from 4 percent in 1990 to 19.6 percent in 2000. Recent studies have examined Hispanic employment, housing, and education in parts of the South where Hispanics are relatively new arrivals; however, there are virtually no investigations of Hispanic interactions with urban green spaces in this area.

Hispanic use of outdoor environments in the South is an important consideration for the Forest Service because of the impact of a growing population on the region's finite natural resources. Urbanization, propelled by an increase in the population, is one of the most significant contributors to forest

fragmentation in the South. Relatively little is known about how Hispanics, one of the largest growing groups, perceive and use urban and community forests.

Federal statutes which authorize this information collection include the Food, Agriculture, Conservation, and Trade Act of 1990; Executive Order 12898 (1994) relating to environmental justice; and the National Environmental Policy Act of 1969.

The study area for this information collection is located within the city of Gainesville, Georgia. Gainesville has a population of approximately 25,000 and is located in Hall County with a population of 156,000 in northeast Georgia. In 2000, Hispanics accounted for about 20 percent of the Hall County population and 33 percent of Gainesville's population. The population of interest for this information collection is Hispanic residents who live within Census Tract 11, located within the city of Gainesville. This area encompasses 3.70 square miles. Residential areas in Census Tract 11 include apartment complexes and single family homes.

The total population for Census Tract 11 is 9,170, of which 6,307 are Hispanic. This census tract was chosen because of the high proportion (68.8 percent) of Hispanic residents. The proportion of Hispanics over 18 in the census tract is 64 percent. Fifty-eight percent of the residents are foreign-born. The majority of the foreign-born population within this census tract came to the United States between 1990 and 2000. Census Tract 11 contains 5 census Block Groups. The proportion of Hispanics in each of these block groups ranges from 35 to 84 percent.

This study will provide both basic and applied research for the Forest Service's Urban and Community Forestry program. Results will enable the Forest Service to better understand the types of tree coverage and green spaces preferred by recent Hispanic immigrants and migrants to Gainesville, Georgia. Little information exists on the environmental preferences of racial and ethnic minorities in urban areas regarding preferences for tree coverage, layout, and design. Urban foresters have made specific requests for information about urban, ethnic populations in Georgia and how urban forests are perceived.

The proposed study relates to the Forest Service's national Urban and Community Forestry program (U&CF) which focuses on community involvement with the urban forest. The U&CF program provides funding for community cost-share grants, state

technical assistance, the National Urban and Community Forest grants (NUCFAC), and Tree City USA (Pub. L. 101-624, Title XII, Section 1219; Walker, 2003). The Forest Service recognizes that research is an important component of urban and community forestry. Research focusing on public perception and use of urban forests provides a vital link between urban constituents and communities and the Forest Service. Research questions focus on:

1. The perceptions Hispanics have of trees and other green space outside their homes;
2. The kinds of trees Hispanics prefer, such as oak, pine, sycamore;
3. The ways Hispanics use yard space; and
4. The perceptions Hispanics have of trees and other green space in their neighborhoods.

Urban and community forest advocates nationwide have established the following goals with respect to increasing involvement of ethnic and racial minorities and underserved populations in Urban and Community Forestry programs:

- Educate minority sectors in the care and stewardship of urban forests where they live, work, and play.
- Create a strong network of minority communities, non-profit organizations, Federal agencies, and private industries to better target the needs of these communities.
- Provide educational and career opportunity information to low income and chronically disadvantaged groups in the area of urban and community forestry.
- Discuss and document strategies by which urban and community forestry programs can increase the quality of life in minority communities.

The first phase of the data collection will involve interviews with a key community contact from the Hispanic community in Gainesville. A graduate student from the University of Georgia Department of Geography will work with Forest Service research personnel to interview this individual. The key contact will be familiar with the lifestyle, socioeconomic, employment, and educational status of Hispanics in Gainesville.

The second phase of the data collection will involve a random sample of Hispanic residents from Census Tract 11. This data collection consists of one-on-one, face-to-face interviews with randomly selected Hispanic residents from Census Tract 11. Residents 18 and over will be asked to respond to the survey. The interviews will take place at the respondent's home or at a location

agreed upon by the interviewer and the respondent.

A list of potential respondent addresses and telephone numbers will be purchased from Survey Sampling, Inc. located in Fairfield, Connecticut. The key community contact will publicize the information collection through his or her contacts in the community and via word of mouth.

