Centers for Medicare & Medicaid Services

42 CFR Part 418

[CMS-1286-P]

RIN 0938-AN89

Medicare Program; Proposed Hospice Wage Index for Fiscal Year 2006

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would set forth the hospice wage index for fiscal year 2006 and identifies the revised labor market and metropolitan statistical areas. This proposed rule would also codify provisions of sections 408 and 946 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on June 28, 2005.

ADDRESSES: In commenting, please refer to file code CMS-1286-P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of three ways (no duplicates, please):

1. *Electronically.* You may submit electronic comments on specific issues in this regulation to <http://www.cms.hhs.gov/regulations/ecomments>. (Attachments should be in Microsoft Word, WordPerfect, or Excel; however, we prefer Microsoft Word.)

2. *By mail.* You may mail written comments (one original and two copies) to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1286-P, P.O. Box 8012, Baltimore, MD 21244-8012.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments (one original and two copies) before the close of the comment period to one of the following addresses. If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786-9994 in advance to schedule your arrival with one of our staff members.

Room 445-G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201; or 7500 Security Boulevard, Baltimore, MD 21244-1850.

(Because access to the interior of the HHH Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

Submission of comments on paperwork requirements. You may submit comments on this document's paperwork requirements by mailing your comments to the addresses provided at the end of the "Collection of Information Requirements" section in this document.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Terri Deutsch, (410) 786-9462.

SUPPLEMENTARY INFORMATION:

Submitting Comments: We welcome comments from the public on all issues set forth in this rule to assist us in fully considering issues and developing policies. You can assist us by referencing the file code CMS-1286-P and the specific "issue identifier" that precedes the section on which you choose to comment.

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. CMS posts all electronic comments received before the close of the comment period on its public website as soon as possible after they have been received. Hard copy comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1-800-743-3951.

I. Background

A. General

1. Hospice Care

Hospice care is an approach to treatment that recognizes that the

impending death of an individual warrants a change in the focus from curative care to palliative care for relief of pain and for symptom management. The goal of hospice care is to help terminally ill individuals continue life with minimal disruption to normal activities while remaining primarily in the home environment. A hospice uses an interdisciplinary approach to deliver medical, social, psychological, emotional, and spiritual services through use of a broad spectrum of professional and other caregivers, with the goal of making the individual as physically and emotionally comfortable as possible. Counseling services and inpatient respite services are available to the family of the hospice patient. Hospice programs consider both the patient and the family as a unit of care.

Section 1861(dd) of the Social Security Act (the Act) provides for coverage of hospice care for terminally ill Medicare beneficiaries who elect to receive care from a participating hospice. Section 1824(i) of the Act provides payment for Medicare-participating hospices.

2. Medicare Payment for Hospice Care

Our regulations at 42 CFR part 418 establish eligibility requirements, payment standards and procedures, define covered services, and delineate the conditions a hospice must meet to be approved for participation in the Medicare program. Part 418 subpart G provides for payment in one of four prospectively-determined rate categories (routine home care, continuous home care, inpatient respite care, and general inpatient care) to hospices based on each day a qualified Medicare beneficiary is under a hospice election.

B. Hospice Wage Index

The hospice wage index is used to adjust payment rates for hospice agencies under the Medicare program to reflect local differences in area wage levels. The original hospice wage index was based on the 1981 Bureau of Labor Statistics hospital data and had not been updated since 1983. In 1994, because of disparity in wages from one geographical location to another, a committee was formulated to negotiate a wage index methodology that could be accepted by the industry and the government. This committee, functioning under a process established by the Negotiated Rulemaking Act of 1990, was comprised of national hospice associations; rural, urban, large, and small hospices; multisite hospices; consumer groups; and a government representative. On April 13, 1995, the Hospice Wage Index Negotiated

Rulemaking Committee signed an agreement for the methodology to be used for updating the hospice wage index.

1. Updates to the Hospice Wage Index

In the August 8, 1997 **Federal Register** (62 FR 42860), we published a final rule implementing a new methodology for calculating the hospice wage index based on the recommendations of the negotiated rulemaking committee. The committee statement was included in the appendix of that final rule (62 FR 42883). The provisions of the final rule specified that the revised hospice wage index was to be— (1) calculated using the most current available hospital wage data; and (2) phased in over a 3-year transition period. For the first year of the transition period, October 1, 1997 through September 30, 1998, a blended index was calculated by adding two-thirds of the 1983 index value for an area to one-third of the revised wage index value for that area. During the second year of the transition period, October 1, 1998 through September 30, 1999, the calculation was similar, except that the blend was one-third of the 1983 index value and two-thirds of the revised wage index value for that area. The revised wage index was fully implemented during the third year of the transition period, October 1, 1999 through September 30, 2000.

The annual update to the hospice wage index is published in the **Federal Register** and is based on the most current available hospital wage data, as well as any changes by the Office of Management and Budget (OMB) to the definitions of Metropolitan Statistical Areas (MSAs). Raw wage index values (inpatient hospital pre-floor and pre-reclassified wage index values) (as described in the August 8, 1997 hospice wage index final rule (62 FR 42860)) are subject to either a budget neutrality adjustment or application of the wage index floor. Raw wage index values of 0.8 or greater are adjusted by the budget neutrality adjustment factor. Budget neutrality means that, in a given year, estimated aggregate payments for Medicare hospice services using the updated wage index values will equal estimated payments that would have been made for these services if the 1983 wage index values had remained in effect. To achieve this budget neutrality, the raw wage index is multiplied by a budget neutrality adjustment factor. The budget neutrality adjustment factor is computed and applied annually. The budget neutrality adjustment factor is calculated by comparing what we would have paid using current rates and the

1983 wage index to what would be paid using current rates and new wage index.

Raw wage index values below 0.8 are adjusted by the greater of: (1) The hospice budget neutrality adjustment factor; or (2) the hospice wage index floor (a 15 percent increase) subject to a maximum wage index value of 0.8.

C. Hospice Provisions of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003

On December 8, 2003, the Congress enacted the Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003 (Pub. L. 108–173). This legislation provided for the following provisions affecting hospice services:

- Section 408, Recognition of Attending Nurse Practitioners as Attending Physicians to Serve Hospice Patients.

- Section 512, Coverage of Hospice Consultation Services.

- Section 946, Authorizing Use of Arrangements to Provide Core Hospice Services in Certain Circumstances.

Section 408 of the MMA amended sections 1861(dd)(3)(B) and 1814(a)(7) of the Act to add nurse practitioners (NPs) to the definition of an attending physician for beneficiaries who have elected the hospice benefit. In other words, if a beneficiary's primary care provider before the determination of the terminal illness and election of the hospice benefit is an NP, the NP can remain as the attending physician, if the beneficiary chooses, after a hospice election. If the beneficiary does not have an attending physician or NP at the time of the terminal diagnosis, the beneficiary may choose to designate either a physician or an NP as his or her attending physician when electing the hospice benefit. Section 408 of the MMA was implemented through an administrative issuance (Change Request (CR) 3226, Transmittals 22 and 304, September 24, 2004).

