

urbanized areas: New York, NY; Los Angeles, CA; Chicago, IL; Philadelphia, PA; San Francisco, CA; Detroit, MI; Boston, MA; Houston, TX; Washington, DC; Dallas-Fort Worth, TX; Miami, FL; Cleveland, OH; St. Louis, MO; Atlanta, GA; Pittsburgh, PA; Baltimore, MD; Minneapolis-St. Paul, MN; Seattle, WA; San Diego, CA; and Tampa-St. Petersburg, FL. The coordinates for the centers of these areas are those referenced in § 90.635, except that the coordinates (referenced to North American Datum 1983 (NAD83)) for Tampa-St. Petersburg are latitude 28°00'1.1" N, longitude 82°26'59.3" W.

* * * * *

■ 26. Section 90.635 is revised read as follows:

§ 90.635 Limitations on power and antenna height.

(a) The effective radiated power and antenna height for base stations may not exceed 1 kilowatt (30 dBw) and 304 m. (1,000 ft.) above average terrain (AAT), respectively, or the equivalent thereof as determined from the Table. These are maximum values, and applicants will be required to justify power levels and antenna heights requested.

(b) The maximum output power of the transmitter for mobile stations is 100 watts (20 dBw).

TABLE.—EQUIVALENT POWER AND ANTENNA HEIGHTS FOR BASE STATIONS IN THE 851–869 MHz AND 935–940 MHz BANDS WHICH HAVE A REQUIREMENT FOR A 32 KM (20 MI) SERVICE AREA RADIUS

Antenna height (ATT) meters (feet)	Effective radiated power (watts) ^{1 2 4}
Above 1,372 (4,500)	65
Above 1,220 (4,000) to 1,372 (4,500)	70
Above 1,067 (3,500) to 1,220 (4,000)	75
Above 915 (3,000) to 1,067 (3,500)	100
Above 763 (2,500) to 915 (3,000)	140
Above 610 (2,000) to 763 (2,500)	200
Above 458 (1,500) to 610 (2,000)	350
Above 305 (1,000) to 458 (1,500)	600
Up to 305 (1,000)	³ 1,000

¹ Power is given in terms of effective radiated power (ERP).

² Applicants in the Los Angeles, CA, area who demonstrate a need to serve both the downtown and fringe areas will be permitted to utilize an ERP of 1 kw at the following mountaintop sites: Santiago Park, Sierra Peak, Mount Lukens, and Mount Wilson.

³ Stations with antennas below 305 m (1,000 ft) (AAT) will be restricted to a maximum power of 1 kw (ERP).

⁴ Licensees in San Diego, CA, will be permitted to utilize an ERP of 500 watts at the following mountaintop sites: Palomar, Otay, Woodson and Miguel.

§ 90.653 [Removed]

■ 27. Section 90.653 is removed.

§ 90.658 [Removed]

■ 28. Section 90.658 is removed.

§ 90.693 [Removed]

■ 29. Section 90.693 is amended by revising paragraphs (b) and (c) to read as follows:

§ 90.693 Grandfathering provisions for incumbent licensees.

* * * * *

(b) *Spectrum blocks A through V.* An incumbent licensee's service area shall be defined by its originally licensed 40 dBµV/m field strength contour and its interference contour shall be defined as its originally-licensed 22 dBµV/m field strength contour. The "originally-licensed" contour shall be calculated using the maximum ERP and the actual height of the antenna above average terrain (HAAT) along each radial. Incumbent licensees are permitted to add, remove or modify transmitter sites within their original 22 dBµV/m field strength contour without prior notification to the Commission so long as their original 22 dBµV/m field strength contour is not expanded. Incumbent licensee protection extends only to its 40 dBµV/m signal strength contour. Pursuant to the minor modification notification procedures set forth in 1.947(b), the incumbent licensee must notify the Commission within 30 days of any change in technical parameters for stations that are authorized under a waiver of 90.621(b)(4), or that are authorized under 90.621(b)(5).

