## DEPARTMENT OF ENERGY

#### Federal Energy Regulatory Commission

[Docket No. ER05-428-000]

#### New York Independent System Operator, Inc.; Notice of Agenda for Staff Technical Conference

March 17, 2005.

As announced in a Notice of Technical Conference issued on March 10, 2005, in the above-captioned proceeding, the Commission's staff will conduct a technical conference to be held on Monday, March 21, 2005, at 10 a.m. (EST) and, if necessary, on Tuesday, March 22, 2005, at the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The March 21, 2005 conference will be held in the Commission Meeting Room. Attached is the agenda for the conference.

We will accept written statements from speakers at the conference that may wish to supplement their oral statements, or from any other party attending the conference.

#### Magalie R. Salas,

# Secretary.

### Attachment

Agenda for Technical Conference on Parameters for NYISO's Installed Capacity Requirement Demand Curve

March 21, 2005—Agenda

### **Opening Statements**

Panel 1: Costs of Peakers

Panelists:

- Belinda Thornton, NYISO
- John Charlton, NYISO
- Seth Parker, Levitan Associates
- Ray Kinney, NYSEG
- Norman Mah, Consolidated Edison
- Jonathan Wallach, City of New York
- Jeff Hogan, New York State
- Department of Public ServiceMichael B. Mager, Multiple
- Intervenors
- Glenn D. Haake, IPPNY
- Mark Younger, IPPNY (addressing the following specific issues):
- 1. Accuracy/Appropriateness of Peaking Unit Characteristics

• Are the operating characteristics of the assumed peaking units (the 7FA and LM6000) used by Levitan reasonable? If not, what are reasonable operating characteristics?

• Is the ability of these units to participate in ancillary services and day-ahead markets, particularly given their environmental permits, important in determining the parameters of the demand curve?

2. Peaking Unit Costs

Are the capital cost assumptions and financing periods used in the Levitan analysis reasonable? If not, what assumptions are reasonable?
3. Local Siting Costs and Constraints

• Should local costs and constraints be included in development of costs for a representative peaking unit?

• Are Keyspan-Ravenswood's points concerning local siting issues, such as fixed gas transportation costs and local property taxes, correct?

#### Lunch Break

Panel 2: Revenue Offset

Panelists:

- David Patton, Ph.D., Potomac Economics
- Seth Parker, Levitan Associates
- Ray Kinney, NYSEG
- Norman Mah, Consolidated Edison
- Jonathan Wallach, City of New York
- Mark Reeder, New York State
   Department of Public Service
- Mark Younger, IPPNY
- Doreen Unis Saia, Mirant
- Madison Milhous, KeySpan Energy Supply
- Ron Norman, PA Consulting Group (addressing the following specific issues):
- 4. Load Shapes

• Does the 2002 load shape used in the Levitan analysis represent normal weather? If not, what load shape does represent normal weather? 5. Modeling Assumptions

• Is it necessary to reflect recent new capacity additions in NYCA in the modeling of future net revenues? 6. Scarcity Component

• Should the NYISO have included an adjustment for the scarcity component in their derivation of the Annual Reference Value, and if so, what adjustment is reasonable?

• What were the assumptions used to develop the scarcity component?

• Are the assumptions consistent with the Levitan analysis?

7. Impact on Demand Curve Parameters
How do you reflect potential

interdependencies between different assumptions?

8. Is it reasonable to include an adjustment reflecting winter and summer capacity levels in the Annual Reference Value for NYCA Demand Curve? Is it reasonable to not include a similar adjustment for the New York City Demand Curve?

Panel 3: Zero Crossing Point

Panelists:

 David Patton, Ph.D., Potomac Economics

- Belinda Thornton, NYISO
- John Charlton, NYISO
- Jonathan Wallach, City of New York
- Glenn D. Haake, IPPNY
- C Thomas Paynter, New York State Department of Public Service
- Kevin Jones LIPA

(addressing the following specific issue):

9. Should the Zero Crossing Point be changed? If so, what should be the Zero Crossing Point, and why?

Adjourn (after deciding whether additional session on Tuesday, March 22 is needed).

#### ENVIRONMENTAL PROTECTION AGENCY

[OPPT-2005-0009; FRL-7701-1]

#### TSCA Section 5(a)(2) Significant New Use Rules for Existing Chemicals; Request for Comment on Renewal of Information Collection Activities

**AGENCY:** Environmental Protection Agency (EPA).

ACTION: Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (PRA) (44 U.S.C 3501 *et seq.*) EPA is seeking public comment on the following Information Collection Request (ICR): Toxic Substances Control Act (TSCA) Section 5(a)(2) Significant New Use Rules for Existing Chemicals (EPA ICR No. 1188.08, OMB Control No. 2070-0038). This ICR involves a collection activity that is currently approved and scheduled to expire on January 31, 2006. The information collected under this ICR relates to the requirement that persons notify EPA at least 90 days before they manufacture, import, or process a chemical substance for a significant new use, as defined by TSCA section 5. The ICR describes the nature of the information collection activity and its expected burden and costs. Before submitting this ICR to the Office of Management and Budget (OMB) for review and approval under the PRA, EPA is soliciting comments on specific aspects of the collection.

**DATES:** Written comments, identified by the docket identification (ID) number OPPT–2005–0009, must be received on or before June 21, 2005.

**ADDRESSES:** Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in Unit I. of the **SUPPLEMENTARY INFORMATION**.