Section 512 of the MMA provides for a one-time evaluation and consultation to Medicare beneficiaries who have been determined to have a 6-month prognosis if the disease runs its normal course, and who require the expertise of the medical director or physician employed by a hospice in order to be able to make end-of-life decisions. This provision was implemented in the CY 2005 Physician Fee Schedule final rule published in the November 15, 2004 **Federal Register** (69 FR 66335) and is incorporated in our regulations at § 418.205 and § 418.304(d).

Section 946(a) of the MMA allows a hospice program “in extraordinary, exigent, or other non-routine circumstances, such as unanticipated

period of high patient loads, staffing shortages due to illness or other events, or temporary travel of a patient outside a hospice program's service area, * * * “to enter into arrangements with another hospice program to provide services to beneficiaries. Section 946(b) of the MMA provides that “in the case of hospice care provided by a hospice program under arrangement under section 1861(dd)(5)(D) made by another hospice program, the hospice program that made the arrangements shall bill and be paid for the hospice care.” In section II.B.2 of this proposed rule, we discuss our proposal to revise the regulations to implement payment for hospice services made under arrangements. We will address the implementation of section 946(a) of the MMA in a future rulemaking document.

II. Provisions of the Proposed Rule

A. Hospice Wage Index for FY 2006

1. Revised OMB Definition for Geographical Statistical Areas

As required by § 418.306(c), each hospice's labor market is established using the MSA definitions issued by OMB. In the September 4, 1996 hospice wage index proposed rule (61 FR 46579), we explained that the MSA definitions were issued by OMB on December 28, 1992, based on the 1990 census, and updated by OMB based on the decennial census. In accordance with our regulations, changes to the MSA definitions are announced in a **Federal Register** notice.

In the August 27, 2004 **Federal Register** (69 FR 52710), we published a notice with respect to the hospice wage index for FY 2005. In that notice, we acknowledged that on June 6, 2003, OMB issued OMB Bulletin No. 03–04 announcing revised definitions for MSAs, new definitions for Micropolitan Statistical Areas and Combined Statistical Areas, and guidance on using the statistical definitions. (A copy of the Bulletin may be obtained at the following Internet address: <http://www.whitehouse.gov/omb/bulletins/b03-04.html>.) In addition, we noted that we would not address the new OMB definitions because the wage data used to calculate the FY 2005 hospice wage index (FY 2004 hospital wage data) did not reflect revisions based on the new definitions. We indicated that the new OMB definitions would be addressed in the FY 2006 wage index update.

a. Background

In general, OMB defines an urban area as a Metropolitan Statistical Area (MSA) or New England County Metropolitan Area (NECMA). A rural area is defined

as any area outside of the urban area. Any area not included in an MSA is considered to be nonurban and receives the statewide rural rate.

Under the hospital inpatient prospective payment system (IPPS), the wage index is calculated and assigned to hospitals on the basis of the labor market area in which the hospital is located or geographically reclassified under sections 1886(d)(8) and (d)(10) of the Act. In accordance with our regulations for hospice payment, we also use MSAs to define labor market areas, but the application differs from IPPS. Section 1814(i)(2)(D) of the Act requires Medicare to pay for hospice services based on the geographic location where the service is furnished. The wage index value used is based upon the location of the beneficiary's home for routine home care and continuous home care and the location of the hospice agency for general inpatient and respite care.

In this proposed rule, we will address the new OMB definitions and their application to the hospice wage index. Since our regulations require the use of the IPPS wage data as the basis for determining the hospice wage index, we are providing the following summary of the revised geographical statistical areas adopted in the FY 2005 IPPS final rule. (For a more detailed discussion of the changes in the hospital wage index based on the new OMB definitions see the FY 2005 IPPS proposed and final rules published May 18, 2004 (69 FR 28196) and August 11, 2004 (69 FR 48916).)

b. Current Labor Market Areas Based on MSAs

As discussed in the FY 2005 IPPS final rule, "the [hospital] wage index is calculated and assigned to hospitals on the basis of the labor market area in which the hospital is located." In addition, the IPPS final rule (69 FR 49026) defined hospital labor markets as follows:

We currently define hospital labor market areas based on the definitions of Metropolitan Statistical Areas (MSAs), Primary MSAs (PMSAs), and New England County Metropolitan Areas (NECMAs) issued by OMB. OMB also designates Consolidated MSAs (CMSAs). A CMSA is a metropolitan area with a population of one million or more, comprising two or more PMSAs (identified by their separate economic and social character). For purposes of the hospital wage index, we use the PMSAs rather than CMSAs because they allow a more precise breakdown of labor costs. If a metropolitan area is not designated as part of a PMSA, we use the applicable MSA.

These different designations use counties as the building blocks upon which they are

based. Therefore, hospitals are assigned to either an MSA, PMSA, or NECMA based on whether the county in which the hospital is located is part of that area. For purposes of the IPPS wage index, we combine all of the counties in a State outside a designated MSA, PMSA, or NECMA together to calculate a statewide rural wage index.

c. Core-Based Statistical Areas

In the December 27, 2000 **Federal Register** (65 FR 82228 through 82238), OMB announced its new standards and in that notice, OMB defined a Core-Based Statistical Area (CBSA), beginning in 2003, as "a geographic entity associated with at least one core of 10,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties." The standards designate and define two categories of CBSAs: MSAs and Micropolitan Statistical Areas (65 FR 82235).

According to OMB, MSAs are based on urbanized areas of 50,000 or more population, and Micropolitan Statistical Areas (referred to in further discussion as Micropolitan Areas) are based on urban clusters of at least 10,000 population but less than 50,000 population. Counties that do not fall within CBSA (either MSA or Micropolitan Areas) are deemed "Outside CBSAs." In the past, OMB defined MSAs around areas with a minimum core population of 50,000, and smaller areas were "Outside MSAs."

In its June 6, 2003 bulletin, OMB announced the new CBSAs, comprised of MSAs and the new Micropolitan Areas based on Census 2000 data. The new CBSA designations recognize 49 new (urban) MSAs and 565 new Micropolitan Areas, and revised the composition of many of the existing (urban) MSAs. There are 1,090 counties in MSAs under these new CBSA designations compared with 848 counties in the previous MSAs. Of these 1,090 counties, 737 are in the same MSA as they were before the changes, 65 are in different MSAs, and 288 were not previously designated to any MSA. There are 674 counties in Micropolitan Areas. Of these, 41 were previously in an MSA, while 633 were not previously designated to an MSA.

d. Revised Labor Market Areas

As discussed in the FY 2005 IPPS final rule (69 FR 49027), alternatives to the use of MSAs for the purpose of establishing labor market areas for the Medicare wage index were examined. In the May 27, 1994, IPPS proposed rule (59 FR 27724), the latest research concerning possible future refinements

to the labor market areas was presented. Public comments received on the May 27, 1994 proposed rule were described in the June 2, 1995 proposed rule (60 FR 29219). In that rule, it was noted that there was no consensus among commenters on the choice for new labor market areas. Consequently, MSAs have continued to be used to define labor market areas for purposes of the wage index by many Medicare payment systems as noted in previous discussion.

