Federal Register

Vol. 70, No. 82

Friday, April 29, 2005

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Submission for OMB Review; Comment Request

April 25, 2005.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Pub. L. 104-13. Comments regarding (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), [OIRA\\_Submission@OMB.EOP.GOV](mailto:OIRA_Submission@OMB.EOP.GOV) or fax (202) 395-5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250-7602. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling (202) 720-8681.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it

displays a currently valid OMB control number.

### Food and Nutrition Service

*Title:* Child Nutrition Labeling Program.

*OMB Control Number:* 0584-0320.

*Summary of Collection:* The Child Nutrition Labeling Program is a voluntary technical assistance program administered by the Food and Nutrition Service (FNS). The program is designed to aid schools and institutions participating in the National School Lunch Program, the School Breakfast Program, the Child and Adult Care Food Program, and the Summer Food Service Program by, determining the contribution a commercial product makes towards the meal pattern requirements. The Child Nutrition Labeling Program is implemented in conjunction with existing label approval programs administered by the Food Safety and Inspection Service (FSIS), the Agricultural Marketing Service (AMS), and the U.S. Department of Commerce. To participate in the CN Labeling Program, industry submits labels to FNS of products that are in conformance with the FSIS label approval program (for meat and poultry), and the USDC label approval program (for seafood products).

*Need and Use of the Information:* FNS uses the information collected to aid school food authorities and other institutions participating in child nutrition programs in determining the contribution a commercial product makes towards the established meal pattern requirements. FNS uses all of the collected information to give the submitted label an approval status that indicates if the label can be used as part of the CN Labeling Program. Without the information CN Labeling Program would have no basis on which to determine how or if a product meets the meal pattern requirements.

*Description of Respondents:* Business or other for-profit; Federal Government.

*Number of Respondents:* 368.

*Frequency of Responses:* Reporting: Other (as needed).

*Total Burden Hours:* 1,995.

**Ruth Brown,**

*Departmental Information Collection Clearance Officer.*

## DEPARTMENT OF AGRICULTURE

### Submission for OMB Review; Comment Request

April 25, 2005.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB),

[OIRA\\_Submission@OMB.EOP.GOV](mailto:OIRA_Submission@OMB.EOP.GOV) or fax (202) 395-5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250-7602. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling (202) 720-8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

### Rural Housing Service

*Title:* 7 CFR 1951-E, "Servicing of Community and Direct Business Programs Loans and Grants"

*OMB Control Number:* 0575-0066.

*Summary of Collection:* Rural Development, hereinafter referred to as

Agency, is the credit agency for agricultural and rural development for the Department of Agriculture. The Agency offers supervised credit to build and operate family farms, modest housing, water and sewer systems, essential community facilities, and business and industrial operations in rural areas. Section 331 and 335 of the Consolidated Farm and Rural Development Act, as amended, authorize the Secretary of Agriculture, acting through the Agency, to establish provisions for security servicing policies for the loans and grants in questions. If there is a problem which exists, a recipient of the loan, grant, or loan guarantee must furnish financial information which is used to aid in resolving the problem through reamortization, sale, transfer, debt restructuring, liquidation, or other means provided in the regulations.

**Need and Use of the Information:** RHS will collect information to determine applicant/borrower eligibility and project feasibility for various servicing actions. The information enables field staff to ensure that borrowers operate on a sound basis and use loan and grant funds for authorized purposes.

**Description of Respondents:** State, Local or Tribal Government; Not-for-profit institutions.

**Number of Respondents:** 555.

**Frequency of Responses:** Reporting: On occasion.

**Total Burden Hours:** 1,175.

**Charlene Parker,**

*Departmental Information Collection Clearance Officer.*

## DEPARTMENT OF AGRICULTURE

### Forest Service

#### Site-Specific Invasive Plant Treatment Project—Mt. Hood National Forest and Columbia River Gorge National Scenic Area; Oregon

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The USDA Forest Service will prepare an Environmental Impact Statement (EIS) to document and disclose the potential environmental effects of proposed invasive plant treatments. The Proposed Action is to apply manual, mechanical, biological, and/or herbicide treatments to control known invasive plant sites within approximately 13,000 acres (208 sites)

on the Mt. Hood National Forest and southern Columbia River Gorge National Scenic Area in Oregon. The Proposed Action would also establish criteria for responding to infestations that cannot be predicted. This notice of intent revises the Notice to Intent to prepare an EIS announced in the **Federal Register** on February 23, 2004; more information will be submitted at a later date for the National Forest System lands in Washington.

