

Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, or if the use is consistent with State and Federal programs.

Application Comments

Interested parties may submit comments regarding the specific use proposed in the application and plan of development, whether the BLM followed proper administrative procedures in reaching the decision, or any other factor not directly related to the suitability of the land for R&PP use.

Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification of the land described in this notice will become effective December 12, 2005. The lands will not be offered for lease/conveyance until after the classification becomes effective.

Authority: 43 CFR part 2741

Sharon DiPinto,

Assistant Field Manager, Division of Lands, Las Vegas, NV.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY-957-05-1420-BJ]

Notice of Filing of Plats of Survey, Wyoming

AGENCY: Bureau of Land Management, Interior.

SUMMARY: The Bureau of Land Management (BLM) has filed the plats of survey of the lands described below in the BLM Wyoming State Office, Cheyenne, Wyoming, on September 29, 2005

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, 5353 Yellowstone Road, P.O. Box 1828, Cheyenne, Wyoming 82003.

SUPPLEMENTARY INFORMATION: These surveys were executed at the request of the Bureau of Land Management, and are necessary for the management of resources. The lands surveyed are:

The plat and field notes representing the dependent resurvey of a portion of the Seventh Standard Parallel North in Range 107 West, the east and north boundaries and the subdivisional lines, and the subdivision of sections 13 and 14, Township 29 North, Range 107 West, Sixth Principal Meridian,

Wyoming, was accepted September 29, 2005.

The plat and field notes representing the dependent resurvey of a portion of the Fifth Standard Parallel North, through Ranges 94 and 95 West, and the subdivisional lines, Township 20 North, Range 95 West, Sixth Principal Meridian, Wyoming, was accepted September 29, 2005.

The plat and field notes representing the dependent resurvey of portions of the Ninth Guide Meridian West, through Township 41 North, between Ranges 72 and 73 West, and the subdivisional lines, Township 41 North, Range 72 West, Sixth Principal Meridian, Wyoming, was accepted September 29, 2005.

The plat and field notes representing the dependent resurvey of a portion of the Sixth Standard Parallel North, through Range 86 West, a portion of the subdivisional lines, and the subdivision of sections 2 and 3, Township 24 North, Range 86 West, Sixth Principal Meridian, Wyoming, was accepted September 29, 2005.

The plat and field notes representing the corrective dependent resurvey of portions of the subdivisional lines, Township 47 North, Range 76 West, Sixth Principal Meridian, Wyoming, was accepted September 29, 2005.

The plat and field notes representing the dependent resurvey of a portion of the subdivisional lines, and the subdivision of section 2, Township 52 North, Range 71 West, Sixth Principal Meridian, Wyoming, was accepted September 29, 2005.

The plat and field notes representing the dependent resurvey of a portion of the subdivisional lines, and the subdivision of sections 14 and 23, Township 47 North, Range 89 West, Sixth Principal Meridian, Wyoming, was accepted September 29, 2005.

The plat and field notes representing the dependent resurvey of a portion of the Thirteenth Guide Meridian West, through Township 43 North, between Ranges 104 and 105 West, portions of the subdivisional lines, and the adjusted meander line of the right bank of the East Fork Wind River, and the subdivision of section 31, Township 43 North, Range 104 West, Sixth Principal Meridian, Wyoming, was accepted September 29, 2005.

The plat and field notes representing the dependent resurvey of portions Tracts 44 and 47, Township 52 North, Range 104 West, Sixth Principal Meridian, Wyoming, was accepted September 29, 2005.

Copies of the preceding described plats and field notes are available to the public at a cost of \$1.10 per page.

Dated: October 4, 2005.

John P. Lee,

Chief Cadastral Surveyor, Division of Support Services.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of revision of an information collection (1010-0164).

SUMMARY: To comply with the Paperwork Reduction Act of 1995 (PRA), MMS is inviting comments on a collection of information that we will submit to the Office of Management and Budget (OMB) for review and approval. The information collection request (ICR) concerns the paperwork requirements in the regulations under 30 CFR part 250, subpart I, Platforms and Structures, Notice to Lessees and Operators (NTL)—Damage Caused by Hurricane(s). MMS is consolidating, renewing, and expanding upon OMB approved Emergency Requests 1010–0163 and 1010–0164. MMS is consolidating the burden hours from NTL—Damage Caused by Hurricane Katrina into this collection. We are also renewing this collection because information needs to be collected for a longer period than allowed by the Emergency OMB Requests. After a major hurricane, lessees need to keep reporting and submitting new information to MMS until all facilities that are able, are back to normal. We are expanding this ICR to include all damage due to any hurricane(s) that may occur in the Gulf of Mexico (GOM) over the next 3 years.

