[I.D. 070505A]

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Northeast Region, NMFS (Assistant Regional Administrator) has made a preliminary determination that the subject Exempted Fishing Permit (EFP) application contains all the required information and warrants further consideration. The Assistant Regional Administrator has also made a preliminary determination that the activities authorized under the EFP would be consistent with the goals and objectives of the Northeast (NE) Multispecies Fishery Management Plan (FMP). However, further review and consultation may be necessary before a final determination is made to issue the EFP. Therefore, the Assistant Regional Administrator proposes to recommend that an EFP be issued to test gear

modification to reduce bycatch in the NE multispecies fishery that would allow three commercial fishing vessels to conduct fishing operations that are otherwise restricted by the regulations governing the fisheries of the Northeastern United States. The EFP would allow for exemptions from the FMP as follows: The Gulf of Maine (GOM) minimum mesh size requirements. Initially, the applicant requested an EFP to conduct research during May to July 15, 2005, and requested an exemption from the regulations pertaining to the GOM Rolling Closure Areas II and III at § 648.81(f)(1)(ii) and (iii), respectively. Due to an oversight, exemptions from GOM minimum mesh size requirements and from the GOM Rolling Closure Area IV (§ 648.81(f)(1)(iv)) were omitted from the May 16, 2005 **Federal Register** notice (70 FR 25814) announcing the EFP for the project. This revision proposes a GOM minimum mesh size exemption (the GOM Rolling Closure Area exemptions would no longer be necessary due to the timing of this action) and would extend the duration of the project to August 12, 2005.

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs.

DATES: Comments must be received on or before July 25, 2005.

ADDRESSES: Written comments should be sent to Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Regional Office, 1 Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on the Manomet Rigid Mesh EFP Proposal Revision." Comments may also be sent via fax to (978) 281-9135, or be submitted via e-mail to the following address: da5-85r@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Karen Tasker, Fishery Management Specialist, phone (978) 281-9273.

SUPPLEMENTARY INFORMATION: Manomet Center for Conservation Sciences submitted an application for an EFP on March 16, 2005. The primary goal of the research is to test the effectiveness of inserting a rigid mesh panel between the extension and the codend of a trawl net to reduce regulatory discards while targeting yellowtail flounder, winter flounder, summer flounder, American plaice, and cod in inshore GOM waters.

The proposed rigid mesh panel would be 6.56 ft (2 m) in length and would be constructed of elongate meshes 2.36 inches (60 mm) wide and 7.87 inches (200 mm) long. This panel would be
