SUPPLEMENTARY INFORMATION: A proposed rule was issued on May 20, 2005, and published in the **Federal Register** on May 25, 2005 (70 FR 30001). The proposed rule would change the regulatory periods when the minimum grade, size, quality, and maturity requirements apply to southeastern California grapes under Marketing Order No. 925 (order), and to imported grapes under the table grape import regulation. Extensions were requested on behalf of the Chilean government and ASOEX, a trade association of Chilean fruit growers and fresh fruit exporters. ASOEX stated that its members represent approximately 90 percent of Chilean table grape imports to the United States. The extension will provide additional time for interested persons to analyze the proposal data and to submit written comments on the proposed rule.

After reviewing the requests, USDA is extending the comment period for 60 additional days or until September 25, 2005. This will provide interested persons a total of 120 days to review the proposed rule, perform a more complete analysis, and submit written comments. Interested persons who seek the data and reports referenced and discussed in the proposed rule published May 25, 2005 (70 FR 30001), may request such records pursuant to the Freedom of Information Act (5 U.S.C. 552). SUPPLEMENTARY INFORMATION: For additional information see the direct final rule published in the final rules section of this **Federal Register**.

Procedural Background

This rule is limited to the changes contained in Amendment 4 to CoC No. 1015 and does not include other aspects of the NAC-UMS cask design. The NRC is using the "direct final rule procedure" to issue this amendment because it represents a limited and routine change to an existing CoC that is expected to be noncontroversial. Adequate protection of public health and safety continues to be ensured. The direct final rule will become effective on October 11, 2005. However, if the NRC receives significant adverse comments by August 24, 2005, then the NRC will publish a document that withdraws the direct final rule and will subsequently address the comments received in a final rule. The NRC will not initiate a second comment period on this action.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, in a substantive response:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC staff to make a change (other than editorial) to the CoC or TS.

14 CFR Part 39

[Docket No. 2001-NE-02-AD]

RIN 2120-AA64

Airworthiness Directives; Rolls-Royce Deutschland (Formerly Rolls-Royce plc) Models Tay 650-15 and 651-54 Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede an existing airworthiness directive (AD) for Rolls-Royce Deutschland (formerly Rolls-Royce plc) (RRD) models Tay 650-15 and 651-54 turbofan engines. That AD currently requires borescope inspection of the high pressure compressor (HPC) stage 12 disc assembly to detect damage caused by HPC outlet guide vane (OGV) retaining bolt failure, and replacement of unserviceable parts with serviceable parts. That AD also requires as terminating action, the incorporation of a new design retention arrangement for the HPC OGV to prevent HPC OGV retaining bolt failure. This proposed AD would require the same actions but extends the terminating action compliance time for Tay 650-15 engines. This proposed AD would also include references to later revisions of two of the applicable RRD service bulletins (SBs). This proposed AD results from findings that the terminating action compliance time for Tay 650-15 engines can be extended. We are proposing this AD to prevent an uncontained failure of the HPC stage 11/12 disc spacer, which could result in damage to the airplane.

DATES: We must receive any comments on this proposed AD by September 23, 2005.

ADDRESSES: Use one of the following addresses to submit comments on this proposed AD:

- By mail: Federal Aviation Administration (FAA), New England Region, Office of the Regional Counsel, Attention: Rules Docket No. 2001-NE-02-AD, 12 New England Executive Park, Burlington, MA 01803-5299.

Discussion

On January 18, 2002, the FAA issued AD 2002-01-29, Amendment 39-12624 (67 FR 4652, January 31, 2002). That AD requires borescope inspection of the HPC stage 12 disc assembly to detect damage caused by HPC OGV retaining bolt failure, and replacement of unserviceable parts with serviceable parts. That AD also requires as terminating action, the incorporation of a new design retention arrangement for the HPC OGV, to prevent HPC OGV retaining bolt failure.

Actions Since AD 2002-01-29 Was Issued

Since we issued AD 2002-01-29, the FAA and the Luftfahrt Bundesamt (LBA), which is the airworthiness authority for Germany, reassessed the time period allowed for incorporation of the terminating action compliance time for Tay 650-15 engines. Part of that reassessment takes into consideration the major reduction in flying time of the Tay 650-15 airliner fleet, since September 11, 2001. The FAA and LBA concluded that the terminating action compliance time for the Tay 650-15 engines can be safely extended by 25 months.

Special Flight Permits Paragraph Removed

Paragraph (f) of the current AD, AD 2002-01-29, contains a paragraph pertaining to special flight permits. Even though this proposed AD does not contain a similar paragraph, we have made no changes with regard to the use of special flight permits to operate the airplane to a repair facility to do the work required by this AD. In July 2002, we published a new part 39 that contains a general authority regarding special flight permits and airworthiness directives; see Docket No. FAA-2004-8460, Amendment 39-9474 (69 FR 47998, July 22, 2002). Thus, when we now supersede ADs we will not include a specific paragraph on special flight permits unless we want to limit the use of that general authority granted in section 39.23.

Relevant Service Information

We have reviewed and approved the technical contents of RRD SB No. TAY-72-1498, Revision 2, dated December 31, 2004. That SB describes procedures for installing new design retaining and locking hardware for the HPC OGV and outer seal housing assembly. The LBA classified this service bulletin as mandatory and issued AD D-2004-365, dated January 31, 2005, in order to ensure the airworthiness of these RRD engines in Germany.
