Zone procedures would exempt Kodak from Customs duty payments on foreign components used in export production. On its domestic sales, Kodak would be able to choose the lower duty rate that applies to the finished products for foreign components, when applicable. Kodak would also be able to avoid duty on foreign inputs which become scrap/waste, estimated at five percent of FTZ-related savings. Kodak may also realize logistical/procedural and other benefits from subzone status. All of the above-cited savings from zone procedures could help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.