DATES: Submit written comments by December 12, 2005.

ADDRESSES: You may submit comments by any of the following methods listed below. Please use the Information Collection Number 1010–0164 as an identifier in your message.

- E-mail MMS at rules.comments@mms.gov. Identify with Information Collection Number 1010–0164 in the subject line.
- Fax: 703–787–1093. Identify with Information Collection Number 1010–0164.
- Mail or hand-carry comments to the Department of the Interior; Minerals Management Service; Attention: Rules Process Team (RPT); 381 Elden Street, MS–4024; Herndon, Virginia 20170–4817. Please reference “Information Collection 1010–0164” in your comments.

FOR FURTHER INFORMATION CONTACT: Cheryl Blundon, Rules Processing Team at (703) 787–1600. You may also contact Cheryl Blundon to obtain a copy, at no cost, of the regulation and the NTL that requires the subject collection of information.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR part 250, subpart I, Platforms and Structures, NTL—Damage Caused by Hurricane(s).

OMB Control Number: 1010–0164.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*),

authorizes the Secretary of the Interior (Secretary) to prescribe rules and regulations to administer leasing of the OCS. Such rules and regulations will apply to all operations conducted under a lease. Operations on the OCS must preserve, protect, and develop oil and natural gas resources in a manner which is consistent with the need to make such resources available to meet the Nation’s energy needs as rapidly as possible; to balance orderly energy resource development with protection of human, marine, and coastal environments; to ensure the public a fair and equitable return on the resources of the OCS; preserve and maintain free enterprise competition; and ensure that the extent of oil and natural gas resources of the OCS is assessed at the earliest practicable time. Section 43 U.S.C. 1332(6) states that “operations in the outer Continental Shelf should be conducted in a safe manner by well-trained personnel using technology, precautions, and techniques sufficient to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstruction to other users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property, or endanger life or health.”

To carry out these responsibilities, the Minerals Management Service (MMS) issues regulations to ensure that operations in the OCS will meet statutory requirements; provide for safety and protect the environment; and result in diligent exploration, development, and production of OCS leases. In addition, we also issue Notices to Lessees and Operators (NTLs) that provide clarification, explanation, and interpretation of our regulations. These NTLs are used to convey purely informational material and to cover situations that might not be adequately addressed in our regulations. The latter is the case for the information collection required in the NTL. Because of the unusual nature of this information collection, issuing a temporary NTL is the appropriate means to collect the information.

The subject of this information collection request (ICR) is an NTL titled, “Damage Caused by Hurricane(s)” to be issued to lessees and operators in the MMS Gulf of Mexico OCS (GOM) Region after a hurricane occurs. This ICR is a merging of two OMB approved Emergency Requests relating to hurricanes, 1010–0163 and 10101–0164. MMS is also renewing this ICR because information will need to be collected for a longer period than the 180 days allowed under an emergency request. Also, we are expanding this submission

to now include all damage due to any hurricane(s) that occurred in the 2005 season, as well as any future hurricanes that may occur in the GOM. Once this ICR is approved by OMB, MMS will reissue the NTL for each new hurricane that, in the future, impacts operations in the GOM with MMS inserting the appropriate hurricane name, longitudes, and dates of submittal, etc.

Currently, there are over 4,000 facilities/structures in the GOM OCS. MMS anticipates that potential major hurricanes may impact 40 percent or more of the platforms in the GOM (1,600 facilities) during any one event. For example, at the time of this writing, Hurricanes Katrina and Rita combined affected approximately 2,900 OCS facilities—only 10 facilities were affected by both storms; they each followed different paths and had their own specific meteorological anomalies (deviation or departure from the normal phenomena of the atmosphere). It needs to be stressed that the information we propose to collect under this NTL is information that a prudent lessee/operator would prepare in the event of a major hurricane. The primary authority for this submission is 30 CFR 250, Subpart I, information collection approved under the OMB Control Number 1010–0149. However, in connection with this subpart, MMS thinks that the burden hour requirements in the proposed NTL are in addition to the currently approved paperwork burden under those requirements.

With regard to the “OCS Pipelines” section of this NTL, MMS has the authority to collect the information requested under 30 CFR 250, Subpart J, Pipelines and Pipeline Rights-of-Way. The OMB has already approved the collection of pipeline information under OMB Control Number 1010–0050.

