

Services has funded a Coordinating Center to Support State Incentive Grants to Build Capacity for Alternatives to Restraint and Seclusion. The grants are designed to promote the implementation and evaluation of best practice approaches to reducing the use of restraint and seclusion in mental health facilities. Grantees consist of 8 sites (state mental health agencies), most of which will be implementing interventions in multiple facilities (a total of 76 facilities). These include facilities serving adults and those serving children and/or adolescents, with various subgroups such as forensic and sexual offender populations.

With input from multiple experts in the field of restraint and seclusion and alternatives to restraint and seclusion, the project created a common core of data collection instruments that will be used for this cross-site project. The facilities will complete four different instruments: (1) Facility/Program Characteristics Inventory (information about type of facilities, characteristics of persons served, staffing patterns, and unit specific data); (2) Inventory of Seclusion and Restraint Reduction Interventions; (3) Treatment Episode Data (admission data for all clients/patients); and (4) Event Data (data about the use of restraint and seclusion). Data

will be submitted by the sites electronically via a secured Web site. The Facility/Program Characteristic Inventory and Inventory of Seclusion and Restraint Reduction Intervention will be collected annually. The Treatment Episode Data and Event Data will be collected monthly.

The resulting data will help to identify the: (1) Number of programs adopting best practices involving alternative approaches to restraint and seclusion; and (2) program's impact of reducing restraint and seclusion use and adoption of alternative practices. The estimated annual response burden to collect this information is as follows:

Instrument	Number of respondents	Responses/ respondent	Burden/response (hours)	Annual burden (hours)
Facility/Program Characteristic Inventory	76	1	4	304
Inventory Of Seclusion And Restraint Reduction Interventions	76	1	2	152
Treatment Episode Data	76	12	8	7,296
Event Data	76	12	8	7,296
Total	76	15,048

Send comments to Summer King, SAMHSA Reports Clearance Officer, Room 7-1044, 1 Choke Cherry Road, Rockville, MD 20850. Written comments should be received by May 24, 2005.

Dated: March 21, 2005.

Anna Marsh,

Executive Officer, SAMHSA.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-4980-N-12]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

DATES: March 25, 2005.

FOR FURTHER INFORMATION CONTACT:

Kathy Ezzell, Department of Housing and Urban Development, Room 7262, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708-1234; TTY number for the hearing- and speech-impaired (202) 708-2565, (these telephone numbers are not toll-free), or

call the toll-free Title V information line at 1-800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 court order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.), HUD publishes a Notice, on a weekly basis, identifying unutilized, underutilized, excess and surplus Federal buildings and real property that HUD has reviewed for suitability for use to assist the homeless. Today's Notice is for the purpose of announcing that no additional properties have been determined suitable or unsuitable this week.

Dated: March 18, 2005.

Mark R. Johnston,

Director, Office of Special Needs Assistance Programs.

BILLING CODE 4210-29-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Information Collection Renewal Submitted to the Office of Management and Budget (OMB) for Approval Under the Paperwork Reduction Act; OMB Control Number 1018-0101; Monitoring Recovered Species After Delisting As Required Under Section 4(g) of the Endangered Species Act—American Peregrine Falcon

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: The American peregrine falcon was removed from the List of Endangered and Threatened Wildlife on August 25, 1999. Section 4(g) of the Endangered Species Act (ESA) requires that all species that are recovered and removed from the List of Endangered and Threatened Wildlife (delisted) be monitored in cooperation with the States for a period of not less than 5 years. The purpose of this requirement is to detect any failure of a recovered species to sustain itself without the protections of the ESA. We (Fish and Wildlife Service) have submitted the collection of information described below to OMB for renewal under the provisions of the Paperwork Reduction Act of 1995.

DATES: You must submit comments on or before April 25, 2005.

ADDRESSES: Send your comments on this information collection requirement

to the Desk Officer for the Department of the Interior at OMB-OIRA via fax at (202) 395-6566, or via e-mail at OIRA_DOCKET@omb.eop.gov. Also, please provide a copy of your comments to Hope Grey, Information Collection Clearance Officer, Fish and Wildlife Service, 4401 North Fairfax Drive, Mail Stop 222-ARLSQ, Arlington, Virginia 22203 (mail); (703) 358-2269 (fax); or Hope_Grey@fws.gov (e-mail).

FOR FURTHER INFORMATION CONTACT: To request a copy of the proposed information collection requirement, related forms, or explanatory material, contact Hope Grey at the above addresses or by telephone at (703) 358-2482.