(1) New England County Metropolitan Areas

NECMAs are currently used to define labor markets areas in New England, " * * * because these are county-based designations rather than the 1990 MSA definitions for New England which used minor civil divisions such as cities and towns." Under the CBSA definition, "OMB has defined the MSAs and Micropolitan Areas in New England on the basis of counties. OMB also established New England City and Town Areas, which are similar to the previous New England MSAs." Therefore, to maintain consistency in the definition of labor market areas between New England and the rest of the country, IPPS decided to use the New England MSAs under the new CBSA definition.

(2) Metropolitan Divisions

Under OMB's new CBSA designations, a Metropolitan Division is a county or group of counties within a CBSA that contains a core population of at least 2.5 million, representing an employment center, plus adjacent counties associated with the main county or counties through commuting lines. For the hospital wage index the PMSAs are used rather than CMSAs to define labor market areas "because they comprise a smaller geographic area with potentially varying labor costs due to different local economies."

(3) Micropolitan Areas

The IPPS final rule noted the following regarding the use of Micropolitan Areas to define labor markets (69 FR 49029):

One of the major issues with respect to the new definitions is whether to use Micropolitan Areas to define labor market areas for the purpose of the IPPS wage index. Because the new Micropolitan Areas are essentially a third area definition made up mostly of currently rural areas, but also some or all of current MSAs, how these areas are treated will have significant impacts on the calculation and application of the wage index. Treating Micropolitan Areas as separate and distinct labor market areas would affect both the wage indexes of the hospitals in the Micropolitan Areas and the

hospitals in the labor market areas where those hospitals are currently located (both positively and negatively).

Because we currently use MSAs to define urban labor market areas and we group all the hospitals in counties within each State that are not assigned to an MSA together into a statewide rural labor market area, we have used the terms "urban" and "rural" wage indexes in the past for ease of reference. However, the introduction of Micropolitan Areas complicates this terminology because these areas include so many hospitals that are currently included in the statewide rural labor market areas. In order to facilitate the discussion below, we use the term "rural" hospitals to describe hospitals in counties that are not assigned to either an MSA or a Micropolitan Area. This should not be taken to indicate that hospitals in Micropolitan Areas are no longer "rural" hospitals. In fact, we proposed that hospitals in Micropolitan Areas are included in the statewide rural labor market areas, for the reasons outlined below.

2. Annual Update to the Hospice Wage Index

(If you choose to comment on issues in this section, please include the caption "Annual Update to the Hospice Wage Index" at the beginning of your comments)

a. Background

Section 418.306(c) requires that we issue annually in the **Federal Register**, hospice wage index based on our most current available hospital wage data, including any changes to the definitions of MSAs.

Section 4441(a) of the Balanced Budget Act of 1997 (BBA) amended section 1814(i)(1)(C)(ii) of the Act to establish updates to hospice rates for FYs 1998 through 2002. Hospice rates were to be updated by a factor equal to the hospital market basket index, minus 1 percentage point. However, neither the BBA nor subsequent legislation specified the hospital market basket adjustment to be used to compute payment for FY 2006. Therefore, payment rates for FY 2006 will be updated according to section 1814(i)(1)(C)(ii)(VII) of the Act, which specifies that the update to the payment rates after FY 2002 will be the hospital market basket percentage increase for the fiscal year. This rate update is implemented via administrative issuance to be published July 2005 to provide adequate time to implement system change requirements and is not part of this proposed rule.

The hospice wage index presented in this proposed rule would be effective October 1, 2005 through September 30, 2006. We note that we are not proposing any modifications to the hospice wage index methodology. In accordance with

our regulations and the agreement signed with other members of the Hospice Wage Index Negotiated Rulemaking Committee, we will continue to use the most current hospital data available to adjust for area wage differences. For this proposed rule, the FY 2005 hospital wage index was the most current hospital wage data available when the FY 2006 wage index values were calculated. We continue to use the pre-reclassified and pre-floor hospital area wage index data. Payment rates for each of the four levels of care (routine home care, continuous home care, respite care, and general inpatient care) are adjusted annually based upon the hospital market basket for that year and are promulgated administratively to allow for sufficient time for system changes and provider notification. Due to the need to ensure appropriate time for implementing changes, we have not incorporated these payment rates into this proposed rule.

The payment rates are divided into the labor and nonlabor portions. The appropriate wage index value is applied to the labor portion of the hospice rate based on the geographic area in which the beneficiary resides when receiving routine home care or continuous home care. The appropriate wage index value is applied to the labor portion of the hospice rate based on the geographic area of the hospice agency for beneficiaries receiving general inpatient or respite level of care.

We use the previous fiscal year's hospital wage index data to calculate the hospice wage index values. For FY 2006 proposed hospice wage index, we use the FY 2005 hospital pre-floor and pre-reclassified hospital wage data. This means that the hospital wage data used for the hospice wage index is not adjusted to take into account the geographic reclassification of hospitals in accordance with sections 1886(d)(8)(B) and 1886 (D)(10) of the Act. All wage index values for FY 2006 would be adjusted by either by the proposed FY 2006 budget neutrality adjustment factor, 1.063479, or the wage index floor adjustment. This means, that for wage index values 0.8 or greater, the value is multiplied by the budget neutrality adjustment factor. For wage index values that are below 0.8, either the budget neutrality adjustment factor or the wage index floor, not to exceed 0.8, is applied. In other words, the floor adjustment is the greater of the raw wage index value multiplied by the proposed budget neutrality adjustment factor (1.063479 for FY 2006) or the raw wage index value for that area is multiplied by 15 percent subject to a maximum value of 0.8. Budget

neutrality means that, in a given year, estimated aggregate payments for Medicare hospice services using the updated wage index will equal estimated payments that would have been made for the same services if the wage index adopted for hospices in 1983 had remained in effect. (For a detailed discussion of the methodology used to compute the hospice wage index see the September 4, 1996 proposed rule (61 FR 46579) and the August 8, 1997 final rule (62 FR 42860)). The proposed FY 2006 hospice wage indexes for urban and rural areas are listed in Tables A and B of the Addendum.

b. Implementation of the Revised Labor Market Designations

(If you choose to comment on issues in this section, please include the caption "Implementation of Revised Labor Market Designations" at the beginning of your comments)

For the hospice payment system, § 418.306(c) requires that the hospice wage index be "based on the most current available CMS hospital wage index, including any changes to the definitions of Metropolitan Statistical Areas." We continue to believe MSAs are a reasonable and appropriate proxy for developing geographic areas for purposes of adjusting for wage differences in hospice. We also note that MSAs are used to define labor market areas for purposes of the wage index for many of the other Medicare payment systems (for example, long term care hospital (LTCH) prospective payment system (PPS), inpatient rehabilitation facility (IRF) PPS, home health agency (HHA) PPS, skilled nursing facility (SNF) PPS, Outpatient PPS and inpatient psychiatric facility (IPF) PPS.

First, historically, Medicare prospective payment systems have used metropolitan area (MA) definitions developed by OMB. For example, in adopting the MSA designation for the IPPS area labor adjustment, the Secretary stated:

[i]n administering a national payment system, we must have a national classification system built on clear, objective standards. Otherwise the program becomes increasingly difficult to administer because the distinction between rural and urban hospitals is blurred. We believe that the MSA system is the only one that currently meets the requirements for use as a classification system in a national payment program. The MSA classification system is a statistical standard developed for use by Federal agencies in the production, analysis, and publication of data on metropolitan areas. The standards have been developed with the aim of producing definitions that will be consistent as possible for all MSAs nationwide." (49 FR 27426).

