Title: Reporting Requirements under the Voluntary Aluminum Industrial Partnership (VAIP).

Abstract: EPA's Voluntary Aluminum Industrial Partnership (VAIP) was initiated in 1995 and is an important voluntary program contributing to the overall reduction in emissions of greenhouse gases. This program focuses on reducing direct greenhouse gas emissions including perfluorocarbon (PFC) and carbon dioxide (CO₂) emissions from the production of primary aluminum. Seven of the eight U.S. producers of primary aluminum participate in this program. PFCs are

very potent greenhouse gases with global warming potentials several thousand times that of carbon dioxide and they persist in the atmosphere for thousands of years. CO₂ is emitted from consumption of the carbon anode. EPA has developed this ICR to renew authorization to collect information from companies in the VAIP. Participants voluntarily agree to the following: designating a VAIP liaison; undertaking technically feasible and cost-effective actions to reduce PFC and direct CO₂ emissions; and reporting to EPA, on an annual basis, the PFC and CO₂ emissions or production parameters used to estimate emissions. The information contained in the annual reports of VAIP members is used by EPA to assess the success of the program in achieving its goals. The information contained in the annual reports may be considered confidential business information and is maintained as such. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The VAIP is a continuing program and, as such, the burden for collecting relevant information has not changed significantly overtime as data collection processes have remained the same and no new one-time cost activities are expected that would impact all respondents. VAIP participants sign a voluntary Memorandum of Understanding (MOU) which assigns responsibilities to EPA and participating companies. The MOU has been signed each of the seven participating

companies and not expected to be revised or renewed. The annual public reporting and recordkeeping burden for this collection of information is estimated to average 98.5 hours per response. The projected hour burden for this collection of information is as follows:

Average Annual Reporting Burden: 82 hours.

Average Annual Record Keeping Burden: 0 hours.

Average Burden Hours/Response: 82 hours for the annual tracking report; and 16.5 hours associated with additional activities such as partnership meetings. Frequency of response=one per respondent per year. Estimated number of respondents per year=7. Cost burden to respondents (\$7,354 per respondent).

Estimated Total Annualized Cost Burden: \$51,478.

Total Labor Costs: \$51,478.

Total Capital and Start-up Costs: \$0.

Estimated Total Operation and Maintenance Costs: \$0.

Purchase of Services Costs: \$0.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review and collection of information; and transmit or otherwise disclose the information.

Acting Director, Climate Protection Division.
