14 CFR Part 71

[Docket No. FAA–2005–21706; Airspace Docket No. 05–ACE–23]

Modification of Class E Airspace; Washington, MO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; request for comments.

SUMMARY: This action amends Title 14 Code of Federal Regulations, part 71 (14 CFR part 71) by revising Class E airspace at Washington, MO. A review of the Class E airspace area extending upward from 700 feet above ground level (AGL) at Washington, MO revealed its legal description is not in proper format and it is not in compliance with established airspace criteria. This airspace area is enlarged and modified to conform to FAA Orders. The intended effect of this rule is to provide controlled airspace of appropriate dimensions to protect aircraft departing from and executing standard instrument approach procedures (SIAPs) to Washington Memorial Airport. This rule also amends the Airport Reference Point (ARP) in the legal description to reflect current data.

DATES: This direct final rule is effective on 0901 UTC, October 27, 2005. Comments for inclusion in the Rules Docket must be received on or before August 19, 2005.

ADDRESSES: Send comments on this proposal to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590–0001. SUPPLEMENTARY INFORMATION: This amendment to 14 CFR 71 modifies the Class E airspace area extending upward from 700 feet above the surface at Washington, MO. An examination of the Class E airspace area at Washington, MO revealed it does not comply with airspace requirements for recently developed Standard Instrument Approach Procedures (SIAP). Enlargements to this airspace area are necessary in order to comply with airspace requirements set forth in FAA Orders 7400.2E, Procedures for Handling Airspace Matters, and 8260.19C, Flight Procedures and Airspace. The Washington Memorial Airport Airport Reference Point (ARP) is amended to reflect current data and the reference to the Foristell VORTAC is removed. The airspace area is expanded from a 6.3-mile to a 6.4-mile radius of Washington Memorial Airport and extensions are established within 4 miles each side of the 334° bearing from the airport extending from the 6.4-mile radius to 10.8 miles northwest of the airport and within 4 miles each side of the 154° bearing from the airport extending from the 6.4-mile radius to 10.6 miles southeast of the airport. These modifications provide controlled airspace of appropriate dimensions to protect aircraft departing from and executing SIAPs to Washington Memorial Airport. This area will be depicted on appropriate aeronautical charts. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9M, Airspace Designations and Reporting Points, dated August 30, 2004, and effective September 16, 2004, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.
