k. This application has been accepted for filing.

l. The applicant would increase the project's generating capacity to 3,650 kW by installing a second, 500-kW vertical turbine/generator. The new unit would be located adjacent to the existing powerhouse inside the river outlet works structure and would discharge into the same tailrace as the existing turbine via a weir box. The new unit would use water being released from the reservoir for other purposes, and operation of the dam would not be changed to increase power production.
