

Average Burden Per Response: 5 minutes.

Frequency: On occasion.

SUPPLEMENTARY INFORMATION: All survey questionnaires are carefully selected to minimize undue burden on the public and are subject to internal controls and pre-testing before actual use.

Duplication is avoided by close coordination with state and local agencies as well as other Federal agencies and, whenever possible, participation in joint data collection efforts. Most of the Corps of Engineers civil works survey information is collected for very unique circumstances, such as visitor information at Corps recreation areas or flood damage information related to the Corps evaluation procedures. Much of this information is required to be very current and must be updated every one to two years.
