

results of scoping and the resource capabilities within the project area, alternatives including a "no-action" alternative will be developed for the Draft Environmental Impact Statement. Subsistence hearings, as provided for in Title VIII, Section 810 of the Alaska National Interest Lands Conservation Act (ANILCA), will be conducted, if necessary, during the comment period for the Draft Environmental Impact Statement. A draft environmental impact statement will be prepared for comment. The comment period on the Draft Environmental Impact Statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the Draft Environmental Impact Statement stage but that are not raised until after completion of the Final Environmental Impact Statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the Final Environmental Impact Statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the Draft Environmental Impact Statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the Draft Environmental Impact Statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

Comments submitted anonymously will be accepted and considered; however, those who submit anonymous comments will not have standing to appeal the subsequent decision under 36 CFR parts 215 or 217. Additionally, pursuant to 7 CFR 1.27(d), any person may require the agency to withhold submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Requesters should be aware that, under FOIA, confidentiality may be granted in only very limited circumstance, such as to protect trade secrets. The Forest Service will inform the requester of the agency's decision regarding the request of confidentiality, and where the request is denied; the agency will return the submission and notify the requester that the comments may be resubmitted with or without name and address within seven days.

To be most helpful and timely, scoping comments should be received within 30 days of the publication of this Notice of Intent. Public scoping meetings are planned for mid-May at four locations on Price of Wales Island where written comments can be given.

Preliminary Issues

Based on preliminary analysis and internal scoping efforts, we have developed an initial list of issues to be analyzed in the EIS:

- Increased hunting and trapping pressure, as a result of additional open road densities, may have an adverse affect on the wolf population in the project area.
- Cumulative effects of the proposed harvest and road construction may increase sedimentation, which could alter stream channel morphology and degrade fish habitat in the project area.
- The proposed action may adversely affect deer winter range, which could affect subsistence and sport hunting of deer.
- The proposed action would benefit local communities by providing additional employment opportunities and income.

Permits or Licenses Required

Permits required for implementation include the following:

1. U.S. Army Corp of Engineers:
 - Approval of discharge of dredge or fill material into the waters for the United States under Section 404 of the Clean Water Act;
 - Approval of the construction of

structures or work in navigable waters of the United States under Section 10 of the Rivers and Harbor Act of 1899;

2. Environmental Protection Agency:
 - General National Pollutant Discharge Elimination System for Log Transfer Facilities in Alaska;
 - Review Spill Prevention Control and Countermeasure Plan;
3. State of Alaska, Department of Natural Resources:
 - Tideland Permit and Lease or Easement;
 - Certification of Compliance with Alaska Water Quality Standards (401 Certification) Chapter 20;
4. Office of Project Management & Permitting (DNR):
 - Coastal Zone Consistency Determination concurrence.

Responsible Official

Forrest Cole, Forest Supervisor, Tongass National Forest Supervisor, Federal Building, 648 Mission Street, Ketchikan, Alaska 99901.

Nature of Decision To Be Made

The Forest Supervisor will decide: (1) The estimated timber volume to make available from the project, as well as the location, design, and scheduling of timber harvest, road construction and reconstruction, and silvicultural practices used; (2) access management measures (road, trail, and area restrictions and closures); (3) mitigation measures and monitoring requirements; (4) whether to make adjustments to the small old-growth reserve (OGR) in VCU 5700; and (5) whether there may be a significant restriction on subsistence uses.
