

high exposure activities. The following mitigation addresses the risks of concern for high exposure activities associated with apples and sod:

- Cancellation of all turf applications for turf grown for sale or other commercial use such as sod.
- Cancellation of all apple uses.

The ecological risk assessment for birds shows risks for reproductive effects to birds. There is a chronic effect to mammals including endangered species. The Agency's assessment suggested that a number of endangered species may potentially be impacted by thiram; however, this RED includes only risk mitigation for the Attwater's Prairie Chicken (*Tympanuchus cupido attwateri*). The RED outlines mitigation measures that address the Agency's ecological risks of concern.

EPA must review tolerances and tolerance exemptions that were in effect when the Food Quality Protection Act (FQPA) was enacted in August 1996, to ensure that these existing pesticide residue limits for food and feed commodities meet the safety standard established by the new law. Tolerances are considered reassessed once the safety finding has been made or a revocation occurs. EPA has reviewed and made the requisite safety finding for the thiram tolerances included in this notice.

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** of May 14, 2004 (69 FR 26819) (FRL-7357-9), explains that in conducting these programs, EPA is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of issues, and degree of public concern associated with each pesticide. Due to its uses, risks, and other factors, thiram was reviewed through the full 6-phase public participation process. Through this process, EPA worked extensively with stakeholders and the public to reach the regulatory decisions for thiram. Tolerances for residues in/on food and feed commodities are currently expressed in terms of residues of thiram (40 CFR 180.132) per se and are established at 7 parts per million for apples, peaches, and strawberries. Seed treatments are considered to be non-food uses and therefore do not require a tolerance.

The reregistration program is being conducted under congressionally mandated time frames, and EPA recognizes the need both to make timely

decisions and to involve the public. All issues related to this pesticide were resolved through consultations with stakeholders. The Agency therefore is issuing the Thiram RED without a comment period.

#### *B. What is the Agency's Authority for Taking this Action?*

Section 4(g)(2) of FIFRA as amended, directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."

Section 408(q) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA. This review is to be completed by August 3, 2006.