**DATES:** Comments concerning the scope of this analysis must be received no later than May 31, 2005, to ensure they are fully incorporated into the Draft EIS.

**ADDRESSES:** Submit written comments to Jennie O'Connor, Mt. Hood National Forest, 16400 Champion Way, Sandy OR 97055. Electronic comments can be submitted to *comments-pacificnorthwest-mthood@fs.fed.us*.

**FOR FURTHER INFORMATION CONTACT:** Jennie O'Connor, Natural Resource Planner, Mt. Hood National Forest, 16400 Champion Way, Sandy OR 97055 or by emailing *jmoconnor@fs.fed.us* or by calling (503) 668-1645.

#### **SUPPLEMENTARY INFORMATION:**

##### **Need for the Proposal**

Invasive plants are compromising our ability to manage the National Forest for a healthy native ecosystem. Invasive plants create a host of environmental and other effects, most of which are harmful to native ecosystem processes, including: displacement of native plants; reduction in functionality of habitat and forage for wildlife and livestock; loss of threatened, endangered, and sensitive species; increased soil erosion and reduced water quality; alteration of physical and biological properties of soil, including reduced soil productivity; changes to the intensity and frequency of fires; high cost (dollars spent) of controlling invasive plants; and loss of recreation opportunities.

Approximately 3,000 acres of forests and grasslands are known to already be degraded on the Mt. Hood National Forest and Columbia River Gorge National Scenic Area by infestations of invasive, non-native plants. These infestations are situated on about 208 individual locations or sites. These infestations have a high potential to expand and further degrade forests and grasslands. Infested areas represent potential seed sources for further invasion onto neighboring lands.

There is an underlying need on these National Forest System lands for: (1) Reduce the extent of specific invasive plants at identified sites; and (2) timely treat new/additional invasive plant sites

that may appear in the future. Without action, invasive plant populations will continue to grow, compromising our ability to manage for healthy native ecosystems and contributing to the spread of invasive plants.

#### **Proposed Action**

The Proposed Action for this project is to treat approximately 13,000 infested acres and associated spread zones on the Mt. Hood National Forest and southern Columbia River Gorge National Scenic Area in Oregon. This includes 7 proposed treatment areas (2,000 acres) in the National Scenic Area, with the remainder of the sites on Mt. Hood National Forest. Treatment of these invasive plant sites would be a combination of manual, mechanical, biological, and herbicide treatment methods. Through the development long-term site goals, treatment of infested areas would be linked to revegetation and monitoring. Treatment would address 21 invasive plant species present on these sites.

Site-specific treatment prescriptions would be based on the biology of particular invasive plant species, site location, proximity to water, and size of the infestation. Prescriptions would follow integrated pest management principles. Integrated pest management (IPM) is a process by which one selects and applies a combination of management techniques (manual, mechanical, biological for example) that, together, would control a particular invasive plant species or infestation efficiently and effectively, with minimum adverse impacts to non-target organisms. IPM seeks to combine two or more management techniques which would interact to provide better control than any one of the actions might provide alone. It is typically species-specific, site-specific and designed to be practical with minimal risk.

On Mt. Hood National Forest and Columbia River Gorge National Scenic Area, the proposed action includes approximately 20 acres of biological treatment, 30 acres of herbicide only treatment, 510 acres of herbicide plus manual treatments, 2025 acres of herbicide plus mechanical treatments, 130 acres of manual plus mechanical treatments, and 10385 acres of herbicide plus manual and mechanical treatments. Treatments may be repeated over several years until control/restoration objectives are met. The proportion of specific treatment methods may change over time.

In addition, a set of criteria that can be used for future invasive plant sites that may occur would also be established under the Proposed Action.
