

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****Notice of Intent To Rule on Application To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Key Field Airport, Meridian, MS**

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Key Field Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before May 13, 2005.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address:

Jackson Airports District Office, 100 West Cross Street, Jackson, MS 39208.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Tom Williams, Executive Director of the Meridian Airport Authority at the following address: Post Office Box 4351, Meridian, MS 39304-4351.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Meridian Airport Authority under § 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT:

David Shumate, Program Manager, Jackson Airports District Office, 100 West Cross Street, (601) 664-9882. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Key Field Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On April 7, 2005, the FAA determined that the application to impose and use the revenue from a PFC submitted by Meridian Airport Authority was substantially complete within the requirements of section 158.25 of Part 158. The FAA will approve or disapprove the application,

in whole or in part, no later than July 21, 2005.

The following is a brief overview of the application.

PFC Application No.: 05-07-C-00-MEI.

Level of the proposed PFC: \$4.50.

Proposed charge effective date: June 1, 2005.

Proposed charge expiration date: March 31, 2008.

Total estimated net PFC revenue: \$489,473.

Brief description of proposed project(s): Build Terminal Building; Survey and Clear runway approaches; Rehabilitate and improve drainage.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: None.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Meridian Airport Authority.

Dated: Issued in Jackson, MS on April 7, 2005.

Rans Black,

Manager, Jackson Airports District Office, Southern Region.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION**National Highway Traffic Safety Administration**

[Docket No. NHTSA 2005-20936]

Civilian Use of, and Requirements for, the Next Generation of GPS for Automotive Safety

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Request for comments.

SUMMARY: The U.S. Department of Transportation (DOT) is working closely with the U.S. Department of Defense (DOD) in modernizing the Global Positioning System (GPS). In this document, the National Highway Traffic Safety Administration (NHTSA) is requesting comments and information to help us determine the civilian specifications for the next generation of the GPS (GPS III) based on future automotive safety needs that could be enhanced by a modernized GPS.

DATES: Comments must be received on or before May 31, 2005.

ADDRESSES: You may submit comments identified by the DOT DMS Docket

Number above by any of the following methods:

- *Web site:* <http://dms.dot.gov>.

Follow the instructions for submitting comments on the DOT electronic docket site.

- *Fax:* 1-202-493-2251.

- *Mail:* Docket Management Facility; U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590-001.

- *Hand Delivery:* Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, S.W., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Note that all comments received will be posted without change to <http://dms.dot.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <http://dms.dot.gov> at any time or to Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Arthur Carter, Office of Vehicle Safety Research, NVS-332, 400 Seventh Street, SW., Washington, DC 20590 (telephone: (202) 366-5669, fax: (202) 366-7237).

SUPPLEMENTARY INFORMATION: The U.S. Department of Transportation (DOT) is working closely with the U.S.

Department of Defense (DOD) in modernizing the GPS. This next generation of GPS will be available beginning in approximately 2012, and in use for approximately two decades. Examples of use include the enhanced vehicle positioning information that could be provided by a modernized GPS that would improve the performance of various automotive safety systems such as intersection collision avoidance and road departure prevention. Many of these applications are being developed today based on the existing GPS complemented by inertial sensors and other technologies. The potential for improved performance over the existing GPS could bring new safety applications to save lives and improve efficiency.

To obtain information that will assist it in this process, NHTSA is publishing this document requesting comments and information about automotive safety and other initiatives related to the automotive safety impact of GPS.

Researchers and technical experts from automotive original equipment manufacturers (OEMs), suppliers, and other interested parties are invited to submit technical information that

focuses on new or improved safety applications and describes how future GPS specifications would enable or enhance these applications. Overviews of ongoing research programs and descriptions of industry practices related to GPS are also welcome.

In particular, NHTSA requests the specifications for such an upgraded and modernized GPS and discussions of advanced driver assistance systems, postcrash medical attention and other new safety applications that would take advantage of such a system. Some possibilities include how the next generation of GPS could be used for automotive safety purposes, approaches for evaluating the safety impacts of such systems, and what new research and other safety initiatives might be envisioned with an upgraded or modernized GPS system. NHTSA requests the details of specifications for such an upgraded GPS system. Specifications could include coverage, signal strength, accuracy, signal integrity, signal availability, continuity, additional signals in space, changes to orbital parameters, and additional data broadcast from the satellite constellation.

NHTSA will utilize the information in discussions between DOT and DOD to finalize the requirements for the next generation of GPS. The goal of this request is to generate recommendations for the performance capability of the next generation of GPS.