Interviewers will send letters to potential respondents explaining the survey and the dates on which the interviewer will conduct field interviews. Follow-up phone calls will be made to help ensure potential respondents are aware of the information collection and the dates on which the interviewer will conduct the survey. The survey instrument will be translated into Spanish. Respondents will have a choice of responding in Spanish or English. The graduate student interviewer is fluent in both English and Spanish.

The number of respondents comprising the sample size is based on an estimate of the Hispanic population in Gainesville. Based on census figures, we know that approximately 64 percent of the population is comprised of Hispanics 18 years of age or older. The sample size calculation assumes a 5 percent margin of error and the 95 percent confidence level. Sample size is based on the following equation:  

$$n = 4P*Q/.0025$$

Where n = sample size, P = proportion of population with the characteristic, i.e., percent Hispanic; Q = proportion of population without the characteristic, i.e., not Hispanic. The sample size is calculated at 368 ( $n = 4*.64*.36/.0025$ ). The resulting calculation is rounded down to 300 because of logistical limitations associated with collecting door-to-door interviews.

Forest Service managers would use this information to develop outreach strategies designed to encourage greater Hispanic participation in urban forest stewardship. Specifically, this involves developing programs to promote volunteerism and community participation. In cooperation with state forestry agencies and municipal parks agencies, the Forest Service will provide technical advice to communities to ensure that urban green projects are environmentally feasible.

Tabulation and analysis of the quantitative data will be performed by researchers with the Forest Service in Athens, Georgia, and the University of Georgia geography department. Statistical analyses include means difference tests, Chi-square tests, and multivariate regression. Journal articles

will be drafted to report the more significant methodological or theoretical findings.

If the information proposed herein is not collected, data concerning Hispanic perception and use of the urban forest will not be available to the Forest Service. The resources specified in this proposal are not federally managed. However, federal resources and programs provide partial support for their continuance.

The agency is committed to encouraging more participation in tree stewardship by urban communities, including minority and ethnically diverse populations. In order to achieve this goal, the agency must have better information on how specific groups interact with the urban forest.

*Estimate of Annual Burden:* 15 minutes.

*Type of Respondents:* Hispanic residents in Gainesville, Georgia.

*Estimated Annual Number of Respondents:* 300.

*Estimated Annual Number of Responses per Respondent:* 1.

*Estimated Total Annual Burden on Respondents:* 75 hours.

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the agency, including whether the information will have practical or scientific utility; (2) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

#### Use of Comments

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission requesting Office of Management and Budget approval.

Dated: January 25, 2005.

### Forest Service

#### Eastern Idaho Resource Advisory Committee Caribou-Targhee National Forest, Idaho Falls, ID

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of meeting.

**SUMMARY:** Pursuant to the authorities in the Federal Advisory Committee Act (Pub. L. 92-463) and under the Secure Rural Schools and Community Self-Determination Act of 2000 (Pub. L. 106-393) the Caribou-Targhee National Forests' Eastern Idaho Resource Advisory Committee will meet Thursday, March 29, 2005 in Idaho Falls for a business meeting. The meeting is open to the public.

**DATES:** The business meeting will be held on March 29, 2005 from 10 a.m. to 2 p.m.

**ADDRESSES:** The meeting location is the Caribou-Targhee National Forest Headquarters Office, 1405 Hollipark Drive, Idaho Falls, Idaho 83402.

**FOR FURTHER INFORMATION CONTACT:** Jerry Reese, Caribou-Targhee National Forest Supervisor and Designated Federal Officer, at (208) 524-7500.

**SUPPLEMENTARY INFORMATION:** The business meeting on March 29, 2005, begins at 10 a.m., at the Caribou-Targhee National Forest Headquarters Office, 1405 Hollipark Drive, Idaho Falls, Idaho. Agenda topics will include listening to presentations from those projects who have been invited back for the second round of project proposals for the 2005 fiscal year and making a decision on projects to fund.

Dated: February 11, 2005.

**Jerry B. Reese,**

*Caribou-Targhee Forest Supervisor.*

## COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

### Procurement List; Proposed Additions

**AGENCY:** Committee for Purchase from People Who Are Blind or Severely Disabled.

**ACTION:** Proposed additions to procurement list.

**SUMMARY:** The Committee is proposing to add to the Procurement List products to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.