(c) Special provisions for spectrum blocks F1 through V. Incumbent licensees that have received the consent of all affected parties or a certified frequency coordinator to utilize an 18 dBµV/m signal strength interference contour shall have their service area defined by their originally-licensed 36 dBµV/m field strength contour and their interference contour shall be defined as their originally-licensed 18 dBµV/m field strength contour. The "originally-licensed" contour shall be calculated using the maximum ERP and the actual HAAT along each radial. Incumbent licensees seeking to utilize an 18 dBµV/m signal strength interference contour shall first seek to obtain the consent of affected co-channel incumbents. When

the consent of a co-channel licensee is withheld, an incumbent licensee may submit to any certified frequency coordinator an engineering study showing that interference will not occur, together with proof that the incumbent licensee has sought consent. Incumbent licensees are permitted to add, remove or modify transmitter sites within their original 18 dBµV/m field strength contour without prior notification to the Commission so long as their original 18 dBµV/m field strength contour is not expanded. Incumbent licensee protection extends only to its 36 dBµV/m signal strength contour. Pursuant to the minor modification notification procedures set forth in 1.947(b), the incumbent licensee must notify the Commission within 30 days of any change in technical parameters for stations that are authorized under a waiver of 90.621(b)(4), or that are authorized under 90.621(b)(5).

* * * * *

§ 90.737 [Removed]

■ 30. Section 90.737 is removed.

■ 31. Section 90.743 is amended by revising paragraphs (a) introductory text and (c) to read as follows:

§ 90.743 Renewal expectancy.

(a) All licensees seeking renewal of their authorizations at the end of their license term must file a renewal application in accordance with the provisions of § 1.949 of this chapter. Licensees must demonstrate, in their application, that:

* * * * *

(c) Phase I non-nationwide licensees have license terms of 10 years, and therefore must meet these requirements 10 years from the date of initial authorization in order to receive a renewal expectancy. Phase I nationwide licensees and all Phase II licensees have license terms of 10 years, and therefore must meet these requirements 10 years from the date of initial authorization in order to receive a renewal expectancy.

BILLING CODE 6712-01-P

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****50 CFR Part 660**

[Docket No. 051014263-5263-01; I.D. 093005A]

RIN 0648 AU00

Magnuson-Stevens Act Provisions; Fisheries off West Coast States and in the Western Pacific; Pacific Coast Groundfish Fishery; Specifications and Management Measures; Inseason Adjustments; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; correcting amendment.

SUMMARY: This document contains corrections to the inseason adjustments that became effective on October 1, 2005. The inseason adjustment contained an error in the limited entry trawl trip limit table, Table 3 (South), on page 58076. The trip limit for petrale sole on line 16 should have been closed only south of 38° N. lat., as stated in the preamble, rather than south of 40°10' N. lat. as depicted in the table. These regulations implemented changes to the 2005–2006 fishery specifications and management measures for groundfish taken in the U.S. exclusive economic zone off the coasts of Washington, Oregon, and California.

DATES: Effective 0001 hours (local time) October 1, 2005.

FOR FURTHER INFORMATION CONTACT: Jamie Goen (Northwest Region, NMFS), phone: 206–526–4646; fax: 206–526–6736 and; e-mail: jamie.goen@noaa.gov.

SUPPLEMENTARY INFORMATION:**Electronic Access**

This correcting notification also is accessible via the Internet at the Office of the Federal Register's website at <http://www.gpoaccess.gov/fr/index.html>. Background information and documents are available at the NMFS Northwest Region website <http://www.nwr.noaa.gov/sustfsh/gdfsh01.htm> and at the Council's website at <http://www.pcouncil.org>.

Background

The regulations that are the subject of this correction are at 50 CFR 660, subpart G. These regulations affect persons operating in the limited entry trawl fishery for groundfish species off the U.S. West Coast.

Need for Correction

As published, the inseason adjustment contained an error which needs to be corrected. This action provides one correction to the inseason adjustment. The inseason adjustment published in the *Federal Register* on October 5, 2005 (70 FR 58066), contained an error in the limited entry trawl trip limit table, Table 3 (South), on page 58076. The trip limit for petrale sole on line 16 should have been closed only south of 38° N. lat., as stated in the preamble, rather than south of 40°10' N. lat. as depicted in the table.