In addition, in numerous instances, the Congress has recognized that the areas developed by OMB may be used for differentiating among geographic areas for Medicare payment purposes. For example, in the IPPS statutory section, section 1886(d)(2)(D) of the Act, the Congress defines an "urban area" as "an area within a Metropolitan Statistical Area (as defined by the Office of Management and Budget) or within such similar area as the Secretary has recognized." Similarly, in the sections of the statute governing the guidelines to be used by the Medicare Geographic Classification Review Board for purposes of reclassification, sections 1886(d)(10)(A) and (D)(i)(II) of the Act, the Congress directed the Secretary to create guidelines for "determining whether the county in which the hospital is located should be treated as being part of a particular [MSA]." Thus, the Congress has accepted and ratified the use of MSAs as an inherently rational manner of dividing up labor-market areas for purposes of Medicare payments.

The process used by OMB to develop the MSAs creates geographic areas that are based upon characteristics we believe also generally reflect the characteristics of unified labor market areas. For example, the CBSAs reflect a core population plus an adjacent territory that reflects a high degree of social and economic integration. This integration is measured by commuting ties, thus demonstrating that these areas may draw workers from the same general areas. In addition, the most recent CBSAs reflect the most up to date information. OMB reviews its MA definitions preceding each decennial census to reflect recent population changes, and the CBSAs are based on the Census 2000 data. Finally, in the context of the inpatient prospective payment system, we have reviewed alternative methods for determining geographic areas for purposes of the wage index, and in each case, have determined to remain with the OMB designations rather than replace these designations with alternatives.

As stated previously, § 418.306(c) requires the hospice wage index to reflect changes to the definitions of MSA. Therefore, we are proposing to adopt the revised labor market area designations based on OMB's CBSA designations.

For the proposed FY 2006 hospice wage index, we would adopt the CBSA designations as finalized in the FY 2005 IPPS. We believe that OMB's CBSA designations, based on Census 2000 data reflect the most recent available geographic classifications (MA

definitions). We are not proposing to change at this time, the methodology derived as a result of the negotiated rulemaking committee. We believe that there are factors which require evaluation to determine if the hospice methodology supports the cost of providing hospice services and if the methodology requires modification.

As discussed in the IPPS final rule (69 FR 49032), when the IPPS adopted the revised labor market areas based on OMB's new CBSA designations on October 1, 2004, IPPS established a transition to the new designations to mitigate the resulting adverse impact on certain hospitals. Section 1814(i)(1)(A) of the Act requires hospice payment to be based on "costs which are reasonable and related to the cost of providing hospice care or which are based on such other tests of reasonableness the Secretary may prescribe in regulations * * *." Our regulations at § 418.306(c) require us to issue annually in the **Federal Register** "a hospice wage index based on the most current available CMS hospital data wage data, including any changes to the definitions of Metropolitan Statistical Areas." This language would not seem to permit us to establish a transition to the new CBSA designations. In addition, unlike IPPS and other payment systems where each entity uses a single MSA (CBSA), hospice agencies may use various wage indices to compute their payments based upon the location of the beneficiary for routine and continuous home care or the MSA (CBSA) for the location of the agency for respite and general inpatient care. The methodology for applying the hospice floor (15 percent) to wage index values below 0.8 is used to leverage areas where there are significantly low wage index values. Moreover, we do not believe that in the aggregate, hospice agencies would be impacted negatively by the new CBSA designations. The existing methodology of computing the hospice wage index, the annual calculation of the hospice payment rates based upon the market basket index, and the variability of CBSAs that may be attributed to different hospice agencies are sufficient to mitigate adverse effects on individual hospice agencies. While we understand that there are CBSAs that decrease based upon the new definitions, there are those that are positively affected. For example, many counties that have been included in the rural definitions under the MSA designations are now designated as urban areas under the CBSA will generally receive an increase in their wage index. We believe that adjustments made to CBSAs because of

negative impact would necessitate adjustment to CBSAs that are positively impacted. Variability and changes in wage indices both positively and negatively have occurred under the MSA designations and occur as a result of geographic differences. As a result, we propose to adopt the CBSA definitions and resulting wage indices without transitions. The impact of the CBSA designations is discussed in section V of this proposed rule.

In adopting the CBSA designations, we identified that there were no IPPS hospitals and thus no hospital wage index data on which to base the calculation of the FY 2006 hospice wage index for rural Massachusetts. Because there is no reasonable proxy for more recent rural data within Massachusetts, we are proposing to use the pre-floor, preclassified hospital wage index data for FY 2005 and apply the FY 2006 proposed budget neutrality factor of 1.063479. In the event that future rural areas do not have hospital wage index data to derive a hospice wage index, we propose to use a comparable methodology to derive a wage index. Similarly, if there urban areas without hospital wage index data, we propose to use all of the urban areas within the State as a reasonable proxy. We are soliciting comment on these approaches to calculating the wage index value for areas without hospital wage data for FY 2006 and subsequent years.

To facilitate an understanding of the policies related to the proposed changes in the hospice wage index discussed in section II.A of this proposed rule, we are providing the following tables in the Addendum to this proposed rule:

- Table A—Proposed Hospice Wage Index for Urban Areas by CBSA.
- Table B—Proposed Hospice Wage Index for Rural Areas by CBSA.
- Table C—Comparison of Hospice Wage Index for Urban Areas by MSA and CBSA. This table lists the counties by MSA designation and the wage index if we had retained the use of MSAs. It also presents the CBSA designation for these counties and the corresponding wage index using the CBSA designations. The MSA designations include those counties that were classified as rural and indicated the State rural MSA code and the corresponding CBSA for these counties which under the CBSA designation are now urban. We note that some counties that are classified as rural under the MSA designation would become rural under the new CBSA designation and vice versa.
- Table D—Comparison of the Hospice Wage Index for Rural Areas by MSA and CBSA. This table compares

the State rural MSA designations and their corresponding wage indices to the CBSA designations and their respective wage indices.

- Table E—Rural Counties Converting to Urban Counties by State. This table presents the rural counties that under the CBSA designations convert to urban counties. The list includes the county name, State county code, MSA designation, MSA name, CBSA name, and CBSA designation. Please note that these conversions are based on the OMB designations.

- Table F—Crosswalk of Counties by State from MSA to CBSA. This table crosswalks all counties in each State from MSA to CBSA and includes the State, State county code, MSA designation, MSA name, CBSA designation, and CBSA name. These tables will assist providers in identifying their location and their catchment area(s) by their previous designations and their CBSA designation as well as the wage indices for those areas based upon the previous MSA designations as well as the CBSA designations.

3. Labeling Error in the Hospice Wage Index

We have discovered an error in the labeling of the wage index tables that we have been publishing in the annual hospice wage index update. That labeling error is the listing of Stanly County, North Carolina as one of the areas under MSA 1520 when, in fact, we consider Stanly County, NC to be a rural area in North Carolina. Stanly County wage data have always been correctly treated as rural in the actual creation of the hospice wage index values, and it has only been the listing of Stanly County under MSA 1520 that was in error. Consequently, we are correcting our labeling error from past notices for the hospice and have removed Stanly County from the list of areas that fall under the MSA 1520 wage index. Since this is strictly a ministerial correction that does not affect the actual computation of the wage index values, hospice providers in and beneficiaries who reside in Stanly County and receive routine home and continuous home care in Stanly County will continue to fall under, and use, the wage index for rural North Carolina.

