

consequences; and applicable laws, regulations and policies; in making the decision and stating the rationale in the Record of Decision. Alternatives would be developed to meet the objectives and criteria for small old-growth reserves. Four of the five VCU's in the project area requires small old-growth reserves. The effect of past and future harvest activities, along with existing and planned transportation routes would be studied.

(Authority: 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21.)

Dated: June 24, 2005.

Forrest Cole,

Forest Supervisor.

BILLING CODE 3410-11-M

DEPARTMENT OF AGRICULTURE

Forest Service

Opal Creek Scenic Recreation Area (SRA) Advisory Council

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Opal Creek Scenic Recreation Area Advisory Council is participating in a field tour on July 23, 2005. The field trip is scheduled to begin at 10 a.m., and will conclude at approximately 3:30 p.m. Participants will meet at Oregon Department of Forestry Office (ODF) located on N. Fork Road and Highway 22 in Mehema, Oregon. Attendance by the public must be arranged one week in advance with the Designated Federal Official listed below.

The Opal Creek Wilderness and Opal Creek Scenic Recreation Area Act of 1996 (Opal Creek Act) (Pub. L. 104-208) directed the Secretary of Agriculture to establish the Opal Creek Scenic Recreation Area Advisory Council. The Advisory Council is comprised of thirteen members representing state, county and city governments, and representatives of various organizations, which include mining industry, environmental organizations, inholders in Opal Creek Scenic Recreation Area, economic development, Indian tribes, adjacent landowners and recreation interests. The council provides advice to the Secretary of Agriculture on preparation of a comprehensive Opal Creek Management Plan for the SRA, and consults on a periodic and regular basis on the management of the area. Tentative itinerary includes visiting and discussing current issues at Pearl Creek Guard Station about restoration, popular

dispersed sites and Three Pools about use issues, and SRA entrance about transportation planning and signing.

A public comment period is tentatively scheduled to begin at 3 p.m. at the ODF office. Time allotted for individual presentations will be limited to 3 minutes. Written comments are encouraged, particularly if the material cannot be presented within the time limits of the comment period. Written comments may be submitted prior to the July 23rd by sending them to Designated Federal Official Paul Matter at the address given below.

FOR FURTHER INFORMATION CONTACT: For more information regarding this meeting, contact Designated Federal Official Paul Matter; Willamette National Forest, Detroit Ranger District, HC 73 Box 320, Mill City, OR 97360; (503) 854-3366.

Dated: June 29, 2005.

Dallas J. Emch,

Forest Supervisor

DEPARTMENT OF COMMERCE

International Trade Administration

[A-274-804]

Notice of Final Results of Antidumping Duty Changed Circumstances Review: Carbon and Certain Alloy Steel Wire Rod from Trinidad and Tobago

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department has determined that Mittal Steel Point Lisas Limited (Mittal) is the successor-in-interest to Carribean Ispat Limited (CIL) and, as a result, should be accorded the same treatment previously accorded to CIL in regard to the antidumping order on steel wire rod from Trinidad and Tobago as of the date of publication of this notice in the **Federal Register**.

EFFECTIVE DATE: July 6, 2005.

FOR FURTHER INFORMATION CONTACT: Dennis McClure or Victoria Cho, at (202) 482-5973 or (202) 482-5075, respectively; AD/CVD Operations, Office 3, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On March 21, 2005, the petitioners¹ requested that the Department determine whether Mittal had become the successor-in-interest of CIL, pursuant to section 751(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.216 and 351.221(c)(3). On April 6, 2005, CIL requested that the Department initiate and conduct an expedited changed circumstances review to determine whether Mittal is the successor-in-interest to CIL.

On May 2, 2005, the Department initiated this review and made its preliminary determination that Mittal is the successor-in-interest to CIL and should be treated as such for antidumping cash deposit purposes. See *Notice of Initiation and Preliminary Results of Changed Circumstances Antidumping Duty Administrative Review: Carbon and Certain Alloy Steel Wire Rod from Trinidad and Tobago*, 70 FR 22634 (May 2, 2005) (*Preliminary Results*). In the *Preliminary Results*, we stated that interested parties could request a hearing or submit case briefs and/or written comments to the Department no later than 30 days after publication of the *Preliminary Results* notice in the **Federal Register**, and submit rebuttal briefs, limited to the issues raised in those case briefs, seven days subsequent to the case briefs due date. We did not receive any hearing requests or comments on the *Preliminary Results*.

Scope of the Order

The merchandise subject to this order is certain hot-rolled products of carbon steel and alloy steel, in coils, of approximately round cross section, 5.00 mm or more, but less than 19.00 mm, in solid cross-sectional diameter.

Specifically excluded are steel products possessing the above-noted physical characteristics and meeting the Harmonized Tariff Schedule of the United States (HTSUS) definitions for (a) stainless steel; (b) tool steel; (c) high nickel steel; (d) ball bearing steel; and (e) concrete reinforcing bars and rods. Also excluded are (f) free machining steel products (i.e., products that contain by weight one or more of the following elements: 0.03 percent or more of lead, 0.05 percent or more of bismuth, 0.08 percent or more of sulfur, more than 0.04 percent of phosphorus, more than 0.05 percent of selenium, or more than 0.01 percent of tellurium).

