Title: Reporting Requirements Under EPA's Green Power Partnership and CHP Partnership—EPA ICR No. 2173.01.

Abstract: In an effort to aid implementation of the President's May 2001 National Energy Strategy, as well as the President's February 2002 Climate Change Strategy, EPA has launched two new partnership programs with industry and other stakeholders: The Green Power Partnership and the CHP Partnership. These partnership programs encourage organizations to invest in clean, efficient energy technologies, including renewable energy and CHP.

The EPA has developed this ICR to obtain authorization to collect information from organizations participating in the Green Power Partnership and CHP Partnership to ensure that they are meeting their voluntary renewable energy and CHP goals and to assure the credibility of these partnership programs. Organizations that join these programs voluntarily agree to the following respective actions: (1) Designating a Green Power or CHP Partnership liaison; (2) for the Green Power Partnership, reporting to EPA, on an annual basis, their progress toward their green power commitment via a 1-page Green Power Partner Yearly Report; (3) for the CHP Partnership, reporting to EPA information on their existing CHP projects and project development activity via the CHP Partner Projects Data Form. The EPA uses the data obtained from its Partners to assess the success of these programs in achieving their national energy and greenhouse gas reduction goals.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement: The annual public reporting and recordkeeping burden for this three (3) year collection of information is estimated to equal 3,980 hours and to average 3.4 hours per year per respondent. The average number of annual burden hours per type of response is: 4.9 hours for a Letter of Intent (a one-time burden for Green Power and CHP Partners); for the Green Power Partnership, 2.4 hours for the Green Power Partner Yearly Report; for the CHP Partnership, 2.0 hours for end user Partners to complete the CHP Partner Projects Data Form report on completed CHP projects (a one-time report), or 1.7 hours per year for CHP project updates for Partners with ongoing CHP project development activities.

Partners from both programs may also submit voluntary updates of simple information, such as contact information or company profiles, via the Web site. These updates would take from 15 minutes to 0.5 hours per response. A subset of Partners may participate in brief (*i.e.*, 15 minute) telephone calls with EPA to clarify questions pertaining to the Letter of Intent, Green Power Partner Yearly Report, or CHP Partner Projects Data Form. All of these activities are included in the annual burden estimate.

The estimated number of annual respondents averaged over three (3) years is 1,164, which includes an average of 1,033 respondents for the Green Power Partnership and 131 for the CHP Partnership.

There are no capital or start-up costs associated with this information collection. The average annual operation and maintenance cost resulting from this (3) three year collection of information is \$3 per respondent. The average annual labor cost is \$254 per respondent. The resulting total annual cost averaged over the three year period is \$298,886.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of

collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: April 19, 2005.

Kathleen Hogan,

Director, Climate Protection Partnerships Division.
