**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

The International Trade Administration (ITA) sponsors approximately 120 overseas trade fair events each fiscal year. Trade fairs involve U.S. firms exhibiting their goods and services at American pavilions at internationally recognized events worldwide. The Product Characteristics—Design Check-Off List seeks from participating U.S. firms information on the physical nature, power (utility) and graphic requirements of the products and services to be displayed, in order to ensure the availability of utilities for active product demonstrations. This form also allows U.S. firms to identify special installation requirements that can be critical to the proper placement and hookup of their equipment and/or graphics. Without the timely and accurate submission of the Form ITA-426P, Product Characteristics—Design Check-Off Lists, ITA would be unable to provide a pavilion facility that would effectively support the sales/marketing and presentation objectives of the U.S. participants. Without such support, program productivity and utility would diminish, and declining program participation in this type of ITA activity by U.S. firms would result.

**II. Method of Data Collection**

Form ITA-426P is sent by request to U.S. firms. Responding firms complete the form and forward it to the Department of Commerce project officer several weeks prior to the beginning of the event.

**III. Data**

*OMB Number:* 0625-0035.

*Form Number:* ITA-426P.

*Type of Review:* Regular Submission.

**IV. Request for Comments**

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and costs) of the

#### Notice of Amended Preliminary Antidumping Duty Determination of Sales at Less Than Fair Value: Chlorinated Isocyanurates From the People's Republic of China

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**EFFECTIVE DATE:** February 24, 2005.

**FOR FURTHER INFORMATION CONTACT:** Cindy Robinson or Brian C. Smith, AD/CVD Operations, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-3797, or (202) 482-1766, respectively.

**SUMMARY:** The Department of Commerce ("the Department") is amending the weighted-average dumping margin listed in the *Preliminary Determination* for the mandatory respondent Hebei Jiheng Chemical Co., Ltd. ("Jiheng") and for the Section A Respondents.<sup>1</sup> See *Notice of Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination: Chlorinated Isocyanurates from the People's Republic of China*, 69 FR 75293 (December 16, 2004) ("*Preliminary Determination*"). The Department finds that it made ministerial errors in the calculations for Jiheng, and that the correction of all errors alleged by Jiheng fulfills the requirement of a significant ministerial error within the meaning of 19 CFR 351.224(e). Therefore, the rate assigned to the Section A respondents also changes.

#### Scope of the Investigation

The products covered by this investigation are chlorinated isocyanurates. Chlorinated isocyanurates are derivatives of cyanuric acid, described as chlorinated s-triazine triones. There are three primary chemical compositions of chlorinated isocyanurates: (1) trichloroisocyanuric acid (Cl<sub>3</sub>(NCO)<sub>3</sub>), (2) sodium dichloroisocyanurate (dihydrate) (NaCl<sub>2</sub>(NCO)<sub>3</sub> • 2H<sub>2</sub>O), and (3) sodium dichloroisocyanurate

(anhydrous) (NaCl<sub>2</sub>(NCO)<sub>3</sub>). Chlorinated isocyanurates are available in powder, granular, and tableted forms. This investigation covers all chlorinated isocyanurates.

Chlorinated isocyanurates are currently classifiable under subheadings 2933.69.6015 and 2933.69.6021 of the Harmonized Tariff Schedule of the United States ("HTSUS").<sup>2</sup> This tariff classification represent a basket category that includes chlorinated isocyanurates and other compounds including an unfused triazine ring. Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Arch's patented chlorinated isocyanurates tablet is also included in the scope of this investigation. See *Preliminary Determination*.

#### Background

On December 10, 2004, the Department preliminarily determined that chlorinated isocyanurates from the People's Republic of China ("PRC") are being, or are likely to be, sold in the United States at less than fair value ("LTFV"), as provided in section 733(a) of the Tariff Act of 1930, as amended ("the Act"). See *Preliminary Determination*, 69 FR at 75293.

On December 20, 2004, Jiheng and Nanning Chemical Industry Co., Ltd. Corporation ("Nanning") (collectively referred to as the "mandatory respondents") timely filed allegations that the Department made ministerial errors in its *Preliminary Determination*.

The petitioners, Clearon Corporation and Occidental Chemical Corporation, did not file ministerial error allegations.

On January 24, 2005, the Department, after a review of the allegations filed by Jiheng and Nanning, determined that Jiheng's alleged clerical errors, when corrected, were not significant in

<sup>2</sup> In the scope section of the Department's initiation and in its preliminary determination notices, chlorinated isocyanurates were classified under subheading 2933.69.6050 of the HTSUS. (See *Initiation of Antidumping Duty Investigations: Chlorinated Isocyanurates From the People's Republic of China and Spain*, 69 FR 32,488 (June 10, 2004), and *Preliminary Determination*, Effective January 1, 2005, chlorinated isocyanurates are currently classifiable under subheadings 2933.69.6015 and 2933.69.6021 of the HTSUS. The new subheading 2933.69.6015 covers sodium dichloroisocyanurates (anhydrous & dihydrate forms) and trichloroisocyanuric acid, and subheading 2933.69.6021 covers all other chlorinated isos used as pesticides (bactericides). The old subheading 2933.69.6050 covers all other chlorinated isos not used as pesticides. See *Memorandum to James Doyle, Office 9, dated February 16, 2005, from Tom Futtner, Liaison w/ Customs, Customs Unit, regarding Request for HTS Number Update(s) to AD/CVD Module Chlorinated Isos (A-570-898)*.

<sup>1</sup> The Section A Respondents include the following companies: Liaocheng Huao Chemical Industry Co., Ltd. ("Huao"); Shanghai Tian Yuan International Trading Co., Ltd. ("Tian Yuan"); and Changzhou Clean Chemical Co., Ltd. ("Clean Chemical"); Sinochem Hebei Import & Export Corporation ("Sinochem Hebei"); and Sinochem Shanghai Import & Export Corporation ("Sinochem Shanghai").