As stated in the preamble to the inseason adjustment (70 FR 58066, October 5, 2005), the Pacific Fishery Management Council (Pacific Council) recommended at its September 18–23, 2005, meeting in Portland, OR, that NMFS implement a seaward limited entry trawl Rockfish Conservation Area (RCA) boundary line approximating the 250–fm (457-m) depth contour coastwide in order to nearly eliminate the catch of petrale sole. However, NMFS was not able to implement this line south of 38° N. lat. to the U.S./Mexico border because there are no coordinates for this line in Federal regulations. In order to be used as boundary lines for inseason groundfish management, coordinates must be published in Federal regulations at 50 CFR Part 660. Therefore, in order to implement the intent of the Pacific Council recommendation as much as possible, NMFS implemented a boundary line approximating the 200–fm (366-m) depth contour and a prohibition on the retention of petrale sole in this area during October. Because there is catch of petrale between 200–fm (366-m) and 250–fm (457-m), including some targeting on petrale sole, moving the RCA boundary line from 150–fm (274-m) to 200–fm (366-m) for October through December would likely not keep total catch of petrale sole within its ABC/OY for the year. A reduction of the petrale sole trip limit during the middle of a cumulative trip limit period (in this case, September through October) would make enforcement of such limits difficult. Mid-cumulative trip limit reductions are difficult to enforce because some fishers may have already achieved the higher limits earlier in the period while others who have not achieved their limit previously are restricted to the lower limits. It is difficult to query a paper-based fish landing ticket system mid-cumulative limit period to see if a fisher is in violation. Thus, NMFS determined that a closure is the best method for achieving the goals of this action.

Therefore, in addition to the line change, NMFS also implemented a prohibition on the retention of petrale sole between 38° N. lat. and the U.S./Mexico border during the month of October in order to prevent targeting on petrale sole. During November and December, the Pacific Council recommendation of decreasing the trip limit for petrale sole to 2,000 lb (0.9 mt) per 2 months was determined to be sufficient to allow retention of incidentally caught petrale sole while not encouraging targeting. Therefore, while the analysis suggested a prohibition on the retention of petrale sole between 38° N. lat. and the U.S./Mexico border during the month of October, the trip limit table, Table 3 (South), mistakenly showed the prohibition on the retention of petrale sole between 40°10' N. lat. and the U.S./Mexico border during the month of October. This was an inadvertent mistake resulting from the design of the trip limit table (i.e., trip limits for a species in Table 3 (South) apply between 40°10' N. lat. and the U.S./Mexico border unless otherwise stated). The prohibition on retention of petrale sole should have been stated within that table as applying south of 38° N. lat.

Without a correction to Federal regulations, this fishery would be closed between 38° N. lat. and 40°10' N. lat., which is inconsistent with the intent of the Pacific Council and NMFS. Between 38° N. lat. and 40°10' N. lat., the limited entry trawl RCA, which extends from the shoreline to 250–fm (457-m), as well as the reduced petrale sole trip limits for November and December, are expected to sufficiently reduce the take of petrale sole to near zero through the end of the year.

For these reasons, NMFS is amending Federal regulations to correctly prohibit the retention of petrale sole between 38° N. lat. and the U.S./Mexico border during the month of October in the trip limit table, Table 3 (South).

Classification

The Assistant Administrator (AA) for Fisheries, NOAA, finds good cause to waive the requirement to provide prior notice and opportunity for public comment on this action pursuant to 5 U.S.C. 553(b)(B), because providing prior notice and opportunity for comment would be contrary to the public interest. The correction is to indicate that participants in the limited entry trawl fishery are prohibited from retaining petrale sole between 38° N. lat. and the U.S./Mexico border during the month of October in the trip limit table, Table 3 (South). NMFS had mis-published this closure in its inseason

adjustment for this action (70 FR 58066, October 5, 2005). Prior notice and opportunity for comment would contravene the intent of this action, which was to allow fishing for petrale sole between 40°10' N. lat. and 38° N. lat. during October 2005. Providing prior notice and opportunity for comment would cost fishermen in lost fishing opportunity during October and to compound this loss by going through prior notice and opportunity for comment would in effect make the action meaningless. Therefore, it is contrary to the public interest to provide prior notice and an opportunity for public comment on this correction.

For these reasons, the AA finds also finds good cause to waive the 30-day

delay in effectiveness requirement under 5 U.S.C. 553(d)(3).

List of Subjects in 50 CFR Part 660

Administrative practice and procedure, American Samoa, Fisheries, Fishing, Guam, Hawaiian Natives, Indians, Northern Mariana Islands, Reporting and recordkeeping requirements.

Dated: October 17, 2005.

