

superintendent of Natchez Trace Parkway has determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects recovered from Ackia Village, Alton's Chickasaw Village, Beldin's Ridge, the historic component of the Bynum Mounds site, and the Futorian Furniture Company site, and the Chickasaw Nation, Oklahoma.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the associated funerary objects should contact Wendell Simpson, Superintendent, Natchez Trace Parkway, 2680 Natchez Trace Parkway, Tupelo, MS 38804, telephone (662) 680-4005, before May 2, 2005. Repatriation of the associated funerary objects to the Chickasaw Nation, Oklahoma may proceed after that date if no additional claimants come forward.

Natchez Trace Parkway is responsible for notifying the Absentee-Shawnee Tribe of Indians of Oklahoma; Alabama-Coushatta Tribes of Texas; Alabama-Quassarte Tribal Town, Oklahoma; Cherokee Nation, Oklahoma; Chickasaw Nation, Oklahoma; Chitimacha Tribe of Louisiana; Choctaw Nation of Oklahoma; Eastern Band of Cherokee Indians of North Carolina; Eastern Shawnee Tribe of Oklahoma; Jena Band of Choctaw Indians, Louisiana; Kialegee Tribal Town, Oklahoma; Miccosukee Tribe of Indians of Florida; Mississippi Band of Choctaw Indians, Mississippi; Muscogee (Creek) Nation, Oklahoma; Poarch Band of Creek Indians of Alabama; Seminole Nation of Oklahoma; Seminole Tribe of Florida, Dania, Big Cypress, Brighton, Hollywood & Tampa Reservations; Shawnee Tribe, Oklahoma; Thlopthlocco Tribal Town, Oklahoma; Tunica-Biloxi Indian Tribe of Louisiana; and United Keetoowah Band of Cherokee Indians in Oklahoma that this notice has been published.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: New York State Museum, Albany, NY

AGENCY: National Park Service.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the possession of the New York State Museum, Albany, NY. The human remains were removed from the Parker Farm site, Schuyler County, NY.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by New York State Museum professional staff in consultation with representatives of the Cayuga Nation of New York and the Seneca-Cayuga Tribe of Oklahoma.

In 1915, human remains representing one individual were removed during sand and gravel mining from the Parker Farm site (NYSM site no. 2190), Hector Township, Schuyler County, NY, by employees of the State Commission of Highways. The human remains were donated to the New York State Museum by Irving J. Morris, Secretary of the State Commission of Highways, the same year. No known individual was identified. No associated funerary objects are present.

At an unknown date between 1915 and 1924, human remains representing seven individuals were removed from disturbed contexts at the Parker Farm site by Perry City town supervisor Dr. J.M. Townsend. Dr. Townsend donated the human remains to the New York State Museum in 1924. No known individuals were identified. No associated funerary objects are present.

The Parker Farm site is located between Cayuga Lake and Owasco Lake, NY. It is a habitation site and cemetery that was possibly palisaded. The types of ceramics recovered during excavation indicate that the site was inhabited circa A.D. 1525-1550. Archeological evidence and oral history indicate that Native American communities in this region in the 16th century are ancestral to the present-day Cayuga Indians.

Officials of the New York State Museum have determined that, pursuant to 25 U.S.C. 3001 (9-10), the human remains described above represent the physical remains of eight individuals of Native American ancestry. Officials of the New York State Museum also have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity

that can be reasonably traced between the Native American human remains and the Cayuga Nation of New York and the Seneca-Cayuga Tribe of Oklahoma.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Lisa M. Anderson, NAGPRA Coordinator, New York State Museum, 3122 Cultural Education Center, Albany, New York 12230, telephone (518) 486-2020, before May 2, 2005. Repatriation of the human remains to the Cayuga Nation of New York and the Seneca-Cayuga Tribe of Oklahoma may proceed after that date if no additional claimants come forward.

The New York State Museum is responsible for notifying the Cayuga Nation of New York and the Seneca-Cayuga Tribe of Oklahoma that this notice has been published.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: Robert S. Peabody Museum of Archaeology, Phillips Academy, Andover, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects in the possession of the Robert S. Peabody Museum of Archaeology, Phillips Academy, Andover, MA. The human remains and associated funerary objects were removed from locations in Barnstable and Plymouth Counties, MA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains and funerary objects was made by the Robert S. Peabody Museum of Archaeology professional staff in consultation with representatives of the Wampanoag Repatriation Confederation representing the Wampanoag Tribe of

Gay Head (Aquinnah) of Massachusetts, Mashpee Wampanoag Tribe (a nonfederally recognized Indian group), and Assonet Band of the Wampanoag Nation (a nonfederally recognized Indian group).

In 1930, human remains representing a minimum of one individual were removed from the Herring Weir site (19-PL-249/250), Mattapoissett, Plymouth County, MA, by Ralph Metcalf. The site was located at the top of a bank adjacent to a stream emptying into Mattapoissett Bay. In 1945, Maurice Robbins obtained the human remains and donated them to the Robert S. Peabody Museum of Archaeology in 1950. No known individual was identified. The 23 associated funerary objects are 12 fragments of organic materials, including matting, animal skin, and an animal tooth; 4 copper fragments; 4 animal bones; 2 pyrite fragments; and 1 lot of bark fragments.

