AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are amending the Oriental fruit fly regulations by removing a portion of Los Angeles County, CA, from the list of quarantined areas and by removing restrictions on the interstate movement of regulated articles from this area. This action is necessary to relieve restrictions that are no longer needed to prevent the spread of the Oriental fruit fly into noninfested areas of the United States. We have determined that the Oriental fruit fly has been eradicated from this portion of Los Angeles County, CA, and that the quarantine and restrictions are no longer necessary.

SUPPLEMENTARY INFORMATION:

Background

The Oriental fruit fly, *Bactrocera dorsalis* (Hendel), is a destructive pest of citrus and other types of fruit, nuts, vegetables, and berries. The short life cycle of the Oriental fruit fly allows rapid development of serious outbreaks, which can cause severe economic losses. Heavy infestations can cause complete loss of crops.

The Oriental fruit fly regulations, contained in 7 CFR 301.93 through 301.93–10 (referred to below as the regulations), were established to prevent the spread of the Oriental fruit fly into noninfested areas of the United States. The regulations also designate soil and a large number of fruits, nuts, vegetables, and berries as regulated articles.

In an interim rule effective on November 9, 2004, and published in the **Federal Register** on November 16, 2004 (69 FR 67041–67042, Docket No. 04–106–1), we quarantined a portion of Los Angeles County, CA, and restricted the interstate movement of regulated articles from the quarantined area.

Based on trapping surveys conducted by inspectors of California State and county agencies and by inspectors of the Animal and Plant Health Inspection Service, we have determined that the Oriental fruit fly has been eradicated from the quarantined portion of Los Angeles County. The last finding of Oriental fruit fly in this quarantined area was August 30, 2004.

Since then, no evidence of Oriental fruit fly infestation has been found in this area. Based on our experience, we have determined that sufficient time has passed without finding additional flies or other evidence of infestation to conclude that the Oriental fruit fly no longer exists in Los Angeles County, CA. Therefore, we are removing the entry for this county from the list of quarantined areas in § 301.93–3(c).

Immediate Action

Immediate action is warranted to relieve restrictions that are no longer necessary. A portion of Los Angeles County, CA, was quarantined due to the possibility that the Oriental fruit fly could spread from this area to noninfested areas of the United States. Since we have concluded that the Oriental fruit fly no longer exists in this county, immediate action is warranted to remove the quarantine on Los Angeles County, CA, and to relieve the restrictions on the interstate movement of regulated articles from this area. Under these circumstances, the Administrator has determined that prior notice and opportunity for public comment are contrary to the public interest and that there is good cause under 5 U.S.C. 553 for making this action effective less than 30 days after publication in the **Federal Register**.

We will consider comments we receive during the comment period for this interim rule (see **DATES** above). After the comment period closes, we will publish another document in the **Federal Register**. The document will include a discussion of any comments we receive and any amendments we are making to the rule.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review under Executive Order 12866.

This action amends the Oriental fruit fly regulations by removing a portion of Los Angeles County, CA, from the list of quarantined areas.

County records indicate there are approximately 23 nurseries, 27 farmers markets, 4 certified growers, 3 mobile vendors, and 152 fruit sellers within the quarantined portion of Los Angeles County that could be affected by the lifting of the quarantine in this interim rule.

We expect that the effect of this interim rule on the small entities referred to above will be minimal. Small entities located within the quarantined area that sell regulated articles do so primarily for local intrastate, not interstate, movement, so the effect, if any, of this rule on these entities appears likely to be minimal. In addition, the effect on any small entities that may move regulated articles interstate has been minimized during the quarantine period by the availability of various treatments that allow these small entities, in most cases, to move regulated articles interstate with very little additional cost. Thus, just as the previous interim rule establishing the quarantined area in Los Angeles County, CA, had little effect on the small entities in the area, the lifting of the quarantine in the current interim rule will also have little effect.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

This rule has been reviewed under executive Order 12988, Civil Justice Reform.
