

provide specificity on operations over a full range of water conditions. Specificity on shortage and surplus and on deliveries to the United States and Mexico is needed in the Operating Criteria. This specificity would help in the development of the Annual Operating Plan each year. The Board finds the proposed changes acceptable and that the current review needs to be completed soon. Substantive changes should be included in the next review. The Board will also be providing written comments.

Response: See response to Comments No. 56 and 58.

Final Decision: After a careful review of all comments received, and after formal consultation with the Governor's representatives of the seven Basin States, tribal representatives, and interested parties and stakeholders, the Secretary of the Interior has made a number of limited modifications to the text of the Operating Criteria. However, in making those modifications, the Secretary found that in all other respects the Operating Criteria continue to meet the purpose and goals for which they were developed and the requirements of Section 602 of the 1968 Colorado River Basin Project Act. The Secretary believes that neither the structure, format, nor content of the Operating Criteria require significant revisions as a result of actual operating experience. The bases for the changes are: (1) Specific change in Federal law applicable to the Operating Criteria, (2) language in the current text of the Operating Criteria that is outdated, and (3) specific modifications to Article IV(b) of the Operating Criteria that reflect actual operating experience.

Dated: March 21, 2005.

Secretary, Department of the Interior.