Background. The current GPS consists of three major segments. These are a Space Segment (SS), a Control Segment (CS), and a User Segment (US). GPS is a dual use, military and civil system whose mission is to provide Position, Navigation and Time (PNT) services. GPS provides ranging signals that enable users equipped with properly designed GPS receivers to precisely determine time and their three-dimensional position and velocity.

The increasing utilization of advanced technologies in automobiles brings the promise of enhanced safety and security. GPS, plus other vehicle technologies, could provide safety benefits, such as automatic crash notification directly to emergency medical services, and holds out the promise of additional future safety benefits.

NHTSA has been interested in the potential safety impact of the GPS system on advanced, in-vehicle technologies for a number of years. For example, one project just completed is the Enhanced Digital Mapping (EDMap) project. The goal of the EDMap project was to accelerate the development and deployment of a range of digital map

databases or enhancements to existing databases that have sufficient accuracy and reliability to enhance or enable new vehicle safety applications or improve the performance of driver assistance systems under development or consideration by U.S. automakers. GPS was an integral part of this project for both map generation and vehicle positioning within the driver assistance systems.

The potential value of GPS to efficient and effective emergency response has been demonstrated through numerous initiatives, such as the Federal Communication Commission's (FCC) requirements for wireless Enhanced 911 (E911). FCC, requires wireless carriers, upon appropriate request by a local Public Safety Answering Point (PSAP), to provide the PSAP with the telephone number of a wireless 911 caller and the caller's location information, within 50 to 300 meters, using network or handset (GPS) solutions.

Things to Consider: How is GPS used today by the Original Equipment Manufacturers (OEMs) and their suppliers for product development and by the consumer while operating the vehicle? What limitations does GPS have? How are these limitations overcome by the OEMs? How could the satellites and the signals transmitted by them, be redesigned, or upgraded to overcome these limitations or add additional capabilities? How is GPS III envisioned to be used by the OEMs and suppliers in the future?

Written Statements, Presentations, and Comments: The agency has established Docket No. NHTSA-2005-20936 as a repository for information, statements, and comments on issues related to the automotive safety use of GPS. Written or electronic submissions may be made to this docket at any time.

We will consider all comments that Docket Management receives before the close of business on the comment closing date indicated above under **DATES**. To the extent possible, we will also consider comments that Docket Management receives after that date.

For written materials, two copies should be submitted to Docket Management at the address given at the beginning of this document. The materials must not exceed 15 pages in length (49 CFR 553.21). Necessary attachments may be appended to the submissions without regard to the 15-page limit. This limitation is intended to encourage commenter to detail their information in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including

purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at 400 Seventh Street, SW., Washington, DC 20590. Additionally, two copies of the above document from which the purportedly confidential information has been deleted should be submitted to Docket Management. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation, 49 CFR part 512.

How Can I Read Comments Submitted by Other People?

You may read the comments received by Docket Management at the address given above under **ADDRESSES**. The hours of the Docket are indicated above in the same location.

You may also review filed public comments on the Internet. To read the comments on the Internet, take the following steps:

- (1) Go to the Docket Management System (DMS) Web page of the Department of Transportation (<http://dms.dot.gov/>).
- (2) On that page, click on "search."
- (3) On the next page (<http://dms.dot.gov/search/>), type in the four-digit docket number shown at the beginning of this document. (*Example:* If the docket number were "NHTSA-2002-1234," you would type "1234.") After typing the docket number, click on "search."
- (4) On the next page, which contains docket summary information for the docket you selected, click on the desired comments. You may download the comments.

Please note that even after the comment closing date, we will continue to file relevant information in the Docket as it becomes available. Furthermore, some people may submit late comments. Accordingly, we recommend that you periodically check the Docket for new material.

Privacy Act. Please note that anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78), or you may visit <http://dms.dot.gov>.

Issued: April 7, 2005.

Joseph N. Kanianthra,
Associate Administrator for Vehicle Safety
Research.

DEPARTMENT OF TRANSPORTATION

Research and Innovative Technology Administration

Agency Information Collection; Activity Under OMB Review; Report of Financial and Operating Statistics for Small Aircraft Operators

AGENCY: Research and Innovative
Technology Administration (RITA),
Bureau of Transportation Statistics
(BTS), DOT.

ACTION: Notice.

SUMMARY: In compliance with the
Paperwork Reduction Act of 1995 (44
U.S.C. 3501 *et seq.*), this notice
announces that the Information
Collection Request (ICR) abstracted
below has been forwarded to the Office
of Management and Budget (OMB) for
extension of currently approved
collections. The ICR describes the
nature of the information collection and
its expected burden. The **Federal
Register** Notice with a 30-day comment
period soliciting comments on the
following collection of information was
published on December 17, 2004 (69 FR
75601).

DATES: Written comments should be
submitted by May 13, 2005.

