

certificated in any category; equipped with General Electric and Pratt and Whitney engines; as identified in Boeing Service Bulletin 767-54-0107, Revision 1, dated December 18, 2003.

#### Unsafe Condition

(d) This AD was prompted by discovery during production that a section of vapor barrier seal was missing from the spar web cavities of the upper aft struts of both wings. We are issuing this AD to prevent flammable fluids from leaking onto parts of a hot exhaust system of a shut-down engine of an airplane on the ground, which could result in ignition of the flammable fluids and an uncontained fire. This could also lead to an emergency evacuation of the airplane and possible injury to passengers.

#### Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

#### Installation of Seal

(f) Within 60 months after the effective date of this AD, replace the inboard fairing seal common to the vapor barrier seal of each strut assembly with a new inboard fairing seal in accordance with the Accomplishment Instructions of Boeing Service Bulletin 767-54-0107, Revision 1, dated December 18, 2003.

#### Seal Installations Accomplished Per Previous Issue of Service Bulletin

(g) Seal installations accomplished in accordance with the Accomplishment Instructions of Boeing Service Bulletin 767-54-0107, dated January 16, 2003, are considered acceptable for compliance with the corresponding action specified in this AD.

#### Alternative Methods of Compliance (AMOCs)

(h) The Manager, Seattle Aircraft Certification Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19.

#### Material Incorporated by Reference

(i) You must use Boeing Service Bulletin 767-54-0107, Revision 1, dated December 18, 2003, to perform the actions that are required by this AD, unless the AD specifies otherwise. The Director of the Federal Register approves the incorporation by reference of this document in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. For copies of the service information, contact Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124 2207. **Higher Education Programs**

**AGENCY:** Office of Postsecondary Education, Department of Education.

**ACTION:** Final regulations.

**SUMMARY:** These final regulations remove all references to points in the selection criteria the Department of Education (Department) uses to evaluate applications submitted under the higher education discretionary grant programs. We are taking this action because the current point assignments are outdated and do not permit sufficient flexibility to establish important program objectives. Taking this action allows us that flexibility and ensures that grant awards are made to high quality applicants.

The final regulations also remove the requirement that in competitions for grants under the Partnership and Teacher-Recruitment components of the Teacher Quality Enhancement Grants Program, the Secretary hold a two-stage competition in which applicants must submit a pre-application and a full application. The current structure did not prove effective in producing high quality applications for this program. Removing the requirement for a pre-application reduces burden on applicants and the Department and allows both to target their resources on the full application stage.

There are some amendments in these final regulations that are purely technical corrections to the regulations.

**DATES:** These regulations are effective April 20, 2005.
