SUPPLEMENTARY INFORMATION:

Background

EPA Region 6 has requested that the SAB conduct a review of the Geographic Information System Screening Tool

(GISST). The GISST is an environmental assessment tool developed to provide a systematic approach to considering single media and cumulative impacts in making decisions concerning complex projects, such as those subject to the National Environmental Policy Act (NEPA). The GISST uses geographic information system coverages and environmental and socioeconomic data to provide screening level assessments of the potential environmental vulnerabilities of project locations or the impacts of specified activities. Decision criteria are used in the GISST to score available data on a scale of one to five, where one equals lower potential environmental vulnerability or concern and five equals a higher level of vulnerability or concern. Scores are used by decision-makers to help prioritize potential project locations and alternatives and to help identify levels of environmental concern. EPA Region 6 is seeking comment from the SAB on the validity of the GISST methodology, the defensibility of the GISST results, and the usefulness of the GISST, particularly within the NEPA process. EPA Region 6 is also interested in making the GISST more user-friendly, and is seeking comments on further enhancements to the GISST.

Panel Formation

The Science Advisory Board is a chartered Federal advisory committee established under 42 U.S.C. 4365 to provide independent scientific and technical advice, consultation, and recommendations to the EPA Administrator on the technical basis for Agency positions and regulations. The SAB Staff Office is augmenting the expertise on the SAB Ecological Processes and Effects Committee to conduct the review of the GISST. The panel being formed will provide advice to the EPA through the Chartered SAB. The Panel will comply with the provisions of the Federal Advisory Committee Act and all appropriate SAB procedural policies, including the SAB process for panel formation described in the Overview of the Panel Formation Process at the Environmental Protection Agency Science Advisory Board, which can be found on the SAB's Web site at: <http://www.epa.gov/sab/pdf/ec0210.pdf>. The SAB Staff Office has previously formed panels that provided advice on EPA's Critical Ecosystem Assessment Model (CrEAM) and Regional Vulnerability Assessment (ReVA) methods for multi-scale decision-making. The expertise needed on the GISST Review Panel is similar to the expertise that was required for review of the CrEAM and the ReVA methods.
