

DEPARTMENT OF LABOR**Employment and Training Administration**

[TA-W-57,512]

US Airways, Inc. Myrtle Beach, SC; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18(C) an application for administrative reconsideration was filed with the Director of the Division of Trade Adjustment Assistance for workers at U.S. Airways, Inc., Myrtle Beach, South Carolina. The application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued. TA-W-57,512; U.S. Airways, Inc., Myrtle Beach, South Carolina (October 20, 2005).

Signed at Washington, DC, this 20th day of October 2005.

Douglas F. Small,

Acting Director, Division of Trade Adjustment Assistance.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-199]

Manhattan College; (Manhattan College Zero Power Reactor); Notice of Approval of Decommissioning Plan and Notice of License Termination

The U.S. Nuclear Regulatory Commission (NRC) is noticing the termination of Facility Operating License No. R-97 for the Manhattan College (MC) Zero Power Reactor (MCZPR).

The NRC has terminated the license of the decommissioned MCZPR, which was in the Leo Engineering Building of Manhattan College, Riverdale, New York, and has released the site for unrestricted use. The licensee requested termination of the license in a letter to NRC dated February 3, 2005. The MCZPR, a 0.1 watt swimming pool reactor, was constructed in 1964 and operated under License No. R-94. The reactor was permanently shut down in 1995. On March 23, 1999, NRC approved the decommissioning plan (DP) dated July 21, 1998, by License Amendment No. 12.

A Notice and Solicitation of Comments Pursuant to 10 CFR 20.1405 and 10 CFR 50.82(b)(5) Concerning Proposed Action to Decommission Manhattan College Zero Power Research Reactor appeared in the **Federal Register** on February 12, 1999 (64 FR 7214). The staff considered all comments received during the review of the MCZPR decommissioning plan.

The NRC completed its review of the December 2004 final status survey report (FSSR) for the Reactor Facility at Manhattan College School of Engineering. The licensee submitted the report to NRC by letter dated February 3, 2005. The report documented the level of residual radioactivity remaining at the facility and stated that compliance with the criteria as approved in the NRC-approved DP had been demonstrated.

Pursuant to 10 CFR 50.82(b)(6), the NRC staff concluded that the decommissioning has been performed in accordance with the approved DP and that the final terminal radiation survey and associated documentation demonstrate that the facility and site are suitable for release in accordance with the criteria in the NRC-approved DP. Furthermore, on the basis of the decommissioning activities carried out by MC, the NRC's review of the licensee's FSSR, the results of NRC's inspections conducted at MC, and the results of NRC's confirmatory surveys, the NRC has concluded that the
