

lavage, and release. Forty sub-adult green and 15 loggerhead sea turtles of all sexes will be captured annually. Twelve of the 40 captured green sea turtles will have sonic transmitters glued to the carapace. The purpose of the research will be to provide a basic understanding of the abundance, location, and movement of sea turtles within the research area. The duration of this permit is five years.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of any endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

of a contact person, refer to the author  
of the document.

**SUPPLEMENTARY INFORMATION:**

**Background**

The General Provisions to the NSPS  
in 40 CFR part 60 and the NESHAP in  
40 CFR part 61 provide that a source  
owner or operator may request a  
determination of whether certain  
intended actions constitute the  
commencement of construction,  
reconstruction, or modification. EPA's  
written responses to these inquiries are  
broadly termed applicability  
determinations. See 40 CFR 60.5 and  
61.06. Although the part 63 NESHAP  
and section 111(d) of the Clean and Air  
Act regulations contain no specific  
regulatory provision that sources may  
request applicability determinations,  
EPA does respond to written inquiries  
regarding applicability for the part 63  
and section 111(d) programs. The NSPS  
and NESHAP also allow sources to seek  
permission to use monitoring or  
recordkeeping which is different from  
the promulgated requirements. See 40  
CFR 60.13(i), 61.14(g), 63.8(b)(1), 63.8(f),  
and 63.10(f). EPA's written responses to  
these inquiries are broadly termed  
alternative monitoring decisions.  
Furthermore, EPA responds to written  
inquiries about the broad range of NSPS  
and NESHAP regulatory requirements as  
they pertain to a whole source category.  
These inquiries may pertain, for  
example, to the type of sources to which  
the regulation applies, or to the testing,  
monitoring, recordkeeping or reporting  
requirements contained in the

regulation. EPA's written responses to  
these inquiries are broadly termed  
regulatory interpretations.

EPA currently compiles EPA-issued  
NSPS and NESHAP applicability  
determinations, alternative monitoring  
decisions, and regulatory  
interpretations, and posts them on the  
Applicability Determination Index (ADI)  
on a quarterly basis. In addition, the  
ADI contains EPA-issued responses to  
requests pursuant to the stratospheric  
ozone regulations, contained in 40 CFR  
part 82. The ADI is an electronic index  
on the Internet with more than one  
thousand EPA letters and memoranda  
pertaining to the applicability,  
monitoring, recordkeeping, and  
reporting requirements of the NSPS and  
NESHAP. The letters and memoranda  
may be searched by date, office of  
issuance, subpart, citation, control  
number or by string word searches.

Today's notice comprises a summary  
of 58 such documents added to the ADI  
on August 19, 2005. The subject, author,  
recipient, date, header and a brief  
abstract of each letter and memorandum  
are listed in this notice. Complete  
copies of these documents may be  
obtained from the ADI through the  
OECA Web site at: [http://www.epa.gov/  
compliance/assistance/applicability](http://www.epa.gov/compliance/assistance/applicability).

**Summary of Headers and Abstracts**

The following table identifies the  
database control number for each  
document posted on the ADI database  
system on August 19, 2005; the  
applicable category; the subpart(s) of 40  
CFR part 60, 61, or 63 (as applicable)  
covered by the document; and the title  
of the document, which provides a brief  
description of the subject matter. We  
have also included an abstract of each  
document identified with its control  
number after the table. These abstracts  
are provided solely to alert the public to  
possible items of interest and are not  
intended as substitutes for the full text  
of the documents.