Emergency NTLs were issued relating to this same subject—structural damage caused by hurricanes—in 2003 after Hurricane Lili, in 2004 after Hurricane Ivan, and in 2005 after Hurricanes Katrina and Rita. Due to the nature of these incidents and their increasing occurrences, immediately after Hurricane Ivan, proposed rulemaking was started to require lessees to submit to MMS information about structure damage on the OCS due to natural phenomena, e.g., hurricanes, earthquakes. It is currently in the surnaming process and OMB has issued Regulatory Identification Number 1010-AD18.

We will protect information from respondents considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and its implementing

regulations (43 CFR part 2) and under regulations at 30 CFR 250.196, "Data and information to be made available to the public." No items of a sensitive nature are collected. Responses are mandatory.

Frequency: Monthly; and as specified in the NTL.

Estimated Number and Description of Respondents: Approximately 110 Federal OCS oil and gas lessees.

Estimated Reporting and Recordkeeping "Hour" Burden: The

approved reporting burdens for the current collections are 202,320 hours for 1010-0164, and 73,920 hours for 1010-0163. We expect the new burden hours to be approximately 26,880 which is an adjustment decrease of 249,360 burden hours. This decrease is a result of number of responses submitted. Even though there were approximately 1,600 facilities affected by Hurricane Rita, and 1,300 facilities affected by Hurricane Katrina in the GOM, usually respondents will submit only one or

more reports listing the damage to their facilities thereby making the number of responses significantly lower than what was previously estimated. The following chart details the individual components and respective hour burden estimates of this ICR. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

Reporting requirement	Hour burden	Number of responses	Annual burden hours
Prepare and submit to MMS (1) list of impacted OCS structures, (2) timetable for inspections, and (3) inspection plan for each listed platform describing work to determine condition of structure	12	150	1,800
Submit amendments to list and inspection plans.	12	90	1,080
Submit report to MMS describing detected damage that may adversely affect structural integrity, including assessment of ability to withstand anticipated environmental storm conditions, and any remediation plans	120	200	24,000

Estimated Reporting and Recordkeeping "Non-Hour Cost"

Burden: We have identified no cost burdens for this collection.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

Comments: Before submitting an ICR to OMB, PRA section 3506(c)(2)(A) requires each agency " * * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * * ". Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Agencies must also estimate the "non-hour cost" burdens to respondents or recordkeepers resulting from the collection of information. Therefore, if you have costs to generate, maintain, and disclose this information, you should comment and provide your total capital and startup cost components or annual operation, maintenance, and

purchase of service components. You should describe the methods you use to estimate major cost factors, including system and technology acquisition, expected useful life of capital equipment, discount rate(s), and the period over which you incur costs. Capital and startup costs include, among other items, computers and software you purchase to prepare for collecting information, monitoring, and record storage facilities. You should not include estimates for equipment or services purchased: (i) Before October 1, 1995; (ii) to comply with requirements not associated with the information collection; (iii) for reasons other than to provide information or keep records for the Government; or (iv) as part of customary and usual business or private practices.

We will summarize written responses to this notice and address them in our submission for OMB approval. As a result of your comments, we will make any necessary adjustments to the burden in our submission to OMB.

Public Comment Procedure: MMS's practice is to make comments, including names and addresses of respondents, available for public review. If you wish your name and/or address to be withheld, you must state this prominently at the beginning of your comment. MMS will honor this request to the extent allowable by law; however, anonymous comments will not be considered. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be

made available for public inspection in their entirety.

MMS Information Collection Clearance Officer: Arlene Bajusz (202) 208-7744.

Dated: October 3, 2005.

E.P. Danenberger,
Chief, Office of Offshore Regulatory Programs.

National Park Service

Draft Environmental Impact Statement; Reconstruction of the Furnace Creek Water Collection System; Death Valley National Park; Inyo County, CA; Notice of Availability

Summary: Pursuant to § 102(2)(C) of the National Environmental Policy Act (Pub. L. 91-190, 42U.S.C. 4321-4347, January 1, 1970, as amended), and the Council on Environmental Quality regulations (40CFR Part 1500-1508), the U.S. Department of the Interior, National Park Service and its cooperating agency have completed a draft Environmental Impact Statement (EIS) for the proposed reconstruction of the Furnace Creek water collection system at Death Valley National Park in Inyo County, California. The proposed project would rebuild the outdated water collection system in the Furnace Creek area to deliver a safe and reliable potable and nonpotable water supply to the park's main visitor use area. The draft EIS also describes and analyzes three alternatives and appropriate
