

master files, documentation, backups, and electronic mail and word processing copies associated with an electronic system used to maintain summary information concerning disbursements.

7. Small Business Administration, Office of the Chief Information Officer, Denver Finance Center (N1-309-05-2, 5 items, 5 temporary items). Inputs, master files, documentation, backups, and electronic mail and word processing copies associated with an electronic system used to warehouse summary information concerning inter-agency transfers of funds.

8. Small Business Administration, Office of the Chief Financial Officer, Denver Finance Center (N1-309-05-3, 5 items, 5 temporary items). Inputs, master files, documentation, backups, and electronic mail and word processing copies associated with an electronic system used to warehouse summary information concerning collections.

9. Small Business Administration, Office of the Chief Financial Officer, Denver Finance Center (N1-309-05-4, 5 items, 5 temporary items). Outputs, master files, documentation, backups, and electronic mail and word processing copies associated with an electronic system used in connection with reconciled statements of cash activity.

10. Small Business Administration, Office of the Chief Information Officer, Denver Finance Center (N1-309-05-5, 4 items, 4 temporary items). Master files, documentation, backups, and electronic mail and word processing copies associated with an electronic system used to support general ledger reconciliations.

11. Small Business Administration, Agency-wide (N1-309-05-6, 15 items, 15 temporary items). Inputs, outputs, master files, documentation, backups, and electronic mail and word processing copies associated with an electronic system used to maintain general ledgers and create financial statements and reports.

12. Social Security Administration, Office of Disability and Income Security Programs (N1-47-05-2, 14 items, 14 temporary items). Case files and other records relating to Medicare claims. Also included are electronic copies of records created using electronic mail and word processing. This schedule authorizes the agency to apply the proposed disposition instructions to any recordkeeping medium.

Dated: June 6, 2005.

Michael J. Kurtz,

Assistant Archivist for Records Services—Washington, DC.

BILLING CODE 7515-01-U

NATIONAL SCIENCE FOUNDATION

Notice of Intent to Seek Approval to Establish an Information Collection

AGENCY: National Science Foundation.

ACTION: Notice and Request for Comments.

SUMMARY: The National Science Foundation (NSF) is announcing plans to request clearance of this collection. In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 (Pub. L. 104-13), we are providing opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting that OMB approve clearance of this collection for no longer than three years.

DATES: Written comments on this notice must be received by August 12, 2005 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

For Additional Information or Comments: Contact Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230; telephone (703) 292-7556; or send e-mail to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday. You also may obtain a copy of the data collection instrument and instructions from Ms. Plimpton.

SUPPLEMENTARY INFORMATION:

OMB Number: 3145-NEW.

Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to establish an information collection.

Abstract:

Proposed Project:

Task 1

NSF's priority area in Nanoscale Science & Engineering (NS&E) has been funded since FY 2001 and is funded at approximately \$335 million in FY 2005. The goals of the NS&E priority area are to support fundamental knowledge creation across disciplinary principles, phenomena, and tools at the nanoscale,

and to catalyze synergistic science and engineering research and education in emerging areas of nanoscale science and technology. A NSF contractor will study partnerships and knowledge transfer and innovation activities related to (1) NS&E (Nanoscale Interdisciplinary Research Team (NIRT) and Nanoscale Science and Engineering Center (NSEC) awards made during FY 2001-2004 and (2) NSF awards to two networks that work closely with NS&E—the National Nanotechnology Infrastructure Network (NNIN) and the Network for Computational Nanotechnology (NCN).

Using a standard set of definitions to ensure comparability across awards, the contractor will collect data on patents; licenses; state, local, and industrial partnerships; start-up companies; and other indicators of technology transfer and collaboration with state and local governments and industry. To the extent possible, the contractor will also collect data on state and private investments in activities that complement or build upon the NSF awards. For geographic areas where there has been significant NSF funding under these activities, the contractor may propose to provide an initial assessment of the contribution of these awards to the regional economy. The contractor's data collection shall include, but need not be limited to, gathering information from public and private databases and conducting interviews with NS&E grantees to fill remaining gaps. The data will be integrated into a database with information on each award. The database will be consistent with the database that the EEC Division has constructed for the NSECs.

