

Population Within the DNL Contours”, Table 16 “2009 DNL Contour Area”, and Table 17 “2009 Population Within the DNL Contours”. The FAA has determined that these noise exposure maps and accompanying documentation are in compliance with applicable requirements. This determination is effective on June 22, 2005.

FAA’s determination on the airport operator’s noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in appendix A of FAR part 150. Such determination does not constitute approval of the applicant’s data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program. If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 47503 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 47506 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under part 150 or through FAA’s review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 47503 of the Act. The FAA has relied on the certification by the airport operator, under section 150.21 of FAR part 150, that the statutorily required consultation has been accomplished.

Copies of the full noise exposure maps documentation and of the FAA’s evaluation of the maps are available for examination at the following locations: Federal Aviation Administration, Orlando Airports District Office, 5950 Hazeltine National Dr., Suite 400, Orlando, Florida 32822; Sanford Airport Authority, 1200 Red Cleveland Boulevard, Sanford, Florida 32773.

Pipeline and Hazardous Materials Safety Administration

[Docket No. RSPA-2005-20036 (Notice No. 05-5)]

Information Collection Activity Under OMB Review

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comments. The ICR

describes the nature of the information collection and its expected burden. The Federal Register Notice with a 60-day comment period soliciting comments on the following information collection was published on April 14, 2005 [70 FR 19837].

DATES: Comments must be submitted on or before July 28, 2005.

FOR FURTHER INFORMATION CONTACT: Deborah Boothe or T. Glenn Foster, Office of Hazardous Materials Standards (PHH-11), Pipeline and Hazardous Materials Safety Administration, Room 8430, 400 Seventh Street, SW., Washington, DC 20590-0001, Telephone (202) 366-8553.

SUPPLEMENTARY INFORMATION:

Title: Testing, Inspection, and Marking Requirements for Cylinders.
OMB Control Number: 2137-0022.

Type of Request: Extension of a currently approved collection.

Abstract: Requirements in § 173.34 for qualification, maintenance and use of cylinders require that cylinders be periodically inspected and retested to ensure continuing compliance with packaging standards. Information collection requirements address registration of retesters and marking of cylinders by retesters with their identification number and retest date following the completion of tests. Records showing the results of inspections and retests must be retained by the cylinder owner or designated agent until expiration of the retest period or until the cylinder is reinspected or retested, whichever occurs first. These requirements are intended to ensure that retesters possess the qualifications necessary to perform tests and to identify to cylinder fillers and users that cylinders are qualified for continuing use. Information collection requirements in § 173.303 require that fillers of acetylene cylinders maintain, for at least 30 days, a daily record of the representative pressure to which cylinders are filled.

Affected Public: Fillers, owners, users and retesters of reusable cylinders.

Estimated Number of Respondents: 139,352.

Estimated Number of Responses: 153,287.

Annual Estimated Burden Hours: 168,431.

Frequency of Collection: On occasion.

ADDRESSES: Send comments regarding the burden estimate, including suggestions for reducing the burden, to the Office of Management and Budget, Attention: Desk Officer for PHMSA, 725 17th Street, NW., Washington, DC 20503.

Comments are invited on: whether the proposed collection of information is

necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

A comment to OMB is most effective if OMB receives it within 30 days of publication.

Issued in Washington, DC on June 21, 2005.

Susan Gorsky,

Acting Director, Office of Hazardous Materials Standards.
