

Sec. E1.8 Raw product storage

A. All milk shall be held and processed under conditions and at temperatures that will avoid contamination and rapid deterioration. Drip milk from can washers or any other source shall not be used for the manufacture of dairy products. Bulk milk in storage tanks within the dairy plant shall be handled in such a manner as to minimize bacterial increase and shall be maintained at 45 degrees Fahrenheit or lower until processing begins. This does not preclude holding milk at higher temperatures for a period of time, where applicable to particular manufacturing or processing practices.

B. The bacterial estimate of commingled milk in plant storage tanks shall be 1 million per milliliter or lower.

C. During any consecutive six months, at least four samples of commingled raw milk for processing shall be taken by the regulatory agency from each plant.

D. A laboratory test of these samples to determine the bacterial estimate shall be performed at a laboratory approved by the regulatory agency.

E. Whenever a bacterial estimate of commingled milk in a plant indicates the presence of more than 1 million per milliliter, the following procedures shall be applied:

1. The regulatory agency shall notify plant management with a warning of excessive bacterial estimate and recommend that appropriate action be taken to eliminate the bacterial problem.

2. Whenever two of the last four consecutive commingled milk bacterial estimates exceed 1 million per milliliter, the regulatory agency shall notify plant management with a written warning notice. The notice shall be in effect so long as two of the last four consecutive samples exceed 1 million per milliliter. Plant management should continue to work to eliminate the bacterial problem.

3. An additional sample shall be taken by the regulatory agency after a lapse of 3 days but within 21 days of the notice required in paragraph (e)(1) of this section. If this sample also exceeds 1 million per milliliter, the plant license shall be suspended. A temporary status may be assigned to the plant by the appropriate regulatory agency when an additional sample of commingled milk is tested and found satisfactory. The plant shall be assigned a full reinstatement status when three out of four consecutive commingled bacterial estimates do not exceed 1 million per milliliter. The samples shall be taken at a rate of not more than two per week on separate days within a 3-week period.

Heat-Treated Cream Definition

The definition of heat-treated cream will be added to include: *E 1.9(i) Heat-treated cream*—Heat-treated cream is cream in which the product may be heated to less than 160 degrees Fahrenheit in a continuing heating process and immediately cooled to 45 degrees Fahrenheit or less for a functional reason.

(Authority: 7 U.S.C. 1621–1627)

Dated: August 15, 2005.

Lloyd C. Day,

Administrator, Agricultural Marketing Service.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE**Animal and Plant Health Inspection Service**

[Docket No. 05–064–1]

Notice of Request for Extension of Approval of an Information Collection; Animal Welfare

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection in support of the regulations issued under the Animal Welfare Act governing the humane handling, care, treatment, and transportation of certain animals by dealers, research institutions, exhibitors, carriers, and intermediate handlers

DATES: We will consider all comments that we receive on or before October 17, 2005.

ADDRESSES: You may submit comments by either of the following methods:

- EDOCKET: Go to <http://www.epa.gov/feddoCKET> to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once you have entered EDOCKET, click on the "View Open APHIS Dockets" link to locate this document.

- Postal Mail/Commercial Delivery: Please send four copies of your comment (an original and three copies) to Docket No. 05–064–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road

Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 05–064–1.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

Other Information: You may view APHIS documents published in the **Federal Register** and related information on the Internet at <http://www.aphis.usda.gov/ppd/rad/webrepor.html>.

FOR FURTHER INFORMATION CONTACT: For information regarding the regulations for the humane handling, care, treatment, and transportation of certain animals by dealers, research institutions, exhibitors, carriers, and intermediate handlers, contact Dr. Jerry DePoyster, Senior Staff Veterinarian, Animal Care, APHIS, 4700 River Road Unit 84, Riverdale, MD 20737–1234; (301) 734–7586. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

SUPPLEMENTARY INFORMATION:

Title: Animal Welfare.

OMB Number: 0579–0036.

Type of Request: Extension of approval of an information collection.

Abstract: The regulations in 9 CFR parts 1 through 3 were promulgated under the Animal Welfare Act (the Act) (7 U.S.C. 2131 *et seq.*) to ensure the humane handling, care, treatment, and transportation of regulated animals under the Act. The regulations in 9 CFR part 2 require documentation of specified information by dealers, research institutions, exhibitors, carriers, and intermediate handlers. The regulations in 9 CFR part 2 also require that facilities that use animals for regulated purposes obtain a license or register with the U.S. Department of Agriculture (USDA). Before being issued a USDA license, individuals are required to undergo precense inspections; once licensed, a licensee must periodically renew the license.