FOR FURTHER INFORMATION CONTACT:
Bernie Stankus, Office of Airline
Information, RTS-42, Room 4125, RITA,
BTS, 400 Seventh Street, SW.,
Washington, DC 20590-0001,
Telephone Number (202) 366-4387, Fax
Number (202) 366-3383 or e-mail
bernard.stankus@dot.gov.

SUPPLEMENTARY INFORMATION:

**Bureau of Transportation Statistics
(BTS)**

Title: Report of Financial and
Operating Statistics for Small Aircraft
Operators.

Type of Request: Extension of a
currently approved collection.

OMB Control Number: 2138-0009.

Forms: BTS Form 298-C.

Affected Public: U.S. commuter and
small certificated air carriers.

Abstract: Part 298 requires small
certificated and commuter air carriers to
submit, quarterly financial and
operational reports to DOT.

Estimated Annual Burden Hours:
1,920 hours.

The Confidential Information
Protection and Statistical Efficiency Act
of 2002 (44 U.S.C. 3501), requires a
statistical agency to clearly identify
information it collects for non-statistical
purposes. BTS hereby notifies the
respondents and the public that BTS
uses the information it collects under
this OMB approval for non-statistical
purposes including, but not limited to,
publication of both respondent's
identity and its data, submission of the
information to agencies outside BTS for
review, analysis and possible use in
regulatory and other administrative
matters.

ADDRESSES: Send comments to the
Office of Information and Regulatory
Affairs, Office of Management and
Budget, 725-17th Street, NW.,
Washington, DC 20503, Attention BTS
Desk Officer.

Comments are invited on: Whether
the proposed collection of information
is necessary for the proper performance
of the functions of the Department
concerning consumer protection.
Comments should address whether the
information will have practical utility;
the accuracy of the Department's
estimate of the burden of the proposed
information collection; ways to enhance
the quality, utility and clarity of the
information to be collected; and ways to
minimize the burden of the collection of
information on respondents, including
the use of automated collection
techniques or other forms of information
technology.

Issued in Washington, DC, on April 7,
2005.

Donald W. Bright,

Assistant Director, Office of Airline
Information.

BILLING CODE 4910-FE-P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 34682]

Union Pacific Railroad Company— Temporary Trackage Rights Exemption—BNSF Railway Company

BNSF Railway Company (BNSF) has
agreed to grant temporary overhead
trackage rights to Union Pacific Railroad
Company (UP) between BNSF milepost
4.8 near Kansas City, KS, and BNSF
milepost 213.2 near Wichita, KS, on the
one hand, and BNSF milepost 345.6
near Ft. Worth, TX, on the other,¹ a
distance of approximately 595.8 miles.

¹ The trackage rights involve BNSF track
segments with non-contiguous mileposts. As such,

The transaction was scheduled to be
consummated on April 1, 2005, and the
temporary trackage rights will expire on
or about April 23, 2005. The purpose of
the temporary trackage rights is to
facilitate maintenance work on UP lines.

As a condition to this exemption, any
employees affected by the acquisition of
the temporary trackage rights will be
protected by the conditions imposed in
*Norfolk and Western Ry. Co.—Trackage
Rights—BN*, 354 I.C.C. 605 (1978), as
modified in *Mendocino Coast Ry., Inc.—
Lease and Operate*, 360 I.C.C. 653
(1980), and any employee affected by
the discontinuance of those trackage
rights will be protected by the
conditions set out in *Oregon Short Line
R. Co.—Abandonment—Goshen*, 360
I.C.C. 91 (1979).

This notice is filed under 49 CFR
1180.2(d)(8). If it contains false or
misleading information, the exemption
is void *ab initio*. Petitions to revoke the
exemption under 49 U.S.C. 10502(d)
may be filed at any time. The filing of
a petition to revoke will not
automatically stay the transaction.

An original and 10 copies of all
pleadings, referring to STB Finance
Docket No. 34682, must be filed with
the Surface Transportation Board, 1925
K Street, NW., Washington, DC 20423-
0001. In addition, a copy of each
pleading must be served on Robert T.
Opal, 1400 Douglas Street, STOP 1580,
Omaha, NE 68179.

Board decisions and notices are
available on our Web site at <http://www.stb.dot.gov>.

Decided: April 6, 2005.

By the Board, David M. Konschnik,
Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915-01-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form SS-4 and SS-4PR

AGENCY: Internal Revenue Service (IRS),
Treasury.

ACTION: Notice and request for
comments.

SUMMARY: The Department of the
Treasury, as part of its continuing effort
to reduce paperwork and respondent
burden, invites the general public and
other Federal agencies to take this

total mileage does not correspond to the milepost
designation of the endpoints.
