B. Background

The Tribal Drinking Water Operator Certification Program Final Guidelines represent EPA's effort to establish a program for Tribes that is flexible, while at the same time provides meaningful public health protection to the drinking

water community. The Program will provide Tribes with further training and certification opportunities in addition to existing training or certification programs offered by States, various Federal agencies, and private organizations. EPA established the Program to further protect public health by providing operators of drinking water systems in Indian country additional training and certification opportunities for community and non-transient non-community drinking water systems. (A community water system provides drinking water to the same people year-round. A non-transient non-community water system is a water system that serves at least 25 of the same customers on less than a year-round basis.) The Program guidelines establish baseline standards for non-State organizations certifying operators of Tribal systems and outlines a consistent method of assessing, tracking, and addressing certification and training needs on Tribal lands. The Agency believes that establishing a Tribal Operator Certification Program will help bring greater public health protection to Tribal communities.

In 1998, EPA headquarters (HQ) and Regional Offices formed a workgroup to discuss possible approaches for developing the Program in consultation with the Tribes. In addition, EPA coordinated with other Federal agencies and sought their recommendations. A Notice of Availability for the draft guidelines was published in the **Federal Register** on March 30, 2000 (65 FR 16917). An additional Notification of Availability was published in the **Federal Register** on April 19, 2004 (69 FR 20874); public comments to those notices and EPA's responses are available at <http://www.epa.gov/safewater/tribal.html>.
