institutions, state, local, and tribal agencies that voluntarily agree to work with EPA to purchase or market green power or to support the use of CHP.

**Title:** Reporting Requirements Under EPA's Green Power Partnership and CHP Partnership—EPA ICR No. 2173.01.

**Abstract:** In an effort to aid implementation of the President's May 2001 National Energy Strategy, as well as the President's February 2002 Climate Change Strategy, EPA has launched two new partnership programs with industry and other stakeholders: The Green Power Partnership and the CHP Partnership. These partnership programs encourage organizations to invest in clean, efficient energy technologies, including renewable energy and CHP.

The EPA has developed this ICR to obtain authorization to collect information from organizations participating in the Green Power Partnership and CHP Partnership to ensure that they are meeting their voluntary renewable energy and CHP goals and to assure the credibility of these partnership programs. Organizations that join these programs voluntarily agree to the following respective actions: (1) Designating a Green Power or CHP Partnership liaison; (2) for the Green Power Partnership, reporting to EPA, on an annual basis, their progress toward their green power commitment via a 1-page Green Power Partner Yearly Report; (3) for the CHP Partnership, reporting to EPA information on their existing CHP projects and project development activity via the CHP Partner Projects Data Form. The EPA uses the data obtained from its Partners to assess the success of these programs in achieving their national energy and greenhouse gas reduction goals.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
