

cylinders, engines (gasoline, liquid propane) and related parts, hydraulic cylinders and related parts, pumps, air/oil/fuel/hydraulic filters, pneumatic and hydraulic valves, valves, bearings, hub/bearings, transmissions and related parts, transmission belts, crankshafts, gears, torque converters, flywheels, pulleys, clutches, couplings/u-joints, chains, sprockets, metal gaskets, electrical connectors, electric motors, generators, transformers, rotors, stators, power supplies, converters, spark plugs, ignition coils and distributors, starter motors, relays, switches, horns, capacitors, resistors, printed circuits/assemblies, fuses, controllers, circuit breakers and protectors, electrical connectors, conductors, lamps/lighting equipment, photovoltaic cells, ignition wiring harnesses, thermostats, measuring instruments (gauges), speedometers, tachometers, fiber optic cable, and seats (duty rate range: free – 9.0%).

FTZ procedures would exempt NFC from Customs duty payments on the foreign components used in export production. On its domestic sales and exports to NAFTA markets, the company would be able to choose the duty rate that applies to finished fork-lift trucks (duty free) for the foreign-sourced inputs noted above. Duties would be deferred or reduced on foreign production equipment admitted to the proposed subzone until which time it becomes operational. The application indicates that subzone status would help improve the facilities' international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the following addresses:
