NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* NRC Form 536, "Operator Licensing Examination Data."

3. *The form number if applicable:* NRC Form 536.

4. *How often the collection is required:* Annually.

5. *Who will be required or asked to report:* All holders of operator licenses or construction permits for nuclear power reactors.

6. *An estimate of the number of annual responses:* 80.

7. *The estimated number of annual respondents:* 80.

8. *An estimate of the total number of hours needed annually to complete the requirement or request:* 80.

9. *An indication of whether Section 3507(d), Pub. L. 104-13 applies:* Not applicable.

10. *Abstract:* NRC is requesting renewal of its clearance to annually request all commercial power reactor licensees and applicants for an operating license to voluntarily send to the NRC: (1) Their projected number of candidates for operator licensing initial examinations; (2) the estimated dates of the examinations; (3) if the examination will be facility developed or NRC developed, and (4) the estimated number of individuals that will participate in the Generic Fundamentals Examination (GFE) for that calendar year. Except for the GFE, this information is used to plan budgets and resources in regard to operator examination scheduling in order to meet the needs of the nuclear industry.

POSTAL SERVICE**Customized Postage**

AGENCY: Postal Service.

ACTION: Notice of authorization of
market test for Customized Postage.

SUMMARY: The Postal Service™ provides notice of its intention to resume testing of the concept of Customized Postage for a period of one year commencing 20 calendar days from the date of publication of this notice in the **Federal Register**. PC Postage® is a method of providing evidence of prepayment of United States postage using a personal computer and printer and Internet access to an authorized PC Postage provider infrastructure approved by the Postal Service under 39 CFR part 501. Like postage meters, PC Postage services facilitate customer access to postage payment and use of the mail. PC Postage and postage meter products that print digitally generated barcode indicia contain human readable and machine readable elements that facilitate mail processing and counterfeit detection due to identification enabling characteristics. The typical indicia design consists of two elements: a postage block and a distinctly separate block typically called an “ad plate.” The historical use of ad plates consists of printed advertising messages authorized, enabled, and controlled by a Postal Service approved postage meter or PC Postage provider. Customized Postage differs from conventional PC Postage in two respects: First, it utilizes the “ad plate” area to print a digital, graphic image. The image may be one selected from a “library” of images provided by the authorized PC Postage provider or a customer supplied image that meets acceptance criteria established by the PC Postage provider; and, second, instead of the customer printing the selected image on a personal computer the images are printed by the Customized Postage provider under controlled conditions and the finished product is mailed to the customer. With respect to postage meter ad plates the Postal Service will require evaluation and approval of any process established by an authorized provider which results in the printing of a graphic “ad plate.”

DATES: This notice is effective April 27, 2005.

FOR FURTHER INFORMATION CONTACT:

Manager of Postage Technology
Management, at 703-292-3691 or by fax
at 703-292-4073.

SUPPLEMENTARY INFORMATION: In July 2004, the Postal Service authorized a limited market test of the first exemplar

of Customized Postage. The test was
concluded on September 30, 2004.

The Postal Service is interested in
obtaining additional knowledge
regarding the market for Customized
Postage, and, therefore, is authorizing an
additional market test of Customized
Postage concepts. By this notice, the
Postal Service invites interested parties
to submit proposed concepts for
consideration.

While each concept will be evaluated
on its own merits, particular conditions
may be required and agreed to by the
Postal Service and the Customized
Postage provider regarding the testing of
that concept. The following conditions
will be applied in common to all
concepts:

1. The provider must be an authorized
PC Postage provider, authorized postage
meter manufacturer or distributor, or a
company affiliated with an authorized
postage provider under conditions
respecting postage revenue security
approved by the Postal Service in
accordance with 39 CFR part 501.1 and
subject to all procedures and regulations
set forth throughout 39 CFR Chapter
501.

2. The Customized Postage indicia
and other printed matter must meet all
Postal Service requirements respecting
placement on a mail piece, readability,
avoidance of interference with and
facilitation of mail processing, and
identification of fraudulent indicia, as
well as all Postal Service regulations
pertaining to PC Postage products and
services.

3. The provider must maintain an
image control process which prevents
the distribution of images that could
harm the public image of the Postal
Service in accordance with 39 CFR
501.6(g) and 501.23(d) and any
subsequent incorporation of
requirements specific to the evolving
concept of Customized Postage.

4. Images which consist of notices or
advertisements may not be included in
Customized Postage produced during
the test.

5. The test will be limited to full rate
First-Class Mail®, Priority Mail® and
Express Mail® services only.

6. The provider must agree that it has
obtained all intellectual property
licenses necessary to provide the
approved service and that it will
reimburse the Postal Service for any
costs and damages the Postal Service
may incur as a result of the provider's
failure to honor this representation.

7. The provider must agree that the
Postal Service has not exercised 28
U.S.C. 1498 with respect to the
approved Customized Postage product.