SUPPLEMENTARY INFORMATION: OMB regulations at 5 CFR 1320, which implement provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (*see* 5 CFR 1320.8(d)). Currently we have approval from OMB to collect information on the American peregrine falcon under OMB control number 1018-0101. This approval expires on March 31, 2005. We have submitted a request to OMB to renew approval of the information collection included in the "Monitoring Plan for the American Peregrine Falcon: A Species Recovered under the Endangered Species Act" (Monitoring Plan) (USFWS 2003). The monitoring plan is available on our Web site at <http://endangered.fws.gov/recovery/peregrine/plan2003.pdf>. We are requesting a 3-year term of approval for this information collection. Federal agencies may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. OMB has up to 60 days to approve or disapprove our information collection request, but may respond after 30 days. Therefore, to ensure that your comments receive consideration, send all comments and suggestions to OMB by the date listed in the **DATES** section.

We published a 60-day notice on this information collection renewal in the **Federal Register** on January 3, 2005 (70 FR 101) inviting public comment. In

addition to publishing a **Federal Register** notice, we contacted seven non-Federal biologists who have used the forms previously and asked them to review each of the three forms associated with peregrine falcon monitoring and to comment on the clarity and relevance of the information collection, the burden associated with the collection, and whether there is something we could do to minimize the burden. We received a total of 10 comments, including three comments on the **Federal Register** notice.

We received one comment from an individual and comments from two States on the **Federal Register** notice. The individual did not express an opinion on the information collection itself, but took issue with the original delisting of peregrine falcons in 1999. One State supported the collection of American peregrine falcon monitoring data and stated that the information will have tremendous practical utility for both the State and the Service. That State supports the submission of forms via e-mail and also agreed with our burden estimates for completing the monitoring forms, but commented that the data collection itself could take more than 1 day. The other State commented that we should request OMB approval for the entire time frame needed for peregrine monitoring (until 2015) rather than submit several requests. This is not an option. By law, OMB can grant approval of information collections for a maximum of 3 years. That State was also concerned that, while the burden hours for completion of the forms was accurate, the Service does not account for the time necessary to locate, access, and monitor falcon eyries. The State recommended that we reevaluate the estimate of burden to incorporate these important aspects of monitoring and data collection. In response, we have included burden estimates for the time required to visit nest sites and record the data. The State also recommended that we account for the extra time it takes to collect contaminants samples. We did not include that estimate in the burden hours, because collecting contaminants samples is done opportunistically, in conjunction with some other activity at the nest site. It is rarely, if ever, the primary reason for visiting a nest. However, we have included the time it

takes to process the contaminants samples.

The comments we received from our outreach effort were generally favorable and included some helpful suggestions for improving the forms. The commenters estimated the burden hours for completing the monitoring forms to be less than the hours we previously estimated.

Post-delisting monitoring, required by the ESA, tracks population trends of recovered species. Data for American peregrine falcons are collected by and reported back to professional biologists and volunteers according to the monitoring plan. Contaminants monitoring is included as part of the post-delisting monitoring for peregrine falcons because they are sensitive to contaminants in the environment, and contaminants could cause population declines in the future. Contaminants monitoring involves collection of addled eggs found in nests and parts of feathers from nestlings.

The Regional Migratory Birds and Habitat Programs and the Endangered Species offices use the information provided in the three monitoring forms (3-2307, 3-2308, and 3-2309) to track measures of reproductive success and levels of contaminants in American peregrine falcons. The nest monitoring data is reported on a 3-year interval, after each monitoring year. The contaminants monitoring is opportunistic, with sample size goals to be reached every 5 years. The results of contaminants monitoring will be reported after each 5-year interval. If we do not collect this data, we could not satisfy our responsibilities under the delisting monitoring requirements of section 4(g) of the Endangered Species Act (ESA) (16 U.S.C. 1533g).

Title: Monitoring Recovered Species After Delisting As Required Under Section 4(g) of the Endangered Species Act—American Peregrine Falcon.

Approval Number: 1018-0101.

Form Numbers: 3-2307, 3-2308, and 3-2309.

Frequency of Collection: 3-2307 (every 3 years); 3-2308 and 3-2309 (annually).