B. Proposed Changes To Implement Hospice-Related Provisions of the MMA

(If you choose to comment on issues in this section, please include the caption "MMA Provisions" at the beginning of your comments)

In section I.C of this proposed rule, we note that section 408 of the MMA

was effective upon enactment and initially implemented through administrative issuances. This proposed rule would incorporate the provisions in regulation.

1. Coverage of Nurse Practitioner as Attending Physician in Hospice (Section 408 of the MMA)

Section 408 of the MMA amended sections 1861(dd)(3)(B) and 1814(a)(7) of the Act to add nurse practitioners (NPs) to the definition of an attending physician, for beneficiaries who have elected the hospice benefit. In other words, if a beneficiary's primary care provider is an NP, before the determination of the terminal illness and election of the hospice benefit, the NP can remain as the attending physician, if chosen by the beneficiary. If the beneficiary does not have an attending physician or NP, the beneficiary must be provided with an option of either a physician or an NP (if available and if allowed by State law) to serve as the attending physician. An NP is defined as a registered nurse who performs such services as he or she is legally authorized to perform (in the State in which the services are performed) in accordance with State law (or State regulatory mechanism provided by State law) and who meets the training, education, and experience requirements as the Secretary may prescribe.

As discussed in Change Request 3226 (Transmittals 22 and 304, September 24, 2004), beginning December 8, 2003, Medicare pays for medically reasonable and necessary services provided by NPs to Medicare beneficiaries who have elected the hospice benefit and who have selected a nurse practitioner as their attending physician. Nurse practitioners are paid 85 percent of the fee schedule amount for their services as attending physicians. Services for the terminal and related conditions provided by an NP—

- Serving as the attending physician that are medical in nature must be reasonable and necessary and must be services that, in the absence of an NP, would be performed by a physician; and
- May not be separately billed if the—
 - ++ Services would not be reasonable and necessary if provided by an attending physician;
 - ++ NP is not the patient's attending physician; or
 - ++ Services would be performed by a registered or licensed nurse in the absence of a physician or nurse practitioner.

Since NPs are not physicians, as defined in 1861(r)(1) of the Act, they may not act as medical directors or

physicians of the hospice or certify the beneficiary's terminal illness and hospices may not contract for their attending physician services as described in 1861(dd)(2)(B)(i)(III) of the Act. All of these provisions apply to NPs without regard to whether they are hospice employees.

We are proposing to revise § 418.3, 418.22(c)(1)(ii), and § 418.304 to implement the provisions of section 408 of the MMA.

2. Payment for Authorizing Use of Arrangements To Provide Hospice Service Under Certain Circumstances (Section 946 of the MMA)

Section 946(a) of the MMA amended section 1861(dd)(5) of the Act by adding the following: "(D) In extraordinary, exigent, or other non-routine circumstances, such as unanticipated periods of high patient loads, staffing shortages due to illness or other events, or temporary travel of a patient outside a hospice program's service area, a hospice program may enter into arrangements with another hospice program for the provision by that other program of services described in paragraph (2)(A)(ii)(I)." Section 946(a) of the MMA is discussed in this proposed rule to assist the reader in understanding how hospices will be reimbursed for these types of arrangements. We will issue more specific regulations regarding section 946(a) of the MMA in future rulemaking.

Section 946(b) of the MMA amended section 1814(i) of the Act to add the following: "(5) In the case of hospice care provided by a hospice program under arrangements under section 1861(dd)(5)(D) made by another hospice program, the hospice program that made the arrangements shall bill and be paid for the hospice care." This means that the hospice that establishes the contractual arrangement with the hospice that will be providing services to the beneficiary, continues to bill for and receive payment during the hospice election.

Section 4442 of the BBA amended section 1814(i)(2) of the Act, effective for services furnished on or after October 1, 1997, to require hospice agencies to submit claims for payment for hospice services furnished in an individual's home on the basis of the geographic location at which the service is furnished. Therefore, the methodology for applying the wage index to the labor portion of the payment rates remains the same. This means that the wage index for routine and continuous home care would reflect the place where the service is provided,

which may be outside of the hospice program's service area during periods of temporary travel. We do not propose in this rule to define "temporary travel" since this would depend upon individual needs and abilities determined by the interdisciplinary group, the beneficiary, and his or her family. The wage index for general inpatient care would reflect the MSA for the hospice agency that retains management responsibility. Payment will continue to be made to the hospice agency for which the beneficiary has made the election. We are proposing to revise § 418.302(d) to implement this provision.

III. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995, we are required to provide 30-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. In order to fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires that we solicit comment on the following issues:

- The need for the information collection and its usefulness in carrying out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

Section 418.22(c)(1) requires for the initial 90-day period, the hospice must obtain written certification statements (and oral certification statements if required under paragraph (a)(3) of this section) from the individual's attending physician, if the individual has an attending physician, that meets the definition of physician specified in § 410.20 of this subchapter.

While this requirement is subject to the PRA it is currently approved by OMB under control number 0938-0302, "ICRs in Hospice Care Regulation and Supporting Regulations", with a current expiration date of September 30, 2006.

IV. Response to Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the **DATES** section of

this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

V. Regulatory Impact Analysis

(If you choose to comment on issues in this section, please include the caption "Impact Analysis" at the beginning of your comments)

A. Overall Impact

We have examined the impacts of this proposed rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96-354), section 1102(b) of the Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4), and Executive Order 13132. We estimated the impact on hospices, as a result of the proposed changes to the FY 2006 hospice wage index. As discussed previously, the methodology for computing the wage index was determined through a negotiated rulemaking committee and implemented in the August 8, 1997 final rule (62 FR 42860). This proposed rule updates the hospice wage index in accordance with our regulation and that methodology, incorporating the adoption of the CBSA designations used in the hospital wage index data. Table I reflects the proposed hospice wage index impact using the CBSA designations. Table II indicates the proposed wage index impact using the hospice wage indices under the MSA designations as well as the CBSA designations.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside an MSA and has fewer than 100 beds. We have determined that this proposed rule would not have a significant impact on the operations of a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule that may result in expenditure in any 1 year by State, local, and tribal governments, in the aggregate, or by the private sector, of \$110 million or more. This proposed rule would have no substantial effect on State, local, or tribal governments or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. We have reviewed this proposed rule under the threshold criteria of Executive Order 13132, Federalism, and have determined that it would not have an impact on the rights, roles, and responsibilities of State, local, or tribal governments.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

1. Hospice Size

The impact of hospice wage index changes have been analyzed according to type of hospice, geographic location, type of ownership, hospice base, and hospice size. Hospice size was determined by the number of routine home care days (RHC). Since routine home care days account for over 70 percent of the services provided by a hospice, we used RHC days as a proxy for the size of the hospice agency. In the past, we had, designated the size by four categories: (1) 0 to 1,754 RHC days representing small agencies; (2) 1,754 to 4,373 RHC days or (3) 4,373 to 9,681 RHC days representing medium-sized agencies; and (4) 9,681 RHC days or more representing large agencies.