James W. Balsiger,

Acting Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

■ Accordingly, 50 CFR part 660 is corrected by making the following correcting amendments:

PART 660—FISHERIES OFF WEST COAST STATES AND IN THE WESTERN PACIFIC

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In part 660, subpart G, Table 3 (South) is revised to read as follows:

BILLING CODE 3510-22-S

Table 3 (South) to Part 660, Subpart G -- 2005-2006 Trip Limits for Limited Entry Trawl Gear South of 40°10' N. Lat.
Other Limits and Requirements Apply -- Read § 660.301 - § 660.390 before using this table

092005

	JAN-FEB	MAR-APR	MAY-JUN	JUL-AUG	SEP-OCT	NOV-DEC
Rockfish Conservation Area (RCA)^{6/}:						
40°10' - 38° N. lat.	75 fm - modified 200 fm ^{7/}	100 fm - 200 fm	100 fm - 150 fm		shoreline - 250 fm	
38° - 36° N. lat.	75 fm - 150 fm	100 fm - 150 fm			shoreline - 200 fm	
36° - 34°27' N. lat.	75 fm - 150 fm	100 fm - 150 fm			50 fm - 200 fm	
South of 34°27' N. lat.	75 fm - 150 fm along the mainland coast; shoreline - 150 fm around islands	100 fm - 150 fm along the mainland coast; shoreline - 150 fm around islands			50 fm - 200 fm along the mainland coast; shoreline - 200 fm around islands	

Small footrope gear is required shoreward of the RCA; all trawl gear (large footrope, midwater trawl, and small footrope gear) is permitted seaward of the RCA.

See § 660.370 and § 660.381 for Additional Gear, Trip Limit, and Conservation Area Requirements and Restrictions.
 See §§ 660.390-660.394 for Conservation Area Descriptions and Coordinates (including RCAs, YRCA, CCAs, Farallon Islands, and Cordell Banks).

State trip limits may be more restrictive than federal trip limits, particularly in waters off Oregon and California.

TABLE 3 (South) cont

1/ Yellowtail is included in the trip limits for minor shelf rockfish.

2/ POP is included in the trip limits for minor slope rockfish

3/ "Other flatfish" are defined at § 660.302 and include butter sole, curffin sole, flathead sole, Pacific sanddab, rex sole, rock sole, sand sole, and starry flounder.

4/ The minimum size limit for lingcod is 24 inches (61 cm) total length.

5/ Other fish are defined at § 660.302 and include sharks, skates, ratfish, morids, grenadiers, and kelp greenling.

Pacific cod is included in the trip limits for "other fish."

6/ The Rockfish Conservation Area is a gear and/or sector specific closed area generally described by depth contours but specifically defined by lat/long coordinates set out at § 660.390.

7/ The "modified 200 fm" line is modified to exclude certain petrale sole areas from the RCA.

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****50 CFR Part 679**

[Docket No. 041126333-5040-02; I.D. 101705A]

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock in Statistical Area 630 of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; modification of a closure.

SUMMARY: NMFS is opening directed fishing for pollock in Statistical Area 630 of the Gulf of Alaska (GOA) for 48 hours. This action is necessary to fully use the 2005 total allowable catch (TAC) of pollock specified for Statistical Area 630.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), October 17, 2005, through 1200 hrs, A.l.t., October 19, 2005.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of

Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

NMFS closed the directed fishery for pollock in Statistical Area 630 of the GOA under § 679.20(d)(1)(iii) on October 8, 2005 (70 FR 59676, October 13, 2005).

NMFS has determined that approximately 1,700 mt of pollock remain in the directed fishing allowance. Therefore, in accordance with 679.25(a)(2)(i)(C) and (a)(2)(iii)(D), and to fully utilize the 2005 TAC of pollock in Statistical Area 630, NMFS is terminating the previous closure and is reopening directed fishing for pollock in Statistical Area 630 of the GOA. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that the directed fishing allowance for pollock in Statistical Area 630 of the GOA will be reached after 48 hours. Consequently, NMFS is prohibiting directed fishing for pollock in Statistical Area 630 of the GOA effective 1200 hrs, A.l.t., October 19, 2005.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant

Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the opening of pollock in Statistical Area 630 of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of October 13, 2005.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by section 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 17, 2005.

Alan D. Risenhoover,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 05-20994 Filed 10-17-05; 1:14 pm]