The Act and regulations are enforced by USDA's Animal and Plant Health Inspection Service (APHIS), which performs unannounced inspections of regulated facilities. A significant component of the inspection process is review of records that must be

established and maintained by regulated facilities. The information contained in these records is used by APHIS inspectors to ensure that dealers, research facilities, exhibitors, intermediate handlers, and carriers comply with the Act and regulations.

Facilities must make and maintain records that contain official identification for all dogs and cats and certification of those animals received from pounds, shelters, and private individuals. These records are used to ensure that stolen pets are not used for regulated activities. Dealers, exhibitors, and research facilities that acquire animals from nonlicensed persons are required to have the owners of the animals sign a certification statement verifying the owner's exemption from licensing under the Act. Records must also be maintained for animals other than dogs and cats when the animals are used for purposes regulated under the Act.

Research facilities must also make and maintain additional records for animals covered under the Act that are used for teaching, testing, and experimentation. This information is used by APHIS personnel to review the research facility's animal care and use program.

APHIS needs the reporting and recordkeeping requirements contained in 9 CFR part 2 to enforce the Act and regulations. APHIS also uses the collected information to provide a mandatory annual Animal Welfare Enforcement report to Congress.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the proposed information collection is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, or other collection

technologies, *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1.4796408 hours per response.

Respondents: Research facilities, "A" and "B" dealers, exhibitors, carriers, and intermediate handlers.

Estimated annual number of respondents: 7,305.

Estimated annual number of responses per respondent: 9.1175906.

Estimated annual number of responses: 66,604.

Estimated total annual burden on respondents: 98,550 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 12th day of August 2005.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Forest Service

Yakus Creek Project, Clearwater National Forest, Idaho County, ID

AGENCY: Forest Service, USDA

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The USDA, Forest Service, will prepare an Environmental Impact Statement (EIS) to disclose the environmental effect of timber harvest and watershed restoration activities in the Yakus Creek project area on the Lochsa Ranger District of the Clearwater National Forest. The Yakus Creek project area is located in the Yakus Creek drainage, a tributary to Lolo Creek, approximately 12 air-miles east of the town of Kamiah, Idaho.

DATES: This project was previously scoped in February 2004, and the comments received will be included in the documentation for the EIS. A 45-day public comment period will follow the release of the draft environmental impact statement that is expected in December 2005. The final environmental impact statement is expected in May 2006.

ADDRESSES: Written comments and suggestions concerning the scope of this

project should be sent to Cindy Land (*clane@fs.fed.us*), District Ranger, Lochsa Ranger District, Rt. 1 Box 398, Kooskia, ID 83539.

FOR FURTHER INFORMATION CONTACT: George Harbaugh (*gharbaugh@fs.fed.us*), Project Leader, Lochsa Ranger District. Phone: (208) 926-4274.

SUPPLEMENTARY INFORMATION: The Yakus Creek project area contains approximately 7,900 acres, of which 5,240 acres are National Forest lands and 2,660 acres are other ownership (State, timber companies, and private). The legal location is in portions of Sections 1, 2, 12, and 13, T33N, R5E; Sections 3-9, 17, and 18, T33N, R6E; Sections 25, 26, 35, and 36, T34N, R5E; and Sections 30-33, T34N, R6E, Boise Meridian, Idaho County, Idaho. The proposed actions would occur on National Forest lands and are all outside the boundaries of any inventoried roadless area or any areas considered for inclusion to the National Wilderness System as recommended by the Clearwater National Forest Plan or by any past or present legislative wilderness proposals.

Purpose and Need for Action is to: (1) Improve forest health and start the shift towards desired patch sizes by: (1) Shifting species composition from grand fir to white pine and western larch; (b) reducing tree densities in immature stands; (c) regenerating decadent mature stands; (d) regenerating stands with insect and root rot problems; (e) creating desired patches (300-500 acres) with timber harvest; and (f) connecting existing seedling/sapling stands, where possible; (2) restore watershed function to improve soil productivity and instream conditions; and (3) manage the landscape to provide for goods and services deemed important to society.

The Proposed Action would harvest timber through regeneration harvest and commercial thinning on approximately 670 acres of forestland within the Yakus Creek drainage. Regeneration harvest (520 acres) would leave approximately 20-25 trees per acre as individual trees and in groups, where feasible, to provide future snags and down woody material for wildlife habitat. Commercial thinning (150 acres) would reduce the basal area in dense timbered stands down to about 160-180 square feet. There is also an opportunity to precommercial thin approximately 1,620 acres of young stands scattered throughout the project area. Use of existing, temporary and permanent roads would be needed to access timber harvest areas. An estimated 1.8 miles of existing roads would be reconstructed in addition to 1.2 miles of new specified