To determine the statistical distribution of RHC days, based upon the total number of hospice agencies and their respective RHC days using FY 2003 claims processed through March 2004, were used. In determining the statistical distribution, we deleted data for four hospice agencies with RHC days that greatly exceeded the total number of RHC days of other agencies. However, these data have been included in the impact analysis since we recognize that the skewness existed in the "large" agency size distribution using four size categories and does not change with the use of three size categories.

Based upon this analysis, we are using only three size designations to present the impact analyses. We believe that these three designations better describe the size of the hospice. The three categories are: Small agencies having 0 to 3,499 RHC days; medium agencies having 3,500 to 19,999 RHC days; and large agencies having 20,000 or more RHC days.

2. Impact on Hospices

Our discussions for this proposed rule will focus on the impact of adopting the

CBSA designations. Table I indicates the impact of using the proposed CBSA designations. Table II provides a comparison between impact using the MSA and CBSA designations. As discussed above, we use the latest claims file available to us to develop the impact table when we issue the annual yearly wage index update. For the purposes of this proposed rule, we used the 2003 claims that were processed through June 2004 since this was the latest file available. Thus the projections or anticipated payments indicated in Table I do not represent the expenditures that we anticipate for FY 2006. We anticipate that the final rule will more accurately project payment for FY 2006. For the purposes of this proposed rule, we compared estimated payments using the FY 1983 hospice wage index to estimated payments using the FY 2006 wage index and determined the proposed hospice wage index to be budget neutral. Budget neutrality means that, in a given year, estimated aggregate payments for Medicare hospice services using the proposed FY 2006 wage index would equal estimated aggregate payments that would have been made for the same services if the 1983 wage index had remained in effect. Budget neutrality to 1983 does not imply that estimated payments would not increase since the budget neutrality applies only to the wage index portion and not the total payment rate, which accommodates inflation.

Executive Order 12866 (as amended by Executive Order 13258, which merely reassigns responsibility of duties) directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more in any 1 year). We have determined that this proposed rule is not an economically significant rule under this Executive Order.

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and government agencies. Most hospices and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of \$6 million to \$29 million in any 1 year (for details, see the Small Business Administration's regulation at 65 FR 69432, that sets forth size standards for

health care industries). For purposes of the RFA, most hospices are small entities. As indicated in Table I below, there are 2,435 hospices. Approximately 70 percent of Medicare certified hospices are identified as voluntary, government, or other agencies and, therefore, are considered small entities. Because the National Hospice and Palliative Care Organization estimates that approximately 79 percent of hospice patients are Medicare beneficiaries, we have not considered other sources of revenue in this analysis. Furthermore, the wage index methodology was previously determined by consensus, through a negotiated rulemaking committee that included representatives of national hospice associations; rural, urban, large, and small hospices; multisite hospices; and consumer groups. Based on all of the options considered, the committee agreed on the methodology described in the committee statement, and it was adopted into regulation in the August 8, 1997 final rule. In developing the process for updating the wage index in the 1997 final rule, we considered the impact of this methodology on small entities and attempted to mitigate any potential negative effects.

As stated previously, the following discussions are limited to demonstrating trends rather than projected dollars if the subsequent final rule to this proposed rule were implemented for FY 2006. We used the CBSA designations and wage indices as well as the data from FY 2003 claims processed through June 2004 in developing the impact analysis. We will recalculate the impacts for the final rule using the FY 2004 claims file. We will discuss the estimated payments for FY 2006 at that time. Since the impact tables are intended to reflect the implementation of the CBSA in contrast with the current MSA designations, the introduction of the wage indices is the only variable used in the computation. It is important to note that the payment rates used reflect the FY 2005 rates. The FY 2006 payment rates will be adjusted to reflect the full FY 2006 hospital market basket, as required by section 1814(i)(1)(C)(ii)(VII) of the Act. As previously noted, we publish these rates through administrative issuances. As discussed in section II.A.1.a. of this proposed rule, hospice agencies may various wage indices to compute their payments based on the geographic location of the beneficiary for routine and continuous home care or the MSA (CBSA) or the location of the hospice agency for respite and general inpatient care. Therefore, we analyze the impact on

hospices using the following parameters: geographic location; hospice size; type of ownership; and hospice base).

Our analysis demonstrates that, under this proposed rule, rural hospices would experience an increase in payment that is greater than that of urban hospices. Rural hospices are anticipated to experience a modest increase of 0.8 percent and urban hospices a slight decrease of 0.2 percent. However, the impact overall is anticipated to remain unchanged if the CBSA designations are adopted. This flat trend is also evident when contrasting the findings with projections using the MSA designations. However, the projections using the MSA designations remain flat for urban areas and decrease slightly by 0.1 percent for rural areas.

Of the urban hospices, we anticipate that most of the regions would experience decreases ranging from a 1.4 for the urban New England region to 0.1 decrease for the South Atlantic. A slight increase is anticipated for the West North Central, West South Central, and Pacific urban regions of 0.1, 0.2, and 0.1, respectively. In contrast, the rural regions are expected to receive an increase for all regions ranging from a substantial increase of 21.7 percent for rural Puerto Rico to a 1 percent increase for East North Central. We believe that that aberration for Puerto Rico can be attributed to the increase in the hospital wage indices in the region as well as the large number of rural counties under the MSA designations in Puerto Rico that have been designated as urban counties under the CBSA designations. Rural New England and West North Central regions are expected to remain flat. Only one rural region, the Mid-Atlantic, is anticipated to experience a decrease of 1.5 percent. The anticipated increase for the rural regions using the MSA designations is in contrast, more modest with increases ranging from 0.1 to 0.3 and decreases anticipated for the rural South Atlantic, East North Central, East South Central, and Middle Atlantic of 0.2, 0.3, 0.6, and 0.7, respectively.

As discussed previously, we have designated three hospice sizes based on routine home care days. Under the Medicare hospice benefit, hospices can provide four different levels of care days. The majority of the days provided by a hospice are routine home care days. Therefore, the number of routine home care days can be used as a proxy for the size of the hospice, that is, the more days of care provided, the larger the hospice. Using routine home care days as a proxy for size, our analysis indicates that the impact of the wage index update on small hospices (those

that provide up to 3,499 days of routine home care) will experience a 0.1 percent increase in both the CBSA and MSA projections. The impact remains virtually the same for both the CBSA and MSA designations for all three sizes. As indicated above, a 0.1 percent increase is anticipated for small agencies and remains unchanged for large agencies. There is a scant decrease of 0.1 percent for medium sized agencies (with 3,500 to 19,999 RHC days) using the CBSA designations while it remains unchanged for MSA designations. The lack of variability by agency size indicates that this proposed rule would have no impact on a small number of small entities. Rural Puerto Rico with 6 hospice agencies and 184,000 routine care days, representing the smallest number of hospices and second lowest routine home care days in the rural region, is anticipated to experience a substantial increase of 21.7 percent while rural South Atlantic with 138 hospices and 1,394,000 routine home care days, which represents the highest number of routine home days, will have an increase of 0.6 percent. The rural Mid-Atlantic region with 39 hospices and 280,000 routine home care days is anticipated to decrease by 1.5 percent. Rural New England with 27 hospices representing the second lowest number of agencies with 112,000 routine home care days, and representing the lowest number of rural days, is anticipated to remain unchanged.

