SUPPLEMENTARY INFORMATION:

Standard Review Plan for Review of LR Applications for Nuclear Power Plants, Rev. 1

The NRC staff revised the July 2001 version of NUREG-1800, "Standard Review Plan for Review of License Renewal Applications for Nuclear Power Plants" (SRP-LR). The SRP-LR provides guidance to NRC staff reviewers in performing safety reviews of applications to renew licenses of nuclear power plants in accordance with the license renewal rule. The SRP-LR, Revision 1, is under ADAMS Accession number ML052110007. The SRP-LR is revised to incorporate lessons learned from the review of a number of previous license renewal applications, as well as to make changes corresponding to the update of the GALL Report. The SRP-LR, Revision 1, contains four major chapters: (1) Administrative Information; (2) Scoping and Screening Methodology for Identifying Structures and Components Subject to Aging Management Review, and Implementation Results; (3) Aging Management Review Results; and (4) Time-Limited Aging Analyses. In addition, three Branch Technical Positions are in an Appendix to the SRP-LR, Revision 1.

Generic Aging Lessons Learned (GALL) Report, Revision 1

The Generic Aging Lessons Learned (GALL) Report, Revision 1, is an update to the July 2001 version; the report format is largely unchanged. The GALL Report, Revision 1, Volumes 1 and 2, are available under ADAMS Accession number ML052110005 and ML052110006, respectively. The adequacy of the generic aging management programs in managing certain aging effects for particular structures and components will continue to be evaluated based on the review of the following ten program elements: (1) Scope of program; (2) preventive actions; (3) parameters monitored or inspected; (4) detection of aging effects; (5) monitoring and trending; (6) acceptance criteria; (7) corrective actions; (8) confirmation process; (9) administrative controls; and (10) operating experience. The GALL Report is a technical basis document for the SRP-LR and should be treated in the same manner as an approved topical report that is applicable generically.

Analysis of Public Comments on the Revised LR Guidance Documents

On February 1, 2005, the NRC announced (70 FR 5254) the issuance for public comment and availability a draft of "Standard Review Plan for Review of License Renewal Applications for Nuclear Power Plants" and a draft "Generic Aging Lessons Learned (GALL) Report." The NRC also announced a public workshop that was held on March 2, 2005, to facilitate gathering public comment on the draft documents. NUREG-1832 contains the NRC response to stakeholders' comments. The dispositions are prepared in a table format and contained in five appendices. Appendix A addresses the specific written comments submitted by the Nuclear Energy Institute (NEI), Appendix B addresses the comments from the Advisory Committee on Reactor Safeguards (ACRS), Appendix C addresses the participant comments from the license renewal public workshop on March 2, 2005, Appendix D addresses the written comments submitted by other public stakeholders, and Appendix E provides a comparison of the aging management review line items from the January 2005 GALL Report to the September 2005 GALL Report.

Dated at Rockville, Maryland, this 27th day of September, 2005.

For the Nuclear Regulatory Commission.

Jacob I. Zimmerman,

Acting Program Director, License Renewal and Environmental Impacts Program, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.

RAILROAD RETIREMENT BOARD

Proposed Data Collection Available for Public Comment and Recommendations

Summary: In accordance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments are invited on: (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection

of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Title and purpose of information collection: RRB Form DC-1, Employer's Quarterly Report of Contributions Under the Railroad Unemployment Insurance Act; OMB 3220-0012.

Under Section 8 of the Railroad Unemployment Insurance Act (RUIA), as amended by the Railroad Unemployment Improvement Act of 1988 (Public Law 100-647), the amount of each employer's contribution is determined by the RRB, primarily on the basis of RUIA benefit payments made to the employees of that employer. These experienced based contributions, take into account the frequency, volume and duration of RUIA benefits, both unemployment and sickness, attributable to a railroad's employees. Each employer's contribution rate includes a component for administrative expenses and a component to cover costs shared by all employers. The regulations prescribing the manner and conditions for remitting the contributions and for adjusting overpayments or underpayments of contributions are contained in 20 CFR 345.

RRB Form DC-1, Employer's Quarterly Report of Contributions Under the Railroad Unemployment Insurance Act, is currently utilized by the RRB for the reporting and remitting of quarterly contributions by railroad employers. The RRB utilizes a manual version of Form DC-1 and also provides railroad employers with the option of reporting the required information and remitting their quarterly contributions via an Internet equivalent version Form DC-1.

The RRB estimates that 2,160 responses are received annually. One response is requested quarterly of each respondent. Completion is mandatory. The RRB proposes no changes to Form DC-1. The estimated completion for the manual and Internet version of Form DC-1 is estimated at 25 minutes.
