## I. General Information

### A. Introduction

1. The *Auction No. 60 Procedures Public Notice* announces the procedures and minimum opening bid amounts for the upcoming auction of licenses in the Lower 700 MHz band C block (710-716/740-746 MHz) scheduled for July 20, 2005 (Auction No. 60). On January 26, 2005, in accordance with Section 309(j)(4) of the Communications Act of 1934, as amended, the Wireless Telecommunications Bureau ("Bureau") released a public notice seeking comment on reserve prices or minimum opening bid amounts and the procedures to be used in Auction No. 60. The Bureau received no comments in response to the *Auction No. 60 Comment Public Notice*, 70 FR 6436, (February 7, 2005).

#### i. Background of Proceeding

2. On January 18, 2002, the Commission released the *Lower 700 MHz Report and Order*, 67 FR 45380 (July 9, 2002) which adopted allocation and service rules for the Lower 700 MHz Band. Specifically, the Commission reallocated the entire 48 megahertz of spectrum in the Lower 700 MHz band to fixed and mobile services and retained the existing broadcast allocation for both new broadcast services and incumbent broadcast services during their transition to digital television ("DTV"). The Commission established technical criteria designed to protect incumbent television operations in the band during the DTV transition period, allowed low power television ("LPTV") and TV translator stations to retain secondary status and operate in the band after the transition, and set forth a mechanism by which pending broadcast applications may be amended to provide analog or digital service in the core television spectrum or to provide digital service on TV Channels 52-58.

3. In its service rules, the Commission divided the Lower 700 MHz band into three 12-megahertz blocks, with each block consisting of a pair of 6-megahertz segments, and two 6-megahertz blocks of contiguous, unpaired spectrum. The Commission decided to divide the five blocks in the Lower 700 MHz band plan as follows: for the two 6-megahertz blocks of contiguous unpaired spectrum, as well as two of the three 12-megahertz blocks of paired spectrum,