Urban Puerto Rico region with 30 hospice agencies with 428,000 routine home care days, representing the lowest number of urban agencies and routine home care days, is anticipated to experience a decrease of 0.5 percent using the CBSA designations in contrast to a 0.2 percent increase using the MSA designation. Urban East North Central with 244 hospice agencies representing the largest number of urban hospice agencies with 5,275,000 routine home care days is anticipated to experience a decrease of 0.3 percent using the CBSA designation and would remain unchanged using the MSA designation. Urban West South Central with the largest number of routine home care days of 5,765,000 is anticipated to experience a 0.2 percent increase using the CBSA designations and 0.4 percent increase using the MSA designations. Based upon these comparisons, the urban regions would expect a slightly larger increase in payment using the MSA designations while the rural areas are anticipated to experience a substantially larger increase using the CBSA designations. However, as

indicated above, in the aggregate, hospice agencies overall are anticipated to remain unchanged using either the CBSA or MSA designations.

By type of ownership, proprietary hospice agencies are anticipated to increase by 0.2 percent while voluntary agencies with the largest number of agencies and routine home care days of 1,309 and 23,696,000, respectively, are anticipated to decrease by 0.2 percent and government by 0.3. Since we are unable to determine the ownership type for the unknown category, we are unable to determine the impact of the anticipated decrease of 1.1 percent. By MSA designation, in contrast, voluntary and proprietary hospice agencies are anticipated to remain unchanged with government agencies anticipated to decrease by 0.1 percent.

Freestanding hospice agencies with the largest number of agencies of 1,188 and routine home care days of 29,277,000 are anticipated to remain unchanged when using MSA as well as CBSA designations. Home health-based hospice agencies are anticipated to remain unchanged with the MSA designations but are anticipated to increase by 0.2 percent with CBSA designation. Hospital-based hospice agencies are anticipated to decrease slightly with both MSA and CBSA designations at 0.1 and 0.3 respectively. SNF-based hospice agencies with the lowest number of agencies and routine home care days of 15 and 174,000, respectively, are also anticipated to experience a decrease with both MSA and CBSA designations of 0.6 and 0.9, respectively.

As discussed above, the overall impact for hospice agencies remain unchanged using the CBSA designations with a slight decrease in urban and an increase in rural hospice agencies. While there are more decreases in urban hospice agencies, there is overall increase in the rural agencies. Hospice size remains virtually unchanged when comparing MSA to CBSA designations. Type of ownership and hospice base appear similar between the two designations. As a result, there is no compelling reason to maintain the use of the MSA designations as opposed to the CBSA designations based upon overall hospice agency impact.

3. Anticipated Effects

We have compared estimated payments using the FY 1983 hospice wage index to estimated payments using the proposed FY 2006 wage index and determined the current hospice wage index to be budget neutral. This impact analysis compares hospice payments using the FY 2005 hospice wage index

to the estimated payments using the proposed FY 2006 wage index. The data used in developing the quantitative analysis for this proposed rule were obtained from the June 2004 update of the national claims history file of all FY 2003 claims processed through June 2004. We deleted bills from hospices that have since closed. As discussed above, for the purposes of this proposed rule, this file is adequate to demonstrate the impact of using the MSA and proposed CBSA designations and is not intended to project the anticipated expenditures for FY 2006. We will be using an updated file for the final rule which will more accurately indicate the expected expenditures for FY 2006.

Table I demonstrates the results of our analysis. In column 2 of Table I, we indicate the number of routine home care days that were included in our analysis, although the analysis was performed on all types of hospice care. Column 3 indicates payments that were made using the FY 2005 wage index. Column 4 is based on claims (for hospices in business during that time period) and estimates payments (with the caveat as discussed above) to be made to hospices using proposed CBSA designations and FY 2006 wage index. The final column, which compares columns 3 and 4, shows the percent change in estimated hospice payments made based on the category of the hospice.

Table I categorizes hospices by various geographic and provider characteristics. The first row displays the results of the impact analysis for all Medicare-certified hospices. The second and third rows of the table categorize hospices according to their geographic location (urban and rural). Our analysis indicated that there are 1,494 hospices located in urban areas and 941 hospices located in rural areas. The next two groupings in the table indicate the number of hospices by census region, also broken down by urban and rural hospices. The sixth grouping shows the impact on hospices based on the size of the hospice's program. We determined that the majority of hospice payments are made at the routine home care rate. Therefore, we based the size of each individual hospice's program on the number of routine home care days provided in 2004. The next grouping shows the impact on hospices by type of ownership. The final grouping shows the impact on hospices defined by whether they are provider-based or freestanding.

Table II demonstrates the estimated payments using the CBSA and MSA designations. The groupings as well as columns 1 and 2 are the same as in

Table I. Columns 3 and 4 represent the estimated payments using the CBSA and MSA designations, respectively. Column 5 represents the percentage change in the estimated payments using CBSA designations compared with the estimated payments using the MSA designations.

Our analysis shows that the majority of hospices are in urban areas and provide the vast majority of routine

home care days. However, rural hospices are anticipated to receive a larger percent increase in payment of 0.8 percent in contrast to a decrease of 0.2 percent for urban hospices if CBSA designations were used in the proposed FY 2006 wage index. However, overall, there is no anticipated change using the CBSA designations.

Since the impact tables are intended to reflect the implementation of the

CBSA as opposed to the current MSA designations, the introduction of the wage indices is the only variable used in the computation. It is important to note that the payment rates used reflect the FY2005 rates. The FY 2006 payment rates would be adjusted to reflect the full FY 2006 hospital market basket, as required by section 1814(i)(1)(C)(ii)(VII) of the Act. We publish these rates through administrative issuances.

TABLE I.—IMPACT OF HOSPICE WAGE INDEX CHANGES BASED ON USE OF CBSA DESIGNATIONS

	Number of hospices (1)	Number of routine home care days in thousands (2)	Payments using FY 2005 wage index in thousands (3)	Estimated payments using FY 2006 wage index in thousands (CBSA designations) (4)	Percent change in hospice payments (CBSA designations) (5)
By Geographic Location:					
All Hospices	2,435	43,232	6,086,726	6,084,194	0.0
Urban Hospices	1,494	35,877	5,225,240	5,215,515	-0.2
Rural Hospices	941	7,355	861,486	868,680	0.8
By Region—Urban:					
New England	93	1,051	179,129	176,671	-1.4
Middle Atlantic	173	3,573	551,587	549,856	-0.3

List of Subjects for 42 CFR Part 418

Health facilities, Hospice care, Medicare, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services would amend 42 CFR part 418 as set forth below:

PART 418—HOSPICE CARE

1. The authority citation for part 418 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

2. Section 418.3 is amended by revising the definition of *Attending physician* to read as follows:

§ 418.3 Definitions.

* * * * *

Attending physician means a—(1)(i) Doctor of medicine or osteopathy legally authorized to practice medicine and surgery by the State in which he or she performs an action; or

(ii) Nurse practitioner who meets the training, education, and experience requirements as the Secretary may prescribe; and

(2) Is identified by the individual, at the time he or she elects to receive hospice care, as having the most significant role in the determination and delivery of the individual’s medical care.

