functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of this information:

(1) *Type of information collection:* New collection.

(2) *Title of the Form/Collection:* Supplemental Victimization Survey (SVS).

(3) *Agency form number, if any, and the applicable component of the department sponsoring the collection:* SVS-1. Department of Justice, Office of Justice Programs, Bureau of Justice Statistics.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households. Persons 18 years or older in 658 Primary Sampling Units (PSUs) in the United States. The Supplemental Victimization Survey (SVS) to the National Crime Victimization Survey collects, analyzes, publishes, and disseminates statistics on the nature and consequences of a series of harassing or unwanted contacts or behaviors directed toward respondents that made them feel fearful, concerned, angry, or annoyed, commonly known as "stalking".

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply:* Approximately 86,850 persons 18 years of age or older will complete an SVS interview. The majority of respondents, approximately 85,982, will be administered only the screening portion of the SVS which are designed to filter out those people who have not been victims of repetitive harassing or unwanted contacts and therefore are not eligible to continue with the remainder of the supplement questions. We estimate the average length of the SVS interview for these individuals will be three minutes. The complement of this group of respondents is those who had such contacts. Due to the rarity of this type of crime, we expect only about 1 percent

or 868 of the respondents to report being a victim of this type of behavior within the 12 months preceding the interview. We estimate each of these interviews will take 0.167 hours (10 minutes) to complete.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total respondent burden is approximately 4,444 hours.