Description of Respondents: Individuals, not-for-profit institutions, Federal Government, States, tribes, and local governments

Monitoring forms	Total annual responses	Average burden hours per respondent	Annual burden hours
3-2307—Nest Monitoring Form (filling out the form)	494	0.25	123.5
3-2307—Nest Monitoring Form (collecting the data)	10	4,940
3-2308—Egg Contaminant Sheet	12	1	12

Monitoring forms	Total annual responses	Average burden hours per respondent	Annual burden hours
3-2309—Feather Contaminant Sheet	12	.5	6
Total	518	5081.5

We again invite comments concerning this information collection on: (1) Whether or not the collection of information is necessary for the proper performance of monitoring of recovered species as prescribed in section 4(g) of the ESA, including whether or not the information will have practical utility; (2) the accuracy of our estimate of burden, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information for those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology; and (4) ways to minimize the burden of the collection of information on respondents. The information collections in this program will be part of a system of records covered by the Privacy Act (5 U.S.C. 552(a)).

Dated: March 21, 2005.

Hope Grey

*Information Collection Clearance Officer,
Fish and Wildlife Service.*

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK-930-5420-EU-L027; FF-094263]

Notice of Applications for Recordable Disclaimers of Interest for Lands Underlying Salcha River in Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The State of Alaska has filed an application for a recordable disclaimer of interest in certain lands underlying the Salcha River by the United States.

DATES: Comments on the State of Alaska's applications should be submitted on or before June 23, 2005. Interested parties may submit comments on the BLM Draft Navigability Reports on or before May 24, 2005.

ADDRESSES: Comments should be sent to the Chief, Branch of Lands and Realty, BLM Alaska State Office, 222 West 7th

Avenue, #13, Anchorage, Alaska 99513-7599.

FOR FURTHER INFORMATION CONTACT:

Callie Webber at (907) 271-3167 or Mike Brown at (907) 271-3602 or you may visit the BLM recordable disclaimer of interest Web site at <http://www.ak.blm.gov/>.

SUPPLEMENTARY INFORMATION: On May 12, 2004, the State of Alaska filed applications for recordable disclaimers of interest pursuant to Section 315 of the Federal Land Policy and Management Act and the regulations contained in 43 CFR subpart 1864 for lands underlying Salcha River (FF-094263). A recordable disclaimer of interest, if issued, will confirm the United States has no valid interest in the subject lands. The notice is intended to notify the public of the pending applications and the State's grounds for supporting it. The State asserts that this river is navigable; therefore, under the Equal Footing Doctrine and Submerged Lands Act of 1953, ownership of these lands underlying the rivers automatically passed from the United States to the State at the time of statehood in 1959.

The State's application (FF-094263) is for the bed of the Salcha River and all interconnecting sloughs between the ordinary high water lines of the left and right banks from origins within T. 3 N., R. 19 E., Fairbanks Meridian (FM), Alaska, downstream approximately 125 miles SW to confluence with the Tanana River at T. 5 S., R. 4 E., FM. The State did not identify any known adverse claimant or occupant of the affected lands.

A final decision on the merits of the applications will not be made before June 23, 2005. During the 90-day period, interested parties may comment upon the State's application, AA-085446, and supporting evidence. Interested parties may comment on the evidentiary evidence presented in the BLM's Draft Navigability Reports on or before May 24, 2005.

Comments, including names and street addresses of commenters, will be available for public review at the Alaska State Office (see address above), during regular business hours 7:30 a.m. to 4:30 p.m., Monday through Friday, except holidays. Individual respondents may request confidentiality. If you wish to

hold your name or address from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your comments. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses will be made available for public inspection in their entirety.

Dated: March 18, 2005.

Carolyn Spoon,

Chief, Branch of Lands and Realty.

Notice of Availability for the Emigrant Mine Project Plan of Operations Draft Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, 43 CFR part 3809, and the Federal Land Policy and Management Act (FLPMA), the Bureau of Land Management (BLM) Elko Field Office has prepared, with the assistance of a third-party contractor, a DEIS for the Newmont Mining Corporation's proposed Plan of Operations for the Emigrant Mine Project located in northeastern Nevada.

DATES: Written comments on the DEIS will be accepted for 60 days following the date the Environmental Protection Agency publishes the Notice of Availability in the **Federal Register**. An Open-House Public Meeting will be held at the Bureau of Land Management Elko Field Office at 3900 E. Idaho Street, Elko, Nevada. The date and time of this public meeting will be announced through public notices, media news releases and/or mailing. This meeting will be scheduled no sooner than 15 days following the publication of this notice.

ADDRESSES: Written comments may be sent to the Elko Field Office by any of the following methods: Mail: Send to