* * * * *

3. Section 418.22 is amended by—

- A. Republishing the heading of paragraph (c) and paragraph (c)(1).
- B. Revising paragraph (c)(1)(ii).

The republication and revisions read as follows:

§ 418.22 Certification of terminal illness.

* * * * *

(c) *Sources of certification.* (1) For the initial 90-day period, the hospice must obtain written certification statements (and oral certification statements if required under paragraph (a)(3) of this section) from—

(i) * * *

(ii) The individual's attending physician, if the individual has an attending physician. The attending physician must meet the definition of physician specified in § 410.20 of this subchapter.

* * * * *

4. Section 418.302 is amended by revising paragraph (d) to read as follows:

§ 418.302 Payment procedures for hospice care.

* * * * *

(d)(1) The intermediary reimburses the hospice its appropriate payment amount for each day for which an eligible Medicare beneficiary is under the hospice's care.

(2) Effective December 8, 2003, if a hospice makes arrangements with another hospice to provide services under the circumstances specified in section 1861(dd)(5)(D) of the Act, the

intermediary reimburses the hospice for which the beneficiary has made an election as described in paragraph (d)(1) of this section.

* * * * *

5. Section 418.304 is amended by—

A. Revising the section heading.

B. Revising the introductory text of paragraph (a).

C. Adding a new paragraph (e).

The revisions and additions read as follows:

§ 418.304 Payment for physician and nurse practitioner services.

(a) The following services performed by hospice physicians and nurse practitioners are included in the rates described in § 418.302:

* * * * *

(e)(1) Effective December 8, 2003, Medicare pays for attending physician services provided by nurse practitioners to Medicare beneficiaries who have elected the hospice benefit and who have selected a nurse practitioner as their attending physician. This applies to nurse practitioners without regard to whether they are hospice employees.

(2) Nurse practitioners may bill and receive payment for services only if the—

(i) Nurse practitioner is the beneficiary's attending physician as defined in § 418.3;

(ii) Services are medically reasonable and necessary; and

(iii) Services are performed by a physician in the absence of the nurse practitioner; and

(iv) Services are not related to the certification of terminal illness specified in § 418.22.

(3) Payment for nurse practitioner services are made at 85 percent of the physician fee schedule amount.

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: April 7, 2005.

Mark B. McClellan,
Administrator, Centers for Medicare & Medicaid Services.

Approved: April 15, 2005.

Michael O. Leavitt,
Secretary.

Addendum

¹ This column lists each CBSA area name and each county or county equivalent, in the CBSA area. Counties not listed in this Table are considered to be rural areas. Wage Index values for these areas are found in Table B.

² Wage index values are based on FY 2000 hospital cost report data before reclassification. This wage index is further adjusted. Wage index values greater than 0.8 are subject to a budget neutrality adjustment calculated by multiplying the hospital wage index value for a given area by the proposed budget neutrality factor of 1.063479. Wage index values below 0.8 are adjusted to be the greater of a 15-percent increase, subject to a maximum wage index value of 0.8, or a budget neutrality adjustment calculated by multiplying the hospital wage index value for a given area by the budget neutrality factor. We have completed all of these adjustments and included them in the wage index values reflected in this table.

TABLE B.—HOSPICE WAGE INDEX FOR RURAL AREAS BY CBSA—Continued

CBSA code number	Nonurban area	Wage index ³
65	Guam	1.0221

³Wage index values are based on FY 2000 hospital cost report data before reclassification. This wage index is further adjusted. Wage index values greater than 0.8 are subject to a budget neutrality adjustment calculated by multiplying the hospital wage index value for a given area by the proposed budget neutrality factor of 1.063479. Wage index values below 0.8 are adjusted to be the greater of a 15-percent increase, subject to a maximum wage index value of 0.8, or a budget neutrality adjustment calculated by multiplying the hospital wage index value for a given area by the budget neutrality factor. We have completed all of these adjustments and included them in the wage index values reflected in this table.

⁴All counties within the State are classified as urban. Massachusetts has areas designated as rural, however, no short-term, acute care hospitals are located in the area(s) for FY 2006. Because more recent data is not available for those areas, we are using last year's wage index value.

⁵Based on CBSA designations Massachusetts has areas designated as rural. However, no IPPS hospitals are located in those rural area(s) for FY 2006. Because more recent data is not available for those areas, we are using the FY 2005 prefloor, preclassified hospital wage index value, for rural Massachusetts multiplied by the proposed FY 2006 budget neutrality factor of 1.063479.

TABLE C.—HOSPICE WAGE INDEX FOR URBAN AREAS BY MSA AND CBSA—Continued

MSA code number	Wage index ²	MSA urban area designations (Constituent counties or county equivalents) ¹	CBSA code number	Wage index ²
		Oconto, WI.		

¹ This column lists each MSA area name and each county or county equivalent, in the MSA area. Counties not listed in this Table are considered to be rural areas. Wage Index values for these areas are found in Table D.

² Wage index values are based on FY 2000 hospital cost report data before reclassification. This wage index is further adjusted. Wage index values greater than 0.8 are subject to a budget neutrality adjustment calculated by multiplying the hospital wage index value for a given area by a budget neutrality factor of 1.064435 for wage indices based on MSA designations and 1.063479 for wage indices based on CBSA designations. Wage index values below 0.8 are adjusted to be the greater of a 15-percent increase, subject to a maximum wage index value of 0.8, or a budget neutrality adjustment calculated by multiplying the hospital wage index value for a given area by the budget neutrality factor. We have completed all of these adjustments and included them in the wage index values reflected in this table.

TABLE D.—COMPARISON WAGE INDEX FOR RURAL AREAS BY MSA AND CBSA

TABLE D.—COMPARISON WAGE INDEX FOR RURAL AREAS BY MSA AND CBSA—Continued

MSA code number	Wage index ³ MSA designation	Nonurban area	CBSA code number	Wage index ³ CBSA designation
9965	1.0230	Guam	54	1.0221

³ Wage index values are based on FY 2000 hospital cost report data before reclassification. This wage index is further adjusted. Wage index values greater than 0.8 are subject to a budget neutrality adjustment calculated by multiplying the hospital wage index value for a given area by a proposed budget neutrality factor of 1.064435 for wage indices based on MSA designations and 1.063479 for wage indices based on CBSA designations. Wage index values below 0.8 are adjusted to be the greater of a 15-percent increase, subject to a maximum wage index value of 0.8, or a budget neutrality adjustment calculated by multiplying the hospital wage index value for a given area by the budget neutrality factor. We have completed all of these adjustments and included them in the wage index values reflected in this table.

⁴ All counties within the State are classified as urban.

⁵ Based on CBSA designations Massachusetts has areas designated as rural. However, no IPPS hospitals are located in those rural area(s) for FY 2006. Because more recent data is not available for those areas, we are using the FY 2005 prefloor, preclassified hospital wage index value, for rural Massachusetts multiplied by the proposed FY 2006 budget neutrality factor of 1.063479.

TABLE E.—RURAL COUNTIES CONVERTING TO URBAN COUNTIES BY STATE