The analyses will summarize the data overall and by mode of funding (NIRT, NSEC, NNIN, NCN) and identify key topics, if any that are a major focus for knowledge transfer and partnerships.

Task 2

The subcontractor will define and present alternative methodologies for documenting the creation of an interdisciplinary research community in nanotechnology. These methodologies shall provide a means to qualitatively assess the size and scope of the interdisciplinary research community in nanoscience and nanoengineering from the period 2001-2004. This analysis will also provide a basis for determining how collaborations lead to new directions in research and education in nanoscience and engineering. Most of the data for this effort will be gathered directly from the Internet. However, the contractor may contact selected NS&E, NNIN, or NCN awardees to fill data gaps or to confirm data.

Estimate of Burden: task 1–10 hours. Task 2–2 hours.

Respondents: Individuals and not-for-profit organizations.

Number of Respondents: There are approximately 260 recipients and plans call for contacting 50% of them.

Estimated Number of Responses per Survey: One.

Comments: Comments are invited on (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents; including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: June 7, 2005.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* Notice of Enforcement Discretion (NOEDs) for Operating Power

Reactors and Gaseous Diffusion Plants (GDP).

3. *The form number if applicable:* Not applicable.

4. How often the collection is required: On occasion.

5. *Who will be required or asked to report:* Nuclear power reactor licensees and gaseous diffusion plant certificate holders.

6. *An estimate of the number of annual responses:* 26.

7. *The estimated number of annual respondents:* 11.

8. *An estimate of the total number of hours needed annually to complete the requirement or request:* 1,991 hours (1810 reporting [121 hours per response] and 181 recordkeeping [16.45 hours per recordkeeper]).

9. *An indication of whether Section 3507(d), Pub. L. 104–13 applies:* Not applicable.

10. *Abstract:* The NRC's Enforcement Policy addresses circumstances in which the NRC may exercise enforcement discretion. A specific type of enforcement discretion is designated as a Notice of Enforcement Discretion (NOED) and relates to circumstances which may arise where a nuclear power plant licensee's compliance with a Technical Specification Limiting Condition for Operation or with other license conditions would involve an unnecessary plant transient or shutdown, or performance of testing, inspection, or system realignment that is inappropriate for the specific plant conditions, or unnecessary delays in plant startup without a corresponding health and safety benefit. Similarly, for a gaseous diffusion plant, circumstances may arise where compliance with a Technical Safety Requirement or other condition would unnecessarily call for a total plant shutdown, or, notwithstanding that a safety, safeguards or security feature was degraded or inoperable, compliance would unnecessarily place the plant in a transient or condition where those features could be required.

A licensee or certificate holder seeking the issuance of an NOED must provide a written justification, in accordance with guidance provided in NRC Inspection Manual, Part 9900, which documents the safety basis for the request and provides whatever other information the NRC staff deems necessary to decide whether or not to exercise discretion.

A copy of the final supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O–1 F21, Rockville, MD 20852. OMB clearance requests are

available at the NRC Worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by July 13, 2005. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date. John A. Asalone, Office of Information and Regulatory Affairs (3150–0136), NEOB–10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be e-mailed to John_A._Asalone@omb.eop.gov or submitted by telephone at (202) 395–4650.

The NRC Clearance Officer is Brenda Jo. Shelton, 301–415–7233.

Dated at Rockville, Maryland, this 6th day of June, 2005.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,

NRC Clearance Officer, Office of Information Services.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–325 and 50–324]

Carolina Power & Light Company, Brunswick Steam Electric Plant, Units 1 and 2; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License No. DPR–71 and Facility Operating License No. DPR–62 issued to Carolina Power & Light Company (the licensee), for operation of the Brunswick Steam Electric Plant, Units 1 and 2, located in Brunswick County, North Carolina.

The proposed changes replace the existing requirement of Technical Specification (TS) 3.4.5, "RCS [Reactor Coolant System] Leakage Detection Instrumentation," Required Action D.1, to enter Limiting Condition for Operation (LCO) 3.0.3 if required leakage detection systems are inoperable with the requirement to be in Mode 3 within 12 hours and Mode 4 within 36 hours.
