Section 302(b) of the P&S Act (7 U.S.C. 202(b)) requires the Secretary to determine which stockyards meet this definition, and to notify the owner of the stockyard and the public of that determination by posting a notice in each designated stockyard. After giving notice to the stockyard owner and to the public, the stockyard will be subject to the provisions of Title III of the P&S Act (7 U.S.C. 201-203 and 205-217a) until the Secretary deposits the stockyard by public notice.

Statutory Authority

Section 9 of the Endangered Species Act (16 U.S.C. 1532 *et seq.*) and implementing regulations prohibit the taking of animal species listed as endangered or threatened. The term “take” is defined under the ESA (16 U.S.C. 1532(19)) as to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. “Harm” is defined by the FWS to include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding, and sheltering (50 CFR 17.3). NMFS’ definition of “harm” includes significant habitat modification or degradation where it actually kills or injures fish or wildlife by significantly

impairing essential behavioral patterns, including breeding, feeding, spawning, migrating, rearing, and sheltering (64 FR 60727, November 8, 1999).

Section 10 of the ESA specifies requirements for the issuance of incidental take permits (ITPs) to non-Federal landowners for the take of endangered and threatened species. Any proposed take must be incidental to otherwise lawful activities, not appreciably reduce the likelihood of the survival and recovery of the species in the wild and minimize and mitigate the impacts of such take to the maximum extent practicable. In addition, an applicant must prepare a habitat conservation plan describing the impact that will likely result from such taking, the strategy for minimizing and mitigating the incidental take, the funding available to implement such steps, alternatives to such taking, and the reason such alternatives are not being implemented.

NEPA (42 U.S.C. 4321 *et seq.*) requires that Federal agencies conduct an environmental analysis of their proposed actions to determine if the actions may significantly affect the human environment. Under NEPA, a reasonable range of alternatives to proposed projects is developed and considered in the Services’ environmental review. Alternatives considered for analysis in an EIS may include: variations in the scope of covered activities; variations in the location, amount, and type of conservation; variations in permit duration; or, a combination of these elements. In addition, the EIS will identify potentially significant direct, indirect, and cumulative impacts on biological resources, land use, air quality, water quality, water resources, socioeconomics, and other environmental issues that could occur with the implementation of the applicant’s proposed actions and alternatives. For all potentially significant impacts, the EIS will identify avoidance, minimization, and mitigation measures to reduce these impacts, where feasible, to a level below significance.
