

and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting:* At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multi-year award, you must submit an annual performance report that provides the most current performance and financial expenditure information as specified by the Secretary in 34 CFR 75.118. In addition, to satisfy the requirements of the priority in this notice, you must submit annual data on each scholar who receives grant support through this program.

4. *Performance Measures:* Under the Government Performance and Results Act (GPRA), the Department has established a set of performance measures that are designed to yield information on the effectiveness of the Personnel Preparation program. These measures include the extent to which scholars are successfully completing their program and the extent to which they are employed in the area(s) trained upon program completion.

If funded, applicants will be required to collect and report data on grant-supported scholars through the PPD Web site at <http://www.oespdpd.org> (see paragraph (b) under the *Absolute Priority* section of this notice).

Beyond the performance measures specifically described in this notice, the Department is also currently developing measures that will be designed to yield information on various aspects of program quality (e.g., the extent to which the curricula of training programs funded under this competition reflect the current knowledge base on effective practices; and the extent to which program graduates maintain employment for three or more years in the area(s) for which they were trained). Grantees will be asked to participate in assessing and providing information on program quality.

We will notify grantees of the performance measures once they are developed.

[Docket No. IC05-521-000; FERC-521]

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of proposed information collection and request for comments.

SUPPLEMENTARY INFORMATION: The information collected under the requirements of FERC-521 "Payments for Benefits from Headwater Benefits" (OMB No. 1902-0087) is used by the Commission to implement the statutory provisions of section 10(f) of the Federal Power Act (FPA) (16 U.S.C. 803). The FPA authorizes the Commission to determine headwater benefits received by downstream hydropower project owners. Headwater benefits are the additional energy production possible at a downstream hydropower project resulting from the regulation of river flows by an upstream storage reservoir.

When the Commission completes a study of a river basin, it determines headwater benefits charges that will be apportioned among the various downstream beneficiaries. A headwater benefits charge, and the cost incurred by the Commission to complete an evaluation are paid by downstream hydropower project owners. In essence, the owners of non-federal hydropower projects that directly benefit from a headwater(s) improvement must pay an

equitable portion of the annual charges for interest, maintenance, and depreciation of the headwater project to the U.S. Treasury. The regulations provide for apportionment of these costs between the headwater project and downstream projects based on downstream energy gains and propose equitable apportionment methodology that can be applied to all rivers basins in which headwater improvements are built. The data the Commission requires

owners of non-federal hydropower projects to file for determining annual charges is specified in 18 Code of Federal Regulations (CFR) part 11.

Action: The Commission is requesting a three-year extension of the current expiration date, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:

Number of respondents annually (1)	Number of responses per respondent (2)	Average burden hours per response (3)	Total annual burden hours (1)×(2)×(3)
3	1	40	120

Estimated cost burden to respondents is \$6,262.00. (120 hours/2080 hours per year times \$108,558 per year average per employee = \$ 6,263). The cost per respondent is \$191.00.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and

clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Linda Mitry,
Deputy Secretary.
