SUPPLEMENTARY INFORMATION: The Bienville, Delta, De Soto, Holly Springs, Homochitto, and Tombigbee National Forests are managed as a single administrative unit (National Forests in Mississippi). In December of 1999, the National Forests in Mississippi formally initiated its land management plan revision process with publication of a notice of intent to prepare an environmental impact statement for plan revision (64 FR 69686, December 14, 1999). After that initiation, several delays were experienced due to budget and administrative matters. In anticipation of funding becoming available in fiscal year 2004, the National Forests in Mississippi published a second (or revised) notice of intent in September 2003 (68 FR 55576, September 26, 2003). When plan revision began again in earnest in 2004, the National Forests in Mississippi resumed formal public involvement activities including hosting "open houses" in September and October 2004 around the state. There has been considerable public participation and collaborative work on this planning process over the past few years, including more than 35 public meetings to date. Input from previous public involvement will continue to be considered along with additional (ongoing) collaborative efforts during development of the plan revision components under the January 5, 2005, Planning Rule (70 FR 1023, January 5, 2005).

The plan revision process will continue to be an open planning process with numerous opportunities for the public to obtain information, provide comment, or participate in collaborative stakeholder activities. Options for the public include any of the following methods:

(1) Reviewing and commenting on the preliminary plan components, analysis

results, and supporting maps posted on our Web site,

- (2) Attending open house meetings,
- (3) Requesting planning team presentations to specific groups,
- (4) Newsletters, or
- (5) Providing input during formal comment periods.

The focal points of the future collaborative work will be:

- (1) Review and adjustment of the preliminary proposed action (desired conditions and suitability of land areas for various purposes) and identification of options.
- (2) Development of management objectives to assist in attaining or maintaining desired conditions.
- (3) Formulation of guidelines to serve as operational controls to help ensure projects move toward or maintain desired conditions.
- (4) Development of the plan monitoring framework and environmental management system to guide adaptive management. We expect to complete this phase of collaboration during the fall of 2005.

Our remaining forest plan revision schedule will be approximately as follows:

- (1) Release of draft forest plan and start of 90-day public comment period, spring 2006,
- (2) Release of final plans and start of 30-day objection period, fall 2006,
- (3) Final decision and start of plan implementation, winter 2006.

Antoine L. Dixon, Forest Supervisor, National Forests in Mississippi, is the Responsible Official (36 CFR 219.2(b)(1)).