Other burials at the Herring Weir site contained objects of Euroamerican manufacture. Based on artifact typologies, the Herring Weir Site is dated to the Late Woodland/Early Contact period (circa A.D. 1000-1650).

In 1945 and 1949, human remains representing a minimum of three individuals were removed from the Taylor Hill site (19-BN-106), in Wellfleet, Barnstable County, MA, by Howard Torrey and Ripley Bullen and were donated to the Robert S. Peabody Museum of Archaeology at an unknown time. No known individuals were identified. The eight associated funerary objects are one harpoon point, two mollusk shells, one deer-bone awl, two lots of animal bones, one projectile point, and one biface fragment.

Based on artifact characteristics and radiocarbon dating, the Taylor Hill site is dated to the Late Middle Woodland to Late Woodland period (circa A.D. 500-1500). Deer bone that was associated with the human remains from the site has been dated to A.D. 976-1010 (calibrated).

In 1935, human remains representing a minimum of one individual were removed from the Indian Cove Bluff site (19-BN-104), in Wellfleet, Barnstable County, MA, by Howard Torrey and were donated to the Robert S. Peabody Museum of Archaeology at an unknown time. No known individual was identified. No associated funerary objects are present.

Based on artifact characteristics and radiocarbon dating, the Indian Cove Bluff site is dated to the Late Middle Woodland to Late Woodland periods (circa A.D. 500-1500).

In 1915, human remains representing a minimum of two individuals were

removed from the Corn Hill site (19-BN-144/45), in Truro, Barnstable County, MA, by Warren K. Moorehead and Fred Luce. Shortly afterwards, Mr. Luce donated the human remains to the Haverhill Historical Society. In 1993, the Haverhill Historical Society transferred the human remains and funerary objects to the Robert S. Peabody Museum of Archaeology. No known individuals were identified. The 53 associated funerary objects are 1 metal blade, approximately 50 iron fragments, 1 lot of soil stained with ochre, and 1 lot of wood and bark fragments stained with ochre.

Corn Hill is an historically documented Contact period site (post-A.D. 1500).

Increased frequency and longer-term use of coastal areas by Native American people in the outer Cape Cod and Buzzards Bay, MA, area began in the Middle Woodland period. This pattern continued and intensified into the Contact Period. With the formation of highly productive and more stable salt-marsh and estuary environments, long-term occupation became a viable settlement option. The locally focused, year-round exploitation of this environmental diversity first becomes visible in late Middle Woodland sites and continued to characterize Wampanoag subsistence patterns and apparent social organization throughout the Late Woodland/Contact periods. Concomitant with this evidence for year-round occupation are mortuary data that indicate a significantly different pattern than that evident on earlier sites in the same region. Wampanoag descendants are today represented by the Wampanoag Tribe of Gay Head (Aquinnah) of Massachusetts, Mashpee Wampanoag Tribe (a nonfederally recognized Indian group), and Assonet Band of the Wampanoag Nation (a nonfederally recognized Indian group).

Officials of the Robert S. Peabody Museum of Archaeology have determined that, pursuant to 25 U.S.C. 3001 (9-10), the human remains described above represent the physical remains of seven individuals of Native American ancestry. Officials of the Robert S. Peabody Museum of Archaeology also have determined that, pursuant to 25 U.S.C. 3001 (3)(A), the 84 objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Robert S. Peabody Museum of Archaeology have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity

that can be reasonably traced between the Native American human remains and associated funerary objects and the Wampanoag Tribe of Gay Head (Aquinnah) of Massachusetts, and there is a cultural relationship between the Native American human remains and associated funerary objects and the Mashpee Wampanoag Tribe (a nonfederally recognized Indian group), and the Assonet Band of the Wampanoag Nation (a nonfederally recognized Indian group).

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects should contact Malinda S. Blustain, Director, Robert S. Peabody Museum of Archaeology, Phillips Academy, Andover, MA 01810, telephone (978) 749-4490, before May 2, 2005. Repatriation of the human remains and associated funerary objects to the Wampanoag Repatriation Confederation on behalf of the Wampanoag Tribe of Gay Head (Aquinnah) of Massachusetts, Mashpee Wampanoag Tribe (a nonfederally recognized Indian group), and Assonet Band of the Wampanoag Nation (a nonfederally recognized Indian group) may proceed after that date if no additional claimants come forward.

The Robert S. Peabody Museum of Archaeology is responsible for notifying the Wampanoag Repatriation Confederation, Wampanoag Tribe of Gay Head (Aquinnah) of Massachusetts, the Mashpee Wampanoag Tribe (a nonfederally recognized Indian group), and the Assonet Band of the Wampanoag Nation (a nonfederally recognized Indian group) that this notice has been published.

Dated: February 11, 2005.
