Centers for Disease Control and Prevention

Enhancing Healthcare Provider's Ability To Prevent Sexual Violence

Announcement Type: New.
Funding Opportunity Number: RFA 05040.

Catalog of Federal Domestic Assistance Number: 93.136.

Key Dates:

Letter of Intent Deadline: April 4, 2005.

Application Deadline: May 3, 2005.

I. Funding Opportunity Description

Authority: This program is authorized under section 391(a)(1) and (2) of the Public Health Service Act and, 42 U.S.C. 280b(a)(1) and (2) and Section 393 of the Public Health Service Act, 42 U.S.C. 280b-1a.

Background: The Centers for Disease Control and Prevention (CDC) is collaborating with its partners to better address sexual violence prevention within the health care sector. CDC and its partners have been discussing strategies for incorporating more of a health care focus into existing Sexual Assault Awareness Month (SAAM) activities. SAAM, held each year in April, is an opportunity to engage providers and raise awareness about the devastating effects of sexual violence. CDC is interested in a variety of topics, including the impact of sexual violence on public health, the role of health care providers, and the importance of prevention. The agency is in the process of creating a five-year strategic plan for how SAAM activities can be used as a catalyst for addressing sexual violence prevention in the health care sector. All recommended activities will complement those already developed by partner organizations for advocates and the general public.

Purpose: The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2005 cooperative agreement funds to expand the capacity of national professional organizations to address the topic of sexual violence prevention within their constituency of licensed healthcare providers.

The purpose of this funding is to support the creation of education and support materials that address sexual violence prevention within an organization that regularly provides professional development opportunities to its constituents. The products will foster the knowledge, skills, and abilities necessary for licensed healthcare providers to address sexual violence prevention in their practices.

Research suggests that sexual violence is characterized by risk and protective factors across multiple domains of influence, as represented by the ecological model presented in the World Report on Violence and Health (Krug, *et al.*, 2002). The domains of influence include individual, relationship, community, and society. Sexual