Also excluded from the scope are 1080 grade tire cord quality wire rod

¹ ISG Georgetown Inc., Gerdau Ameristeel US Inc., Keystone Consolidated Industries Inc., and North Star Steel Texas Inc.

and 1080 grade tire bead quality wire rod. This grade 1080 tire cord quality rod is defined as: (i) grade 1080 tire cord quality wire rod measuring 5.0 mm or more but not more than 6.0 mm in cross-sectional diameter; (ii) with an average partial decarburization of no more than 70 microns in depth (maximum individual 200 microns); (iii) having no non-deformable inclusions greater than 20 microns and no deformable inclusions greater than 35 microns; (iv) having a carbon segregation per heat average of 3.0 or better using European Method NFA 04-114; (v) having a surface quality with no surface defects of a length greater than 0.15 mm; (vi) capable of being drawn to a diameter of 0.30 mm or less with 3 or fewer breaks per ton, and (vii) containing by weight the following elements in the proportions shown: (1) 0.78 percent or more of carbon, (2) less than 0.01 percent of aluminum, (3) 0.040 percent or less, in the aggregate, of phosphorus and sulfur, (4) 0.006 percent or less of nitrogen, and (5) not more than 0.15 percent, in the aggregate, of copper, nickel and chromium.

This grade 1080 tire bead quality rod is defined as: (i) grade 1080 tire bead quality wire rod measuring 5.5 mm or more but not more than 7.0 mm in cross-sectional diameter; (ii) with an average partial decarburization of no more than 70 microns in depth (maximum individual 200 microns); (iii) having no non-deformable inclusions greater than 20 microns and no deformable inclusions greater than 35 microns; (iv) having a carbon segregation per heat average of 3.0 or better using European Method NFA 04-114; (v) having a surface quality with no surface defects of a length greater than 0.2 mm; (vi) capable of being drawn to a diameter of 0.78 mm or larger with 0.5 or fewer breaks per ton; and (vii) containing by weight the following elements in the proportions shown: (1) 0.78 percent or more of carbon, (2) less than 0.01 percent of soluble aluminum, (3) 0.040 percent or less, in the aggregate, of phosphorus and sulfur, (4) 0.008 percent or less of nitrogen, and (5) either not more than 0.15 percent, in the aggregate, of copper, nickel and chromium (if chromium is not specified), or not more than 0.10 percent in the aggregate of copper and nickel and a chromium content of 0.24 to 0.30 percent (if chromium is specified).

For purposes of the grade 1080 tire cord quality wire rod and the grade 1080 tire bead quality wire rod, an inclusion will be considered to be deformable if its ratio of length (measured along the axis - that is, the direction of rolling - of the rod) over

thickness (measured on the same inclusion in a direction perpendicular to the axis of the rod) is equal to or greater than three. The size of an inclusion for purposes of the 20 microns and 35 microns limitations is the measurement of the largest dimension observed on a longitudinal section measured in a direction perpendicular to the axis of the rod. This measurement methodology applies only to inclusions on certain grade 1080 tire cord quality wire rod and certain grade 1080 tire bead quality wire rod that are entered, or withdrawn from warehouse, for consumption on or after July 24, 2003. *Carbon and Certain Alloy Steel Wire Rod from Brazil, Canada, Indonesia, Mexico, Moldova, Trinidad and Tobago, and Ukraine: Final Results of Changed Circumstances Review*, 68 FR 64079 (November 12, 2003).

The designation of the products as "tire cord quality" or "tire bead quality" indicates the acceptability of the product for use in the production of tire cord, tire bead, or wire for use in other rubber reinforcement applications such as hose wire. These quality designations are presumed to indicate that these products are being used in tire cord, tire bead, and other rubber reinforcement applications, and such merchandise intended for the tire cord, tire bead, or other rubber reinforcement applications is not included in the scope. However, should petitioners or other interested parties provide a reasonable basis to believe or suspect that there exists a pattern of importation of such products for other than those applications, end-use certification for the importation of such products may be required. Under such circumstances, only the importers of record would normally be required to certify the end use of the imported merchandise.

All products meeting the physical description of subject merchandise that are not specifically excluded are included in this scope.

The products under the order are currently classifiable under subheadings 7213.91.3010, 7213.91.3090, 7213.91.4510, 7213.91.4590, 7213.91.6010, 7213.91.6090, 7213.99.0031, 7213.99.0038, 7213.99.0090, 7227.20.0010, 7227.20.0020, 7227.20.0090, 7227.20.0095, 7227.90.6051, 7227.90.6053, 7227.90.6058, and 7227.90.6059 of the HTSUS. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the order is dispositive.

Final Results of Changed Circumstances Review

Based on the information provided by Mittal, and the fact that the Department did not receive any comments during the comment period following the preliminary results of this review, the Department hereby determines Mittal is the successor-in-interest to CIL for antidumping duty cash deposit purposes.

Instructions to U.S. Customs and Border Protection

The Department will instruct U.S. Customs and Border Protection (CBP) to suspend liquidation of all shipments of the subject merchandise produced and exported by Mittal entered, or withdrawn from warehouse, for consumption, on or after the publication date of this notice at 3.61 percent (*i.e.* CIL's cash deposit rate). This deposit rate shall remain in effect until publication of the final results of the ongoing administrative review, in which Mittal/CIL is participating.

This notice also serves as a reminder to parties subject to administrative protective orders (APOs) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.306. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

This notice is in accordance with sections 751(b) and 777(i)(1) of the Act, and section 351.216(e) of the Department's regulations.

Dated: June 29, 2005.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.
