### Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

#### Annex Item No. vii

#### (vii) Sensitivity of Technology:

**1. The AEGIS Weapon System (AWS) hardware is unclassified, with the exception of the RF oscillator used in the Fire Control transmitter, which is classified Confidential. AEGIS documentation in general is unclassified; however, seven operation and maintenance manuals are classified Confidential, and one AEGIS maintenance manual supplement is classified Secret. The manuals and technical documents are limited to those necessary for operational and organizational maintenance.**

**2. While the hardware associated with the AN/SPY-1D(V) radar is unclassified, the computer programs are classified Secret. It is the combination of the AN/SPY-1D(V) hardware and the computer programs for the AN/SPY-1D(V) radar that constitutes the sensitive technology. The SPY-1D(V) radar hardware design and production data will not be released with this proposed sale. Some computer program documentation at the Secret level explaining the capabilities of the systems will be released to support Australian understanding of U.S. computer program development efforts. No computer program design data will be released at this time. The U.S. Navy will perform life cycle maintenance of the AEGIS weapons system computer programs.**

**3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.**
