Title: Testing, Inspection, and Marking Requirements for Cylinders.
OMB Control Number: 2137-0022.

Type of Request: Extension of a currently approved collection.

Abstract: Requirements in § 173.34 for qualification, maintenance and use of cylinders require that cylinders be periodically inspected and retested to ensure continuing compliance with packaging standards. Information collection requirements address registration of retesters and marking of cylinders by retesters with their identification number and retest date following the completion of tests. Records showing the results of inspections and retests must be retained by the cylinder owner or designated agent until expiration of the retest period or until the cylinder is reinspected or retested, whichever occurs first. These requirements are intended to ensure that retesters possess the qualifications necessary to perform tests and to identify to cylinder fillers and users that cylinders are qualified for continuing use. Information collection requirements in § 173.303 require that fillers of acetylene cylinders maintain, for at least 30 days, a daily record of the representative pressure to which cylinders are filled.

Affected Public: Fillers, owners, users and retesters of reusable cylinders.

Estimated Number of Respondents: 139,352.

Estimated Number of Responses: 153,287.

Annual Estimated Burden Hours: 168,431.

A comment to OMB is most effective if OMB receives it within 30 days of publication.

Issued in Washington, DC on June 21, 2005.
